

# Using advance source control: Improve enterprise development productivity and collaboration

Webcast – June 11, 2015

---

## Highlights

### Topics include:

- Discover how to enhance team collaboration and speed time to market
- Learn how to gain high visibility into project activities and team progress
- Find out how consistent processes can help improve software quality

### Speaker

- *Rosalind Radcliffe*, IBM distinguished engineer

**Broadcast date:** June 11, 2015,  
11:00 a.m. EST / 4:00 p.m. GMT

**Developed for:** Software developers and system administrators

**Technical level:** Basic

---

To meet today's demanding business needs, organizations are exploiting mobile applications and cloud technologies while extending existing their IT infrastructure, tools and processes. Because IT needs to be able to quickly respond to business needs, many companies with mainframes have begun to reexamine their existing source control management (SCM) solutions. Many find their existing SCM solution does not support today's DevOps and distributed project needs.

## Webcast

Join us for a complimentary webinar with IBM Distinguished Engineer Rosalind Radcliffe who will discuss her experiences with clients who have moved to an integrated system that provides a unified repository for mainframe and distributed developers. Rational Team Concert on z/OS supports projects that span distributed and z Systems. It is designed to help organizations create the type of adaptable, flexible IT environment that is required for efficient, cost-saving SCM. The solution continues to be enhanced to meet agile, DevOps and mobile development needs. The Rational Team Concert software is a single solution you can use to manage projects in both mainframe and distributed environments, which results in better collaboration and increased development team productivity.
