Yphise certifies

Tivoli Storage Manager edited by IBM

as the best ranked software in comparison with the competition according to the List of Requirements

Data protection and availability on disaster or dysfunction

RANKING CHART

GUARANTEEING THE DATA CONFIDENTIALITY AND ACCESSIBILITY

MINIMIZING THE IMPACT OF LARGE DATA VOLUMES ON OPERATIONS

MINIMIZING THE WORKLOAD NECESSARY TO RECOVER LOST DATA

GUARANTEEING THE CONFIDENCE IN DATA PROTECTION PROCESSES

GUARANTEEING THE PROTECTION OF ALL INFORMATION RESOURCES

RESPECTING THE RECOVERY TIME LIMIT ON DISASTER

— Tivoli Storage Manager ranking — Best software evaluation — Average evaluation — — Worst evaluation

The risk of data inconsistency has raised tremendously when considering the recovery plans. This risk stems from the generalization of 24/24 operations, the distributed infrastructure and the TP processes. The backup and restore tools treat this risk.

The six dimensions of the ranking chart above aggregate more than 300 functional and technical assessment items. The Yphise List of Requirements is practical to meet the needs of large companies. It is proactive to appreciate the next improvements. It is set according to Yphise ISO 9001 2000-certified methodology.

The software products shortlisted by Yphise: BrightStor Enterprise Backup, NetBackup DataCenter, NetWorker, Time Navigator, Tivoli Storage Manager .

Certificate No 031201 valid until December 31, 2004
