

This presentation will describe the steps to install the Rational® Developer for Power Systems Software™ product on your machine.

If you do not already have the product, you can visit the website listed in order to download the trial version of the product. The trial version comes with 60-day trial licenses. Once the product is downloaded, you will need to extract the file in order to continue with the next step.

With the product unzipped, you start the launchpad.exe if you are using Windows or the launchpad.sh if you are using Linux. You must be an administrator or root to start the launchpad.

On the launchpad, you can click the links to view the readme and the installation guide. The installation guide describes the prerequisites of the product. When you are ready, click the link for installing the product.

•	< Back Next >	Install Cancel

The product license will be shown. You will need to accept the terms in order to continue with the installation. Click Next to continue.

If this is the first installation of a product, you will need to specify the Shared Resources Directory. For best results, select the drive with the most available space because it must have adequate space for the shared resources of future packages. If Installation Manager is being installed, you will need to specify the Installation Manager directory. If this is not the first installation of a product, and if Installation Manager is already installed, this panel is not displayed. Click Next to continue.
