	To change this program or remove it from your compute	er, click Change or Remove.	Change	Remove
Set Program	BB2 Enterprise Server Edition - db2v97fp7_ese		Size	752.00MB
Access and Defaults	B DB2 Express-C - DB2COPY5		Size	504.00MB
Deridura	DCF Kickstart Multiplatform			
	Debugging Tools for Windows (x86)		Size	41.67MB
	Distributed CallCenter		Size	1.46MB
	Epson Easy Photo Print 2		Size	82.02MB
	EPSON NX 100 Series Printer Uninstall			
	EPSON Scan		Size	24.49MB

To add or remove DB2 components, or repair corrupted or missing files, launch the DB2 setup wizard from the installation image of the same DB2 product, at the same release level or, launch from Add/Remove Programs wizard in the Windows Control Panel. This is a benefit of using Windows Installer as the installation engine. You need not uninstall the DB2 product and then install it again in order to add some new components, or remove some components you installed earlier.

In the example displayed on this slide, it is being launched from the Windows control panel. Choose the DB2 copy you want to modify and click Change.

The DB2 Setup wizard opens once you click CHANGE in Add/Remove programs. Click Next to continue.

🛃 DB2 Setup - DB	2 Enterprise Server Edition - DB2COPY1	
Program Mainter		
Modify, repair, or	remove the program.	
Modify		
	Change which program features are installed. This option displays the Custom Selection dialog in which you can change the way features are installed.	
O Repair		
F	Repair installation errors in the program. This option fixes missing or corrupt files, shortcuts, and registry entries.

3	Remove DB2 Enterprise Server Edition - DB2COPY1 from your computer.	
InstallShield		
	< Back Next >	Cancel

In the next panel, there are three options to choose from. The first one is the MODIFY option. This option is to change the program features already installed or to add new features to the existing DB2 installation.

The second option is to REPAIR the existing DB2 installation. This option refreshes the current DB2 installation by fixing any missing files or corrupted files.

The third option is to Remove or uninstall the current DB2 installation.
