CICS Performance Analyzer for z/OS

What's New in CICS PA Version 1 Release 3

CICS Tools | IBM UK Laboratories, Hursley Park

© 2003 IBM Corporation

- ▶ Introduce yourself and the topic
- ▶ CICS Performance Analyzer for OS/390 Version 1 Release 3 was announced on the 5th August, 2003 and is generally available on 29th August, 2003.
- ▶ It supports CICS Transaction Server for z/OS Version 2 (all releases), CICS Transaction Server for OS/390 Version 1 (all three releases) and CICS for MVS/ESA Version 4.1.
- ▶ Purpose of today's session is to introduce you to What's New in CICS PA Version 1 Release 3 of the product. This session will highlight some of the major new enhancements in this release, such as Historical Data support and WebSphere MQ support, as well as other functional enhancements to CICS PA.

Preface

- The following terms are trademarks or registered of the International Business Machines Corporation in the United States and/or other countries:
 - ▶ CICS, CICS for MVS/ESA, CICS/ESA, CICSplex SM
 - ▶ DB2, QMF
 - ▶ DFSMS/MVS, TotalStorage
 - ▶ IBM
 - ▶ MQSeries
 - ▶ OS/390, S/390, z/OS
 - ▶ RMF, Resource Measurement Facility
 - ▶ WebSphere
- Java and all Java-based trademarks and logos are trademarks or registered trademarks of Sun Microsystems, Inc. in the United States and/or other countries.

Presentation Overview

- CICS PA Release 3 Highlights
- CICS PA Overview
- CICS PA Release 3 content ...
 - ▶ Historical Performance Data Repository
 - ▶ WebSphere MQ (SMF 116) Reporting
 - ▶ New and Enhanced CICS Monitoring Facility (CMF) Reports
 - ▶ ISPF Dialog Enhancements
 - ▶ Other Functional Enhancements
- Summary

- ▶ Overview of the presentation..... the presentation begins with a highlights foil on the CICS PA Release 3 content items along with a brief overview of the CICS PA product itself. This is then followed by the main content of the presentation where we will go through, in a little more detail, each of the functional enhancements in CICS PA Release 3. Then we'll finish the presentation with a summary foil on the CICS PA product.

CICS PA Release 3 Highlights

- Historical Performance Database Repository
 - ▶ Short and Long term historical performance data
 - ▶ Comprehensive reporting facilities
- WebSphere MQ (SMF 116) Reporting
- New and Enhanced CICS Monitoring Facility (CMF) Reports
 - ▶ Enhanced CMF Resource Class Reports ...
 - Temporary Storage Queue List and Summary reports
 - ▶ Performance Wait (Bottleneck) Analysis
- ISPF Dialog Enhancements ...
 - ▶ Report Set menu restructured for easier report selection
 - ▶ More flexible and easier-to-use Report Set JCL generation
- Other Functional Enhancements ...
 - ▶ Report Forms enhanced to allow specification of Selection Criteria

- ▶ This visual highlights the enhancements in CICS PA Release 3, each of which will be covered in a little more detail as we go through the presentation.
- ▶ The major enhancements in CICS PA Release 3 include:-
 - ▶ Historical Performance Database Repository
 - ▶ WebSphere MQ (SMF 116) Reporting
 - ▶ New and Enhanced CICS Monitoring Facility (CMF) Reports
 - ▶ ISPF Dialog Enhancements
 - ▶ Other Functional Enhancements.

CICS PA Release 3 Highlights - Notes

CICS Performance Analyzer for z/OS Release 3 provides a number of significant enhancements including:-

- Historical Database (HDB) support

- WebSphere MQ support

- New and Enhanced CICS Monitoring Facility (CMF) Reports:-

 - New Transaction Resource Usage Reports to include Temporary Storage Queue usage

 - New Performance Wait (Bottleneck) Analysis Report.

- ISPF Dialog Enhancements:-

 - Report Set menu restructured for easier report selection

 - More flexible and easier-to-use Report Set JCL generation

 - Report Forms enhanced to allow the specification of Selection Criteria

 - Additional Report Form samples.

- Other Functional enhancements include:-

 - Performance List eXtended report now supports most CMF fields as sort criteria

 - Improved Performance Summary report presentation - additional sort fields supported

 - Enhanced Workload Activity Summary report - Sub-totalling by WLM phase (BTE and EXE)

► This is a notes page for the audience.

CICS PA Overview

- ▶ This visual shows the main components of CICS PA; including the TSO Interactive System Productivity Facility (ISPF) dialog, it's related data sets and the CICS PA batch analysis, reporting programs and data sets.

CICS PA Overview - Notes

The CICS PA analysis programs use the performance and accounting data written to MVS System Management Facility (SMF) data sets. This includes the data collected by the CICS Monitoring Facility (CMF) and written as SMF type 110 records, DB2 Accounting data written as SMF type 101 records, WebSphere MQ Accounting data written as SMF type 116 records, and the MVS System Logger data written as SMF type 88 records.

You can produce all the CICS PA reports and extracts by simply defining your CICS Systems (APPLIDs), MVS Images, DB2 Subsystems, WebSphere MQ Queue Managers, and MVS System Logger along with their associated unloaded SMF data sets.

Other CICS PA data sets include:-

1. Report Sets define your report and data extract requests.
2. Report Forms enable you to tailor your reports and extracts to include the information that you want to see.
3. Object Lists enable you to group objects for reporting purposes, e.g. Analyze the resource usage of a particular group of transactions or users.
4. HDB Register is the inventory of all information associated with the CICS PA Historical Database Manager.

► This is a notes page for the audience.

CICS PA Overview - Main Menu ...

- ▶ This is the CICS PA Main Menu screen. It can be invoked by entering:-
- ▶
- ▶ ex 'CICSPA13.SCPAEXEC(CPAOREXX)' 'CICSPA13 E'
- ▶
- ▶ into the ISPF Command Shell panel (option 6) command line.
- ▶
- ▶ It can also be defined as a standard selection on ISPF dialogs, examples of how to set this up are documented in the CICS PA User's Guide manual.

CICS PA Overview - Main Menu - Notes

The CICS PA Interactive System Productivity Facility (ISPF) dialog allows you to request and submit your report and data extract requests easily. For the more experienced user, a batch command interface is also available to request the reports and extracts.

Follow the dialog to meet your reporting and analysis requirements:-

1. Customize your CICS PA dialog profile (optional). CICS PA will use default settings and prompt you to allocate data sets (with default allocation attributes) when required.
2. Define your CICS Systems (APPLIDs), MVS Images, DB2 Subsystems, MQ Subsystems, MVS System Logger and their associated unloaded SMF data sets.
3. Report Sets define your report and data extract requests. Here you request and tailor the required reports and extracts, then submit them for batch processing.
4. Report Forms enable you to tailor your reports and extracts to include the information that you want to see. You simply edit the report or extract format and content to meet your specific requirements. Comprehensive online help is available for every CMF field, so you never need to reference a manual.
5. Object Lists enable you to group objects for reporting purposes, e.g. Analyze the resource usage of a particular group of transactions or users.
6. Historical Database enables you to collect and manage historical performance data for your CICS systems.

► This is a notes page for the audience.

CICS PA Release 3 - Historical Database (HDB)

- Flexible and easy-to-use facility for collecting and managing historical performance data for your CICS systems
- The CICS PA history database function provides ...
 - ▶ Short term history data detailing individual transaction performance for use in performance problem analysis
 - ▶ Long term history data summarized over time can be used for trend analysis and capacity planning
 - ▶ Powerful and flexible definition facility for historical data repositories based on Report Forms
 - ▶ Comprehensive reporting facilities
 - ▶ Optionally load history data into DB2 for further analysis and reporting
 - ▶ Definition and management of the historical databases (HDBs) from the CICS PA ISPF dialog
 - ▶ Trending and capacity planning

- ▶ The CICS PA Historical Database (HDB) provides a flexible and easy-to-use facility for managing historical performance data for your CICS systems. The CICS PA History Database (HDB) function provides:-
 - ▶ Short term history data detailing individual transaction performance for use in performance problem analysis
 - ▶ Long term history data summarized over time can be used for trend analysis and capacity planning
 - ▶ Powerful and flexible definition facility for historical data repositories
 - ▶ Comprehensive reporting facilities
 - ▶ A facility to optionally load history data into DB2 for further analysis and reporting using DB2 reporting tools such as Query Management Facility (QMF)
 - ▶ Definition and management of the historical databases (HDBs) from the CICS PA ISPF dialog
 - ▶ Trending and Capacity Planning capabilities.

Option ==> _____

1  Templates          Design HDB Templates
2  Define             Define a new HDB
3  Load              Load data into the HDBs
4  Report             Submit HDB report requests
5  Export             Export HDB data sets to DB2
6  Maintenance        Maintain HDB definitions and data sets
7  Housekeeping       Perform HDB housekeeping

HDB Register . . . TEST.HDB.REGISTER _____ +
```

- ▶ This visual shows the CICS PA Historical Database Menu. It contains the functions to manage the Historical Database environment and provides access to the seven major functions of HDB processing.
- ▶ The HDB Register dataset is the inventory of all information associated with the CICS PA Historical Database Manager. The HDB register contains the following information:-
 - ▶ HDB definitions
 - ▶ Dataset definitions for HDB repositories
 - ▶ HDB Templates.
- ▶ You can define as many Registers as required; however, only one Register can be used at a time and each Register acts independently. Information cannot be shared between Registers.

CICS PA Historical Database (HDB) - HDB Template ...

- HDB Templates define the type and format of the data in the Historical Databases (HDBs)
- Similar to Report Forms, they provide HDBs with ...
 - ▶ Flexibility ...
 - you decide what and how much information is recorded in the HDB
 - ▶ Ease of use ...
 - the editor provides a simple way of tailoring the template
 - ▶ Transparency ...
 - you can see at a glance what information is recorded in the HDB
- Each Template contains the following definition information about the HDB ...
 - ▶ Type of HDB - List or Summary
 - ▶ Field names and associated attributes

- ▶ HDB Templates allow you to define the type and format of the data in the Historical Databases (HDBs). HDB templates are very similar to Report Forms in that they provide HDBs with:-
 - ▶ Flexibility - in that you decide what and how much information is recorded in the HDB
 - ▶ Ease of use - the editor provides a familiar and simple way of tailoring the template. You simply edit the template format and content to meet your specific reporting or analysis requirements. Selection Criteria can also be specified in order to apply filtering that is applicable to the data being collected by the HDB Template.
 - ▶ Transparency - you can see at a glance what information is being recorded in the HDB.
- ▶ Just as in Report Forms; comprehensive online help is available for every CMF field, so that you never need to reference a manual.

```

- ▶ This visual shows an example of defining a new CICS PA Historical Database (HDB). Information to be provided about an HDB includes:-
 - ▶ HDB Name, System (optional), description
 - ▶ the HDB Format (or Template)
 - ▶ Selection Criteria (optional)
 - ▶ HDB data retention information (to be used by the CICS PA Maintenance and Housekeeping functions)
 - ▶ HDB dataset storage space allocation and attributes.

CICS PA Historical Database (HDB) ...

- **Load ...**
 - ▶ Creates the JCL that builds the HDBs
 - Recap Report from the HDB Load process
- **Report ...**
 - ▶ Generates the Report JCL for HDBs
- **Export ...**
 - ▶ Creates the DDL to define the DB2 Table
 - ▶ Generates the JCL to load a HDB into a DB2 Table
- **Maintenance ...**
 - ▶ Maintenance functions that can be performed against HDBs ...
 - Display the HDB definition and its associated data sets
- **Housekeeping ...**
 - ▶ Housekeeping functions that can be performed against HDBs ...
 - Submit HDB Housekeeping JCL ...
 - Delete an entire HDB or individual datasets in the HDB
 - Repair HDB Register using VERIFY command

- ▶ This visual shows the various functions for HDB processing, including:-
 - ▶ Load - Load data from SMF data sets into the HDB
 - ▶ Report - Produce reports from the HDBs
 - ▶ Export - Export data from HDB data sets to a DB2 table
 - ▶ Maintenance - Maintain HDB definitions and data sets
 - ▶ Housekeeping - Perform housekeeping - delete expired data sets.

 - ▶ an option to create the DDL to define the DB2 Table for an HDB
 - ▶ generate (and submit) the JCL to load the HDB into a DB2 Table.

CICS PA Release 3 - MQ Reports ...

- Provide a detailed performance analysis of the CICS transactions that access an WebSphere MQ Queue Manager
 - ▶ WebSphere MQ Accounting data (SMF 116)
 - Class 1 (Subtype 0), Class 3 (Subtypes 1 and 2) records
 - Accounting data for each task, at thread and queue level
- MQ Reports ...
 - ▶ List ...
 - Class 1, Class 3, ...
 - ▶ Summary ...
 - Class 1, Class 3, ...
 - Summarized by ...
 - CICS Transaction ID and/or MQ queue name
- Record Selection Extract

- ▶ The CICS PA MQ reports use the WebSphere MQ Accounting data (SMF 116 records) to provide a detailed performance analysis of the CICS transactions that access an MQ queue manager.
- ▶ The CICS PA MQ List reports provide a detailed trace of the WebSphere MQ accounting records, reporting the comprehensive performance data contained in the Class 1 and Class 3 records. The MQ Summary reports provide, summarized by either CICS Transaction ID and/or by MQ queue name, an analysis of the MQ system and queue resources used and the transactions they service.
 - ▶ Class 1 (Subtype 0) - Message manager accounting records, record how much CPU was spent processing WebSphere MQ API calls and the number of MQGET and MQPUT calls.
 - ▶ Class 3 (Subtypes 1 and 2) - Accounting data for each task, at thread and queue level.

CICS PA Release 3 - MQ Reports - Notes ...

The new CICS PA MQ reports use the WebSphere MQ Accounting data (SMF 116 records) to provide a detailed performance analysis of the CICS transactions that access an MQ queue manager.

The CICS PA MQ List reports provide a detailed trace of the WebSphere MQ accounting records, reporting the comprehensive performance data contained in the Class 1 (Subtype 0) and Class 3 (Subtypes 1 and 2) records. The MQ Summary reports provide, summarized by either CICS Transaction ID or by MQ queue name, an analysis of the MQ system and queue resources used and the transactions they service.

To produce the CICS PA MQ Reports, you need to accumulate WebSphere MQ Accounting statistics (SMF 116 records). CICS PA Version 1 Release 3 supports the WebSphere MQ Accounting statistics data from MQSeries for OS/390 Version 5.2, IBM WebSphere MQ for z/OS Version 5.3, and IBM WebSphere MQ for z/OS Version 5.3.1.

The WebSphere MQ SupportPac "MP1B: MQSeries for OS/390 V5.2 - Interpreting accounting and statistics data" provides information on the use and interpretation of the accounting and statistics available in MQSeries for OS/390 Version 5.2 (and later) and also provides information about the layout of the SMF records and suggests ways of analysing the data.

CICS PA Release 3 - CMF Report Enhancements ...

- Enhanced CICS Monitoring Facility (CMF) Reports ...
 - ▶ Resource Class data reporting
 - Temporary Storage
 - List and Summary Reports
 - ▶ Performance Wait Analysis Report
 - Provides a transaction activity summary by wait (suspend) time
 - Summarizes, by transaction ID, the resources that cause a transaction to be suspended
 - Highlights the CICS system resource bottlenecks that may be causing bad response time
 - Enables a more detailed analysis, focusing on the problem resources identified, to be more easily performed
 - ▶ Workload Activity Report
 - Sub-totaling by WLM phase (BTE and EXE)

- ▶ This visual describes some of the other Report enhancements in CICS PA Release 3, including:-
 - ▶ Resource Class data reporting
 - ▶ New Resource Usage Reports have been provided an analysis Temporary Storage Queue resource usage by Transaction ID and Temporary Storage Queue resource usage.
 - ▶ Performance Wait Analysis Report
 - ▶ This new report provides a summary of the transaction activity by wait (suspend) time. This report summarizes, by transaction ID, the resources that cause a transaction to be suspended and highlights the CICS system resource bottlenecks that may be causing bad response time.
 - ▶ Workload Activity Report
 - ▶ This report has been enhanced to provide sub-totaling by Workload Manager (WLM) Begin-to-End (BTE) and EXEcution phase.
 - ▶ The next series of visuals has more detail on each of these enhancements.

CICS PA Release 3 - Resource Usage Reports ...

- Transaction Resource Usage Reports ...
 - ▶ Transaction Resource Usage List
 - File and Temporary Storage Queue
 - ▶ Transaction File Usage Summary
 - ▶ Transaction Temporary Storage Usage Summary
 - ▶ File Usage Summary
 - File Usage by Transaction ID
 - ▶ Temporary Storage Usage Summary
 - Tsqueue Usage by Transaction ID
- Transaction Resource Usage Reports ...
 - ▶ CMF Resource Data and Performance Data - SMF 110 subtype 1
- CMF Resource Class ...
 - ▶ CICS TS for z/OS Version 2.2 with PTFs UQ68396 and UQ79266
 - ▶ CICS TS for OS/390 Version 1.3 with PTFs UQ70905 and UQ79397

- ▶ The CICS PA Transaction Resource Usage Reports provide a detailed analysis of the Resource Class records collected by the CICS Monitoring Facility (CMF). The reports include:-
 - ▶ Transaction Resource Usage List
 - ▶ Transaction File and Temporary Storage Queue Usage Summary
 - ▶ File and Temporary Storage Queue Usage Summary.
- ▶ The CICS PA Transaction Resource Usage Reports provide an analysis of the File and Temporary Storage Queue resource usage by Transaction ID and also File and Temporary Storage Queue resource usage.
- ▶ The new CMF Resource Class was introduced and enhanced in CICS Transaction Server for z/OS Version 2.2 with PTFs UQ68396, UQ71829 and UQ79266 (for APARs PQ63143, PQ67561 and PQ76703) and in CICS Transaction Server for OS/390 Version 1.3 with PTF UQ70905 and UQ79397 (for APARs PQ63141 and PQ76698).

CICS PA Release 3 - Resource Usage Reports - Notes ...

The CICS PA Transaction Resource Usage Reports provide a detailed analysis of the Resource Class records collected by the CICS Monitoring Facility (CMF). The reports include:-

- >Transaction Resource Usage List
- >Transaction File Usage Summary and Transaction Temporary Storage Usage Summary
- >File Usage Summary and Temporary Storage Usage Summary

The Transaction Resource Usage List report provides a list of all Transaction resource class records in the sequence that they appear in the SMF file. It gives Transaction Information, detailing their individual File and Temporary Storage Queue usage.

The Transaction File Usage Summary report summarizes File usage by Transaction ID. For each Transaction ID, it gives Transaction information and File Control statistics followed by a breakdown of File usage for each File used.

The Transaction Temporary Storage Usage Summary report summarizes Temporary Storage Queue usage by Transaction ID. For each Transaction ID, it gives Transaction information and Temporary Storage statistics followed by a breakdown of Tsqname usage for each Temporary Storage Queue used.

The File Usage Summary report summarizes File activity. For each File, it gives a breakdown of File usage by Transaction ID.

The Temporary Storage Usage Summary report summarizes Tsqueue activity. For each Tsqueue, it gives a breakdown of Temporary Storage Queue usage by Transaction ID.

► This is a notes page for the audience.

- This visual shows the Transaction Resource Usage Report panel showing the options available when requesting a Transaction Resource Usage Summary Report.

CICS PA Release 3 - Resource Usage Reports - Notes ...

The Transaction Resource Usage Report panel shows the options available when requesting a Transaction Resource Usage Summary Report:-

- **CICS System Selection** identifies the CICS Systems (APPLIDs) that you want to report against.
- You can request a **Transaction Temporary Storage Usage Summary** report and/or a **Temporary Storage Usage Summary** report.
- The **Transaction Temporary Storage Usage Summary** report summarizes the transactions that use Temporary Storage Queues. The report consists of Transaction Identification and Temporary Storage statistics from the CMF Performance records. In addition, there is one sub-section for each Temporary Storage Queue that this transaction has used. For those transactions which access more than one temporary storage queue, resource sub-totals will also be included in the report.
- The **Temporary Storage Usage Summary** report summarizes Temporary Storage activity, breaking down individual Temporary Storage Queue usage by Transaction ID.
 - Select **Break down by Transaction ID** to include individual Transaction statistics.
 - Select **Include Transaction Totals** to include total Transaction statistics.
- Specify **Selection Criteria** to Include or Exclude:-
 - CMF Performance records based on (a) specified time intervals and/or (b) particular field values.
 - CMF Resource records based on (a) specified time intervals and/or (b) particular field values, including temporary storage queue name.

CICS PA Release 3 - Wait Analysis (Bottleneck) Report ...

- Performance Wait Analysis (Bottleneck) Report
 - ▶ Provides transaction activity by wait (suspend) time
 - ▶ Summarizes, by transaction ID (default), ...
 - the resources that cause a transaction to be suspended
 - highlights the CICS system resource bottlenecks that may be causing bad response time
 - ▶ Enables a more detailed analysis, focusing on the problem resources identified, to be more easily performed

- ▶ The Performance Wait Analysis Report provides a summary of the transaction activity by wait (suspend) time. This report summarizes, by transaction ID, the resources that cause a transaction to be suspended and highlights the CICS system resource bottlenecks that may be causing bad response time. This report enables a more detailed analysis, focusing on the problem resources identified, to be more easily performed.
- ▶ The Performance Wait Analysis Report Report is only supported for CMF performance class data from CICS Transaction Server for OS/390 Version 1.3 or later.

CICS PA Release 3 - ISPF Dialog Enhancements ...

- System Definitions - MQ Subsystem ...
 - ▶ WebSphere MQ Accounting records (SMF 116 records)
- Report Set menu restructured ...
 - ▶ Allows easier selection of reports and extracts
 - ▶ More flexible and easier-to-use Report Set JCL generation
 - JCL generation without Save'ing
 - JCL generation for Report Set, Report Group, or Individual Report
- Report Form Enhancements ...
 - ▶ Allow the specification of Selection Criteria
 - ▶ More than 90 sample Report Forms
 - Additional Report Form samples ...
 - CICS RMI Analysis, Abend Analysis, DBCTL, SOAP for CICS, ...
 - Worst File, Temporary Storage, Transient Data usage, ...

- ▶ CICS PA Release 3 also includes a number of enhancements to the TSO ISPF dialog. These enhancements include:-
 - ▶ Support for MQ Subsystems in CICS PA System Definitions.
 - ▶ Restructuring of the Report Set menu to allow easier selection of the reports and extracts. The Report Categories can be expanded (to show) or collapsed (to hide) the reports.
 - ▶ You can also now generate the JCL not only for an entire Report Set but for a Report Category or an individual Report.
 - ▶ In addition, the dialog will now allow you to submit your Report Set request without first having the save any changes.
 - ▶ Report Form enhancements include:-
 - ▶ Selection Criteria can now be included in the Report Form in order to apply filtering that is applicable to the resources being reported by the Report Form.
 - ▶ there are now some 90 sample Report Forms covering every aspect of transaction performance and resource usage.

*Report Set Category
or
an individual Report*

- This visual shows an example of the restructured Report Set menu. The presentation of reports has changed to a tree structure. The Report Categories can be expanded (to show) or collapsed (to hide) the reports. You can also now generate the JCL not only for an entire Report Set but for a Report Set Category or an individual Report.

CICS PA Release 3 - Other Functional Enhancements ...

- Performance List, List eXtended, and Summary reports
 - ▶ Support all CICS Monitoring Facility (CMF) performance data fields
 - ▶ Listx report now supports most CMF fields as sort criteria
- Improved Performance Summary report presentation
 - ▶ Revised default sort field - Tran (Tran/Term)
 - ▶ Additional sort fields supported
- Transaction Resource Usage List report
 - ▶ File resource sub-totals
- Enhanced Workload Activity Summary report
 - ▶ Sub-totaling by WLM phase (BTE and EXE)

- ▶ This visual highlights some of the other functional enhancements in CICS PA Release 3. They include:-
 - ▶ Performance List, List eXtended and Summary reports now support all CICS Monitoring Facility (CMF) performance data fields.
 - ▶ Performance ListX report now supports most of the CMF data fields as sort criteria.
 - ▶ Performance Summary Report default sort criteria changed to just the Transaction ID (Tran ID/Term ID in Release 2).
 - ▶ Transaction Resource Usage List report has been enhanced to include File resource sub-totals in order to enable easier comparison with the performance class data.
 - ▶ Workload Activity Report has been enhanced to provide sub-totaling by Workload Manager (WLM) Begin-to-End (BTE) and EXEcutation phase.

Summary

- CICS Performance Analyzer for z/OS
 - ▶ Comprehensive Performance Reporting for CICS
 - Including DB2, WebSphere MQ, and MVS System Logger
 - ▶ Extensive Tabular Reports and Extract Data Sets
 - ▶ Historical Database
 - Trending and Capacity Planning
 - ▶ ISPF Dialog to build, maintain, and submit reports and extracts
- CICS PA Version 1.3 - Product information ...
 - ▶ Program Product - 5655-F38
 - ▶ Releases Supported ...
 - CICS Transaction Server for z/OS, Version 2
 - CICS Transaction Server for OS/390, Version 1
 - ▶ More Information

<http://www.ibm.com/cics/>

▶ So to summarize:-

- ▶ The CICS Performance Analyzer for z/OS provides a comprehensive Performance Reporting tool for CICS and related subsystems. It includes many reports and extracts, including DB2, WebSphere MQ, and the MVS System Logger.
- ▶ CICS PA Version 1 Release 3 was announced on the 5th August 2003 and is generally available on the 29th August 2003.
- ▶ CICS PA Version 1.3 supports CICS Transaction Server for z/OS Version 2, CICS Transaction Server for OS/390 Version 1, and CICS for MVS/ESA Version 4.1. For the DB2 Reports, CICS PA Version 1.3 supports DB2 Versions 5, 6, 7, and 8. For the WebSphere MQ Reports, CICS PA Version 1.3 supports MQSeries for OS/390 Version 5.2, IBM WebSphere MQ for z/OS Version 5.3, and IBM WebSphere MQ for z/OS Version 5.3.1.
