### **Request for Information**

- How do you search the IC?
  - Using the IC search? Google? Other?
- Do you generally find what you're searching for?
- Once you're in the IC, how do you generally use it?
  - Do you use the search facility?
  - Do you follow the navigation?
  - Do you go directly to the library information units?
- Do you find the Concepts, Tasks, and Reference navigation style useful?

_	_	

### **New Requirements**

- We encourage you to send us new requirements!
- Please submit through FITS or the TPFUG requirements process
  - We had the opportunity to include a couple informal customer requests with our z/TPF delivery, but all future requests will be managed through the requirements process
- Current requirements
  - Information center on Linux (FITS MR0224053252).

#### Trademarks

IBM and WebSphere are trademarks of International Business Machines Corporation in the United States, other countries, or both.

Eclipse is a trademark of Eclipse Foundation, Inc.

Microsoft, Windows, and the Windows logo are trademarks of Microsoft Corporation in the United States, other countries, or both.

Linux is a trademark of Linus Torvalds in the United States, other countries, or both.

Other company, product, or service names may be trademarks or service marks of others.

#### Notes

Performance is in Internal Throughput Rate (ITR) ratio based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput improvements equivalent to the performance ratios stated here.

All customer examples cited or described in this presentation are presented as illustrations of the manner in which some customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics will vary depending on individual customer configurations and conditions.

This publication was produced in the United States. IBM may not offer the products, services or features discussed in this document in other countries, and the information may be subject to change without notice. Consult your local IBM business contact for information on the product or services available in your area.

All statements regarding IBM's future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Information about non-IBM products is obtained from the manufacturers of those products or their published announcements. IBM has not tested those products and cannot confirm the performance, compatibility, or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

Prices subject to change without notice. Contact your IBM representative or Business Partner for the most current pricing in your geography.

This presentation and the claims outlined in it were reviewed for compliance with US law. Adaptations of these claims for use in other geographies must be reviewed by the local country counsel for compliance with local laws.
