

# Solving complex CICS cross-system performance problems

*Teleconference – March 7, 2013*

---

## Highlights

### Topics

- Cross-domain tools that provide insight into the performance of the entire transaction
- Domain power-tools to reduce skill levels and the effort needed to manage and tune CICS performance
- Collaborative tools that enable faster hand-over between roles, with less rework
- Integrated tools that simplify tasks for new and experienced users

### Speakers:

*Satish Tanna,*

Lab Technical Specialist, CICS Performance Analyzer,  
IBM Software Group

*James Martin,*

U.S. Representative, Fundi Software

**Broadcast date:** March 7, 2013,

11 a.m. EST / 4:00 p.m. GMT / UTC

**Developed for:** Architects; developers;  
system programmers; application programmers;  
IT managers; and business managers

**Technical level:** Intermediate

---

If you run CICS® transactions that use other IBM® subsystems such as IMS™, DB2® and WebSphere® MQ, you know that performance problems in mixed subsystems can be difficult and time-consuming to track down. And yet, the operational efficiency of your CICS systems is critical to overall enterprise performance.

## Teleconference

Join us for this complimentary teleconference to learn how IBM Transaction Analysis Workbench can enable your help desk's first responders to analyze transaction performance and behavioral problems by providing a platform for investigating logs and other historical data. Its collaborative workflow process lets domain experts pick up the problem without delay and perform the deep-dive analysis. It offers a wide range of system logs and reports from tools, including IBM CICS Performance Analyzer, to locate the cause and rectify the problem. This teleconference will show you a framework that spans the silos and effectively dissolves barriers between silos, enabling experts from different areas to collaborate on the same problem – efficiently and effectively.

## Register online right now

Register now for this teleconference by visiting  
[ibm.com/software/systemz/telecon/mar7](http://ibm.com/software/systemz/telecon/mar7)

Join us after the teleconference for a live question-and-answer session. This teleconference will also be available for replay after the event.
