

This presentation will describe the steps to activate the licenses for the Rational Developer for Power Systems Software product on your machine.

	IBM
Client License Activation	
 Rational Developer for Power Systems Software includes four separate – RPG and COBOL Development Tools for i – C and C++ Development Tools for AIX 	ely licensed features:
 C and C++ Development Tools for Linux COBOL Development Tools for AIX 	
 Passport Advantage clients can purchase authorized user or floating us four features. 	er licenses for the
 Activation kits are downloaded from the Rational License Key Center 	er
 IBM i clients who use eConfig/AAS can purchase authorized user licens Activation kits can be downloaded from Entitled Software Support (E the activation kit CD with the physical product media 	ses. ESS) site or receive
 By default, a 60-day trial license for each installed licensed feature is en install the product. 	nabled when you first
- Oministaning and reinstaning does not reset ou-day period	
2 Client License Activation	© 2011 IBM Corporation

The product has 4 separately licensed features. You can purchase licenses for any of the 4 features. In Passport Advantage, authorized user and floating user licenses are available. IBM i client who use eConfig/AAS can purchase authorized user licenses. By default, a 60-day trial license for each installed feature is enabled when you first install the product.

	IBM.			
	Client License Activation			2011 IBM Corporat

IBM Installation Manager is used to activate the feature licenses. You can use the Manage Licenses wizard to specify the information to activate a license.

The product provides a Manage Licenses toolbar button if you have trial licenses. Also, a dialog is shown when the product starts if you have trial licenses which has a Manage Licenses button.

🕐 Manage Licenses

For floating user licenses, there needs to be a Rational License Server installed in your company and the purchased floating user licenses from the Rational License Key Center need to be imported into the Rational License Server. The Rational License Server is included in the product on a separate CD. Once the server is installed and the floating user licenses have been imported into it, you can then activate floating user licenses for the product's features from individual machines. To activate a floating user license, you need to define the Rational License Server to use. Click the green plus sign button to show a dialog where you can specify the hostname of the Rational License Server installed in your company. With the server defined, click Next.
