After signing in with your IBM ID, options are provided to download using Download Director or HTTP. Choose your preferred method to download and save the image to the server. In the screen capture displayed on this slide, DB2 for Windows version 9.7 fix pack 8 is shown.

Fix pack installation

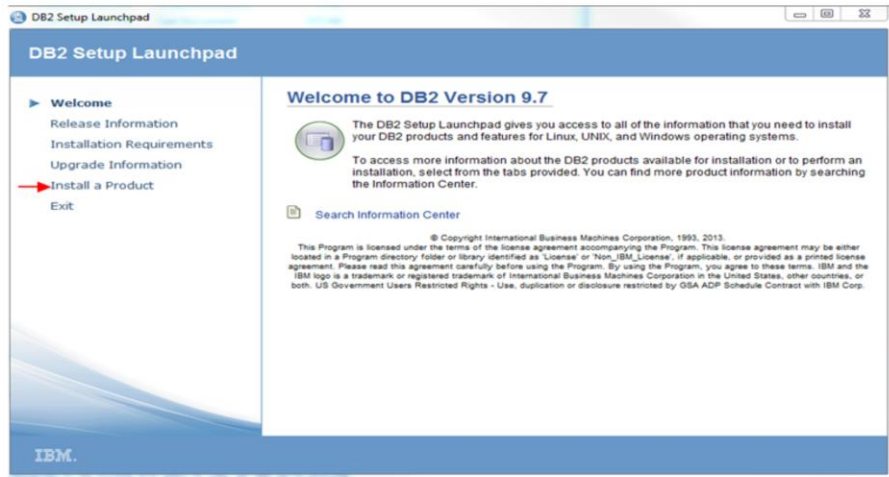

7

Fix pack upgrade installation

© 2013 IBM Corporation

Once the fix pack is downloaded, extract the image to any valid directory locally on the Windows server. The extracted image has the setup.exe file. Double click setup.exe to launch the launchpad.

DB2 fix pack installation (1 of 7)

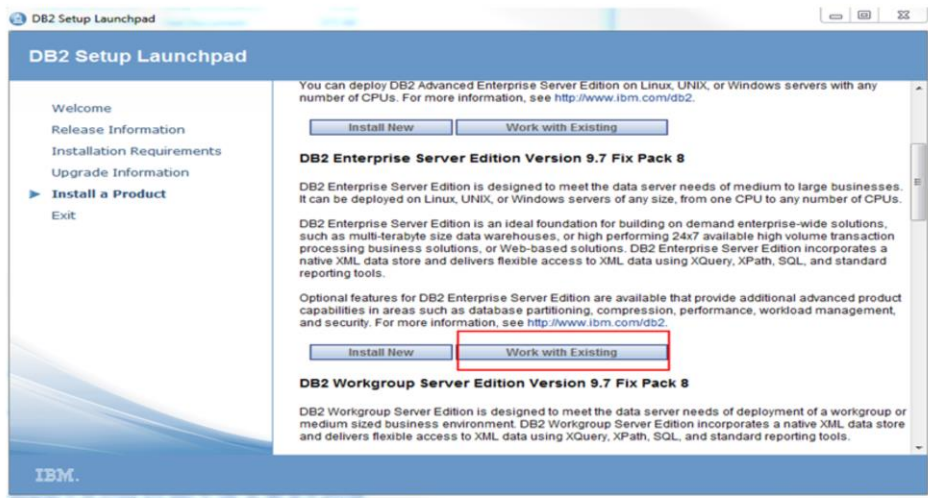

8

Fix pack upgrade installation

© 2013 IBM Corporation

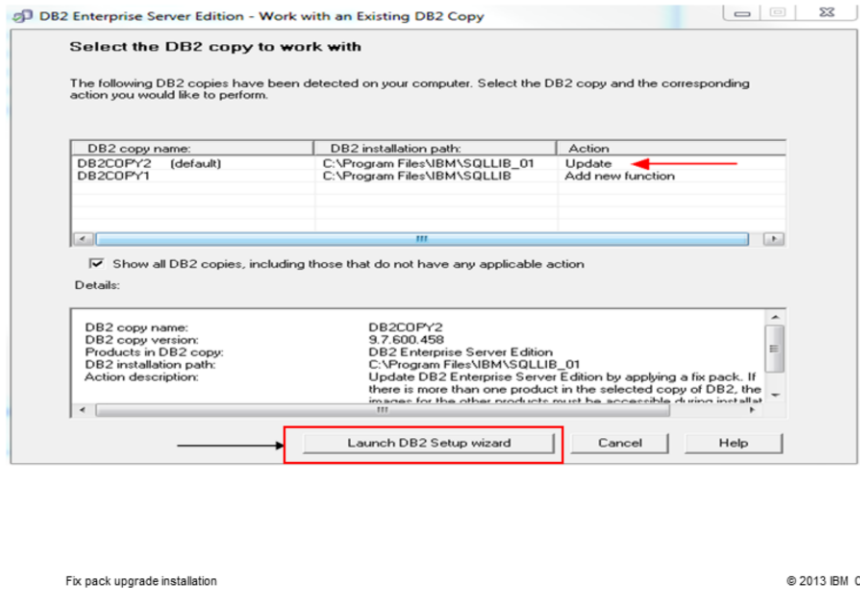

Invoking setup.exe brings up the fix pack installation wizard. Click “Install a Product” on the left panel.

DB2 fix pack installation (2 of 7)

In the setup wizard, choose the DB2 Edition of your existing installation. Choose the “Work With Existing” button.

DB2 fix pack installation (3 of 7)

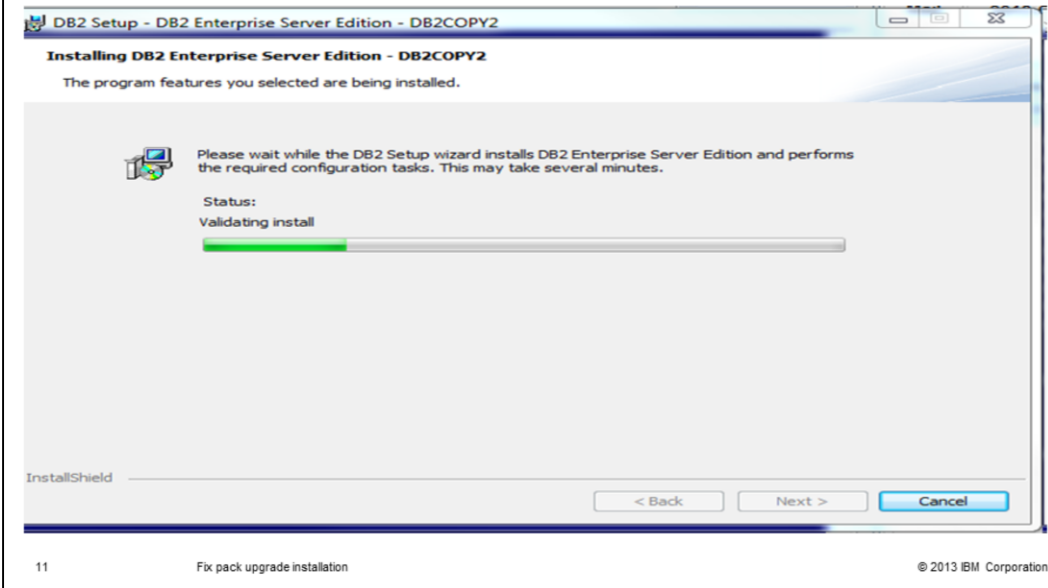

The next screen shows all the DB2 copies installed and the copies that are eligible to update.

The DB2 copy of the same version that is eligible to apply a fix pack will show with the option to UPDATE. For example, DB2COPY2 is DB2 version 9.7 fix pack 7 and it is eligible to apply fix pack 8 to it.

If other copies are on lower DB2 versions, for example version 9.5, they have the option to upgrade.

Choose the copy that you want to update and click "Launch DB2 Setup wizard".

DB2 fix pack installation (4 of 7)

The installation of a fix pack typically takes five to ten minutes to complete.

DB2 fix pack installation (5 of 7)

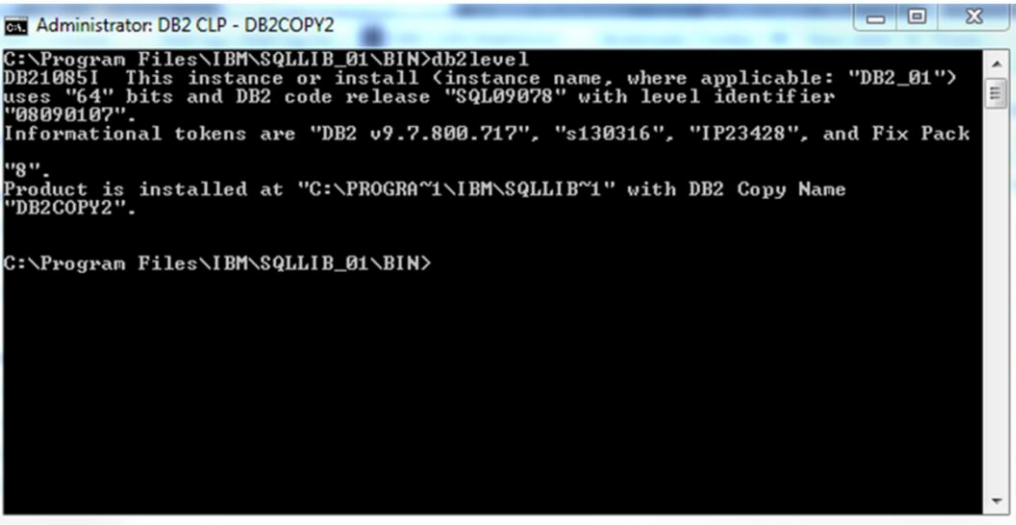

The installation completes with a success message screen at the end.

DB2 fix pack installation (6 of 7)

You can optionally install the IBM Database Add-Ins for Visual studio by clicking the Install button. If it is not required, click Finish to complete the installation.

DB2 fix pack installation (7 of 7)

```
Administrator: DB2 CLP - DB2COPY2
C:\Program Files\IBM\SQLLIB_01\BIN>db2level
DB21085I  This instance or install <instance name, where applicable: "DB2_01">
uses "64" bits and DB2 code release "SQL09078" with level identifier
"08090107".
Informational tokens are "DB2 v9.7.800.717", "s130316", "IP23428", and Fix Pack
"8".
Product is installed at "C:\PROGRAM FILES\IBM\SQLLIB_01\BIN" with DB2 Copy Name
"DB2COPY2".

C:\Program Files\IBM\SQLLIB_01\BIN>
```

Once the installation is complete, db2level output will show the new fix pack version.

Fix pack upgrade installation

- Restrictions
 - Upgrade to same DB2 product at higher fix pack level
 - Cannot modify DB2 components during fix pack installation

There are a few restrictions when doing a fix pack upgrade installation. You are only allowed to upgrade to the same DB2 product at a higher fix pack level, hence, you cannot install a different DB2 product at a higher fix pack level into that copy. Also, you can not add or remove DB2 components in a fix pack upgrade installation. Only the files in the existing components are updated in the fix pack installation.
