Overview

- **Extending TPF Toolkit**
 - Menu Manager actions
 - TPFTool command line utility
- **TPF Toolkit API (Java-based)**
- **Demo**
- **Questions/Feedback**

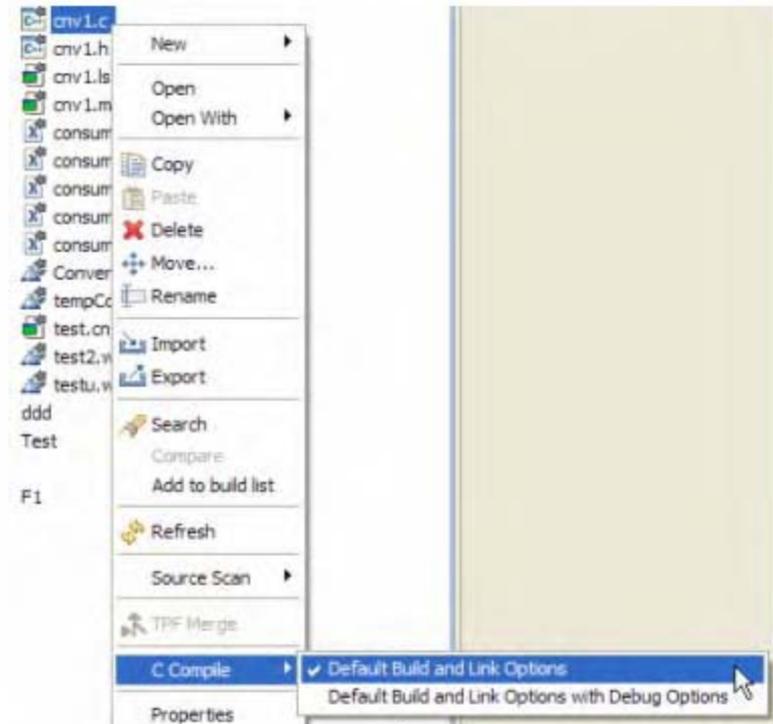

Menu Manager actions

- **Actions appear on the pop-up menu in the project navigator**
- **Local/Remote actions**
- **Use substitution variables to interact with TPF Toolkit**
 - &O returns compile options
 - &RN returns remote path

Menu Manager actions

- Substitution variables are resolved based on selection
- Action is run on the same remote system as the selection

```
Remote Console X
TPFR6011I - TPFMVSXA.POK.IBM.COM > c89 -c -o "/home/ankit/F9035/cnv1.o" -Wc,NOCSCT -Wc,NOEXPORTALL -Wc,LONGNAME
-Wc,STA -Wc,NOXREF -Wc,NOOFFSET -Wc,NOSHOWINC -Wc,NOEXPMAC -Wc,LIST > "/home/ankit/F9035/cnv1.lst"
-Wc,NOSOURCE -Wc,NOTEST -Wc,SEQ'(73,80)' -Wc,NODLL -Wc,RENT -Wc,NOAGGREGATE
-Wc,CHE'(NOAC, NOEN, NOEX, NOGE, NOGO, NOI, NOPAR, NOPOR, NOPPC, NOPPT, NOTRU)'
-Wc,EVENTS'(/home/ankit/e2e/build/cnv1.c.evt)'
/home/ankit/F9035/cnv1.c
```

Menu Manager actions

- **Problem**
 - There is no way to automate TPF Toolkit tasks like project creation, file downloads etc.
- **Solution**
 - Use TPFTool command line utility within Menu Manager actions.

TPFTool command line utility

- **Allows you to “drive” TPF Toolkit from the command line**
- **Services**
 - Create Project
 - Create RSE connections
 - Copy between 2 local/remote locations
 - Run remote commands
 - And many more!

TPFTool command line utility: Usage

Download a file from a remote system to the workstation

Inputs

- **Remote File to download**
- **Local destination folder**
- **User ID information for login**

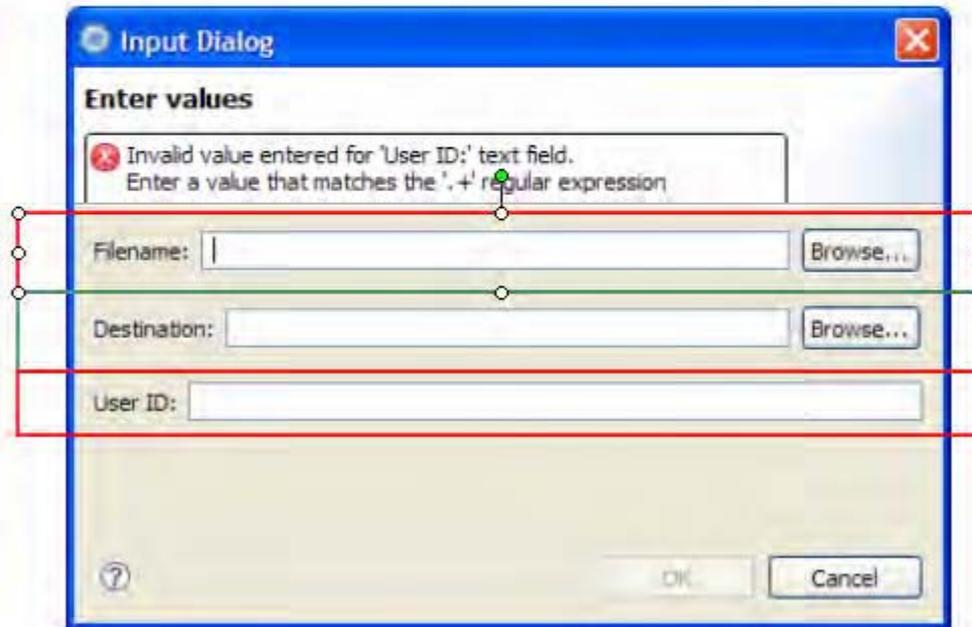

TPFTool command line utility: Usage

```
tpftool.bat -s Download
```

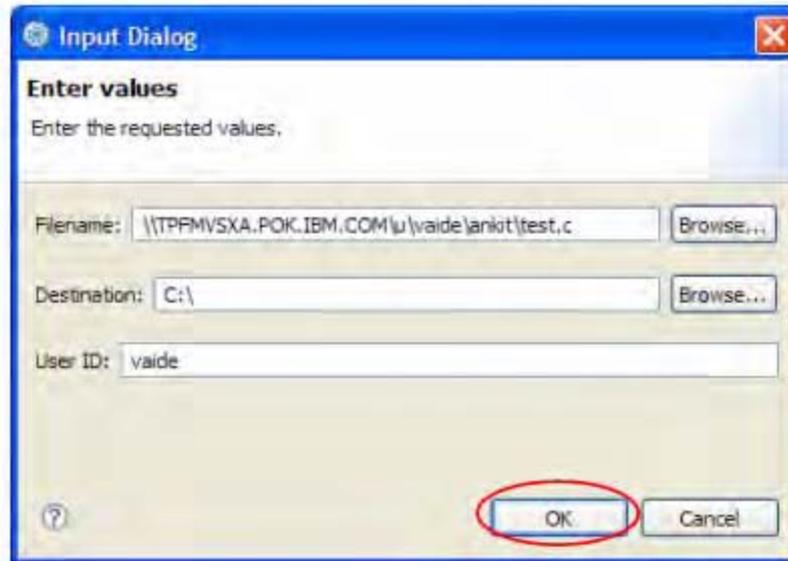

```
-i &PROMPT_BROWSE("Filename:", "remote", "files")
```

```
-d &PROMPT_BROWSE("Destination:", "local", "folders")
```

```
-u &PROMPT_TEXT("User ID:", "", ".+")
```

TPFTool command line utility: Usage

```
tpftool.bat -s Download  
-i \\TPFMVSXA.POK.IBM.COM\vaide\ankit\test.c  
-d C:\  
-u vaide
```

TPFTool command line utility

- **Problem**

- There is no way to interact with TPF Toolkit objects that are not selected.
- There is no way to query certain TPF Toolkit object properties
 - Last modified date for a file
 - Read-only attribute for a file

- **Example**

Download all files within the selected project from a remote system to the workstation that have been changed since yesterday.

This is not possible today!

TPF Toolkit API

Provides a set of Java utilities and interfaces that you can use to write plug-ins that interface with TPF Toolkit.

TPF Toolkit API

- **TPFUG Requirement**
 - V05006: Provide program to program interface
- **Allows TPFTool services to be run through Java**
 - Create Project
 - Create RSE connections
 - Copy between 2 local/remote locations
 - Run remote commands
 - etc.

TPF Toolkit API

- **Provides access to TPF Toolkit objects**
 - Get a list of selected projects
 - Work with filters within a project
 - Manipulate files or folders within a filter
 - Query file properties
 - Query target environment settings on projects and files
 - etc.

TPF Toolkit API : TPFCommonUtil

- S AddFilterString(ITPFToolkitFilter, ArrayList<String>, boolean, boolean)
- S AddFilterString(String, String, ArrayList<String>, boolean, boolean)
- S AddFilterString(String, String, String, ArrayList<String>, boolean, boolean)
- S AddTargetEnvToProject(ITPFToolkitProject, String, boolean)
- S AddTargetEnvToProject(String, String, boolean)
- S deleteBackLevelFeatures()
- S copyFolder(ITPFToolkitFolder, String, int, String)
- S copyFolder(String, String, int, String)
- S copyFile(ITPFToolkitFile, String, int, String)
- S copyFile(String, String, int, String)
- S createFile(String, ITPFToolkitFilter, boolean)
- S createFile(String, ITPFToolkitProject, String, boolean)
- S createFile(String, ITPFToolkitSubProject, String, boolean)
- S createFile(String, String, String, boolean)
- S createFile(String, String, String, String, boolean)
- S createFilterInProject(ITPFToolkitProject, String, String, boolean, boolean)
- S createFilterInSubProject(ITPFToolkitSubProject, String, String, boolean, boolean)
- S createFilter(String, String, String, boolean, boolean)
- S createFilter(String, String, String, String, boolean, boolean)
- S createFolder(String)
- S createFolder(String, ITPFToolkitFilter)
- S createFolder(String, ITPFToolkitSubProject, String)
- S createFolder(String, String, String)
- S createFolder(String, String, String, String)
- S createProject(String, String, String)
- S createRSE_zOSConnection(String, String)
- S createRSE_zOSConnection(String, String, int, String, String, int)
- S createRSE_zLinuxConnection(String, String)
- S createRSE_zLinuxConnection(String, String, int, String, String, int)
- S createRSE_TPFConnection(String, String)
- S internalCreateRSEConnection(String, String, int, String, String, int, String)
- S createSubProject(ITPFToolkitProject, String, String)
- S createSubProject(String, String, String)
- S deleteProject(ITPFToolkitProject)
- S deleteProject(String)
- S deleteSubProject(ITPFToolkitSubProject)

- S importActionFile(String, int, boolean)
- S importRemoteCTemplate(String, boolean)
- S importAllTargetEnv(String, boolean, boolean)
- S importTargetEnv(String, String, boolean, boolean)
- S submitJCL(String, String)
- S writeToRemoteConsole(String)
- S writeToRemoteConsole(String, boolean)
- S modifyAIRSEConnectionServerPath(String, String)
- S modifyAIRSEConnectionServerLauncherType(String, int, String, String, int)
- S modifyRSEConnectionServerLauncherType(String, int, String, String, int)
- S internalModifyRSEConnectionServerLauncherType(String, int, String, String, int, boolean)
- S modifyRSEConnectionName(String, String)
- S modifyRSEConnectionNameForHost(String, String)
- S openFileInEditor(ITPFToolkitFile)
- S openFileInEditor(String)
- S queryFilterStringsForProject(ITPFToolkitProject, boolean)
- S queryFilterStringsForProject(String, boolean)
- S queryFilterStringForSubProject(ITPFToolkitSubProject)
- S queryFilterStringForSubProject(String, String)
- S listTargetEnvironments()
- S listTargetEnvironments(int)
- S listOptionSets(String, int)
- S listOptionSets(int, int)
- S listOptionSets(String, int, int)
- S internalListOptionSets(String, int, int)
- S queryTPFToolkitVersion()
- S queryVariable(String)
- S queryProjectVariable(String, ITPFToolkitProject)
- S queryProjectVariable(String, String)
- S querySubProjectVariable(String, ITPFToolkitSubProject)
- S querySubProjectVariable(String, String, String)
- S queryFileVariable(String, ITPFToolkitFile)
- S queryFileVariable(String, String, String, String, String)
- S queryTargetEnvVariable(String, String)
- S internalQueryVariable(String, String, String, String, String, String)
- S refreshAllProjects()

TPF Toolkit API : ResourceUtil

- S getSelectedTPFToolkitResources()
- S getTPFToolkitProject(String)
- S getTPFToolkitSubProject(String, String)
- S getTPFToolkitFilter(String, String, String)
- S getTPFToolkitFolder(String, String, String, String, boolean)
- S getTPFToolkitFolder(String, String, String, String)
- S getTPFToolkitFile(String, String, String, String, boolean)
- S getTPFToolkitFile(String, String, String, String)

TPF Toolkit API : Example

For a project called “Demo”, print the current target environment name to the remote console.

```
ITPFToolkitProject project = ResourceUtil.getTPFToolkitProject("Demo");  
String targetEnvName = project.getCurrentTargetEnvironment();  
TPFCommonUtil.writeToRemoteConsole(targetEnvName, false);
```

Demo

- **2 popup menu actions**
 - Check out
 - Prompt the user for a project name and check out location
 - Load files from a repository to the checkout location
 - Create a TPF project pointing to the check out location
 - Check in
 - Queries if the file has changed since check out.
 - Check in changed file into the repository.
 - Deletes the file from the project.

Additional information

- **Creating a plugin**
 - Developing in the IDE > PDE Guide > Getting Started
- **Contributing to TPF Toolkit using Menu Manager**
 - Installing, migrating, and configuring > Configuring > Creating custom pop-up menus > Menu Manager extension point
- **TPF Toolkit API help**
 - Reference > APIs > TPF Toolkit API

Questions

Trademarks

- **IBM is a trademark of International Business Machines Corporation in the United States, other countries, or both.**
- **Java and all Java-based trademarks and logos are trademarks of Sun Microsystems, Inc. in the United States, other countries, or both.**
- **Other company, product, or service names may be trademarks or service marks of others.**
- **Notes**
- **Performance is in Internal Throughput Rate (ITR) ratio based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput improvements equivalent to the performance ratios stated here.**
- **All customer examples cited or described in this presentation are presented as illustrations of the manner in which some customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics will vary depending on individual customer configurations and conditions.**
- **This publication was produced in the United States. IBM may not offer the products, services or features discussed in this document in other countries, and the information may be subject to change without notice. Consult your local IBM business contact for information on the product or services available in your area.**
- **All statements regarding IBM's future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.**
- **Information about non-IBM products is obtained from the manufacturers of those products or their published announcements. IBM has not tested those products and cannot confirm the performance, compatibility, or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.**
- **Prices subject to change without notice. Contact your IBM representative or Business Partner for the most current pricing in your geography.**
- **This presentation and the claims outlined in it were reviewed for compliance with US law. Adaptations of these claims for use in other geographies must be reviewed by the local country counsel for compliance with local laws.**
