1.0 INTRODUCTION

The z/TPF Software Profiler is a performance measurement tool that
collects and analyzes data to help you understand the performance
characteristics of your z/TPF application and system software.

This package contains source files for the z/TPF Enterprise
Edition 1.1 Software Profiler.

2.0 COREQUISITES

z/TPF Enterprise Edition 1.1

3.0 UNPACKING

1) FTP the tar file to your Linux system. You can place the tar file
   in any directory as a holding location; for example, /tmp/ztpftar

   zTPF.SoftwareProfiler.source.tar.gz

2) Extract the code from the source tar file under the same root
   directory as the z/TPF source code. In the example that follows,
   /ztpf is used as the root directory name.

   cd /ztpf
   tar -xzf /tmp/ztpftar/zTPF.SoftwareProfiler.source.tar.gz

4.0 INSTALLING

For detailed installation instructions, see z/TPF System Generation.

5.0 NOTICES

IBM may not offer the products, services, or features discussed in this information in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service. IBM may have patents or pending patent applications covering subject matter described in this information. The furnishing of this information does not give you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing
IBM Corporation
