

CICS Configuration Manager

CICS® CM allows you to manage the development lifecycle of your CICS applications through controlling, auditing and migration.

KEY FEATURES

Single Point of Control

CICS CM allows you to create, update and delete your CICS definitions, regardless of whether they are stored in a CICS System Definition (CSD) file or a CICSplex SM® Data Repository, using a single ISPF interface or a rich plug-in for the CICS Explorer®

New in 5.2: Enhanced reporting of CICS Resource Definitions through 'Deployment Analysis'

Audit trail

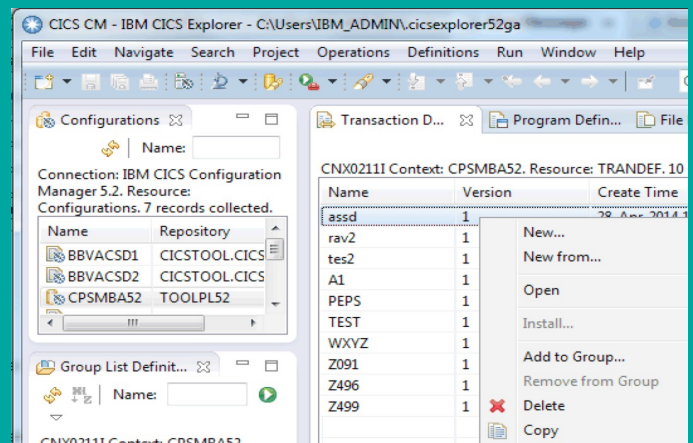

Any change made to your resource definitions through any of the CICS CM interfaces is recorded in a 'Journal', enabling auditing of changes in your environments.

New in 5.2: Support for Workload Management and CICSplex SM Topology Definitions

Migration

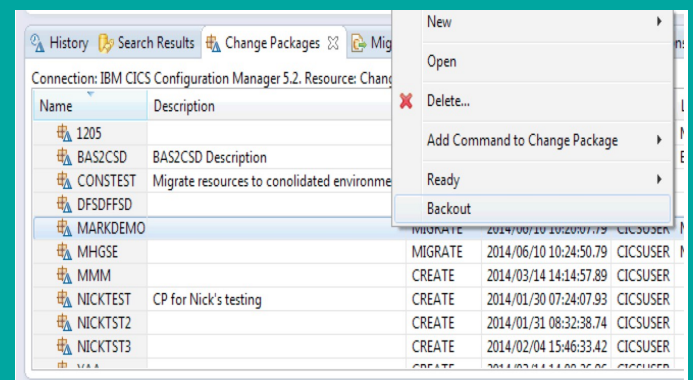

CICS CM will allow the packaging of CICS Definitions and migration of these packages through your different environments. These migrations can be 'backed-out' with the click of a button by utilising the CICS CM Journal

New in 5.2: Full support for the creation and manipulation of Migration Schemes in the client plug-in

The screenshot shows the 'History' pane in the CICS Configuration Manager. It displays a table of resource history for TESTWLM4 from 2014/03/26 10:16:41 to the latest entry. The table has columns for Revision Time, Resource Name/After, Resource Type/Before, Group, and User Name.

Revision Time	Resource Name/After	Resource Type/Before	Group	User Name
2014/06/20 16:18:22	TESTWLM4	WLMSPEC		CICSUSER
2014/06/20 16:17:52	algorithmType LINGOAL	QUEUE		CICSUSER
2014/06/20 16:17:52	algorithmType TESTWLM4	WLMSPEC		CICSUSER
2014/06/20 16:17:52	algorithmType QUEUE	GOAL		CICSUSER
2014/06/20 16:08:21	TESTWLM4	WLMSPEC		CICSUSER
2014/06/20 16:08:21	algorithmType GOAL	QUEUE		CICSUSER
2014/06/20 15:17:54	TESTWLM4	WLMSPEC		CICSUSER
2014/06/20 15:17:54	defaultAffinity N_A			CICSUSER
2014/06/20 15:17:54	name TESTWLM4			CICSUSER
2014/06/20 15:17:54	abendcrit 0			CICSUSER
2014/06/20 15:17:54	abendthresh 0			CICSUSER
