

# BART Takes the 15 Day Fast Track to Mobile Development

Bay Area Rapid Transit (BART) uses their Maintenance and Reliability Information System (MARIS) to conduct preventive maintenance on the train cars on all their tracks.

To register for the 30-day free trial, visit [bluemix.net](http://bluemix.net)

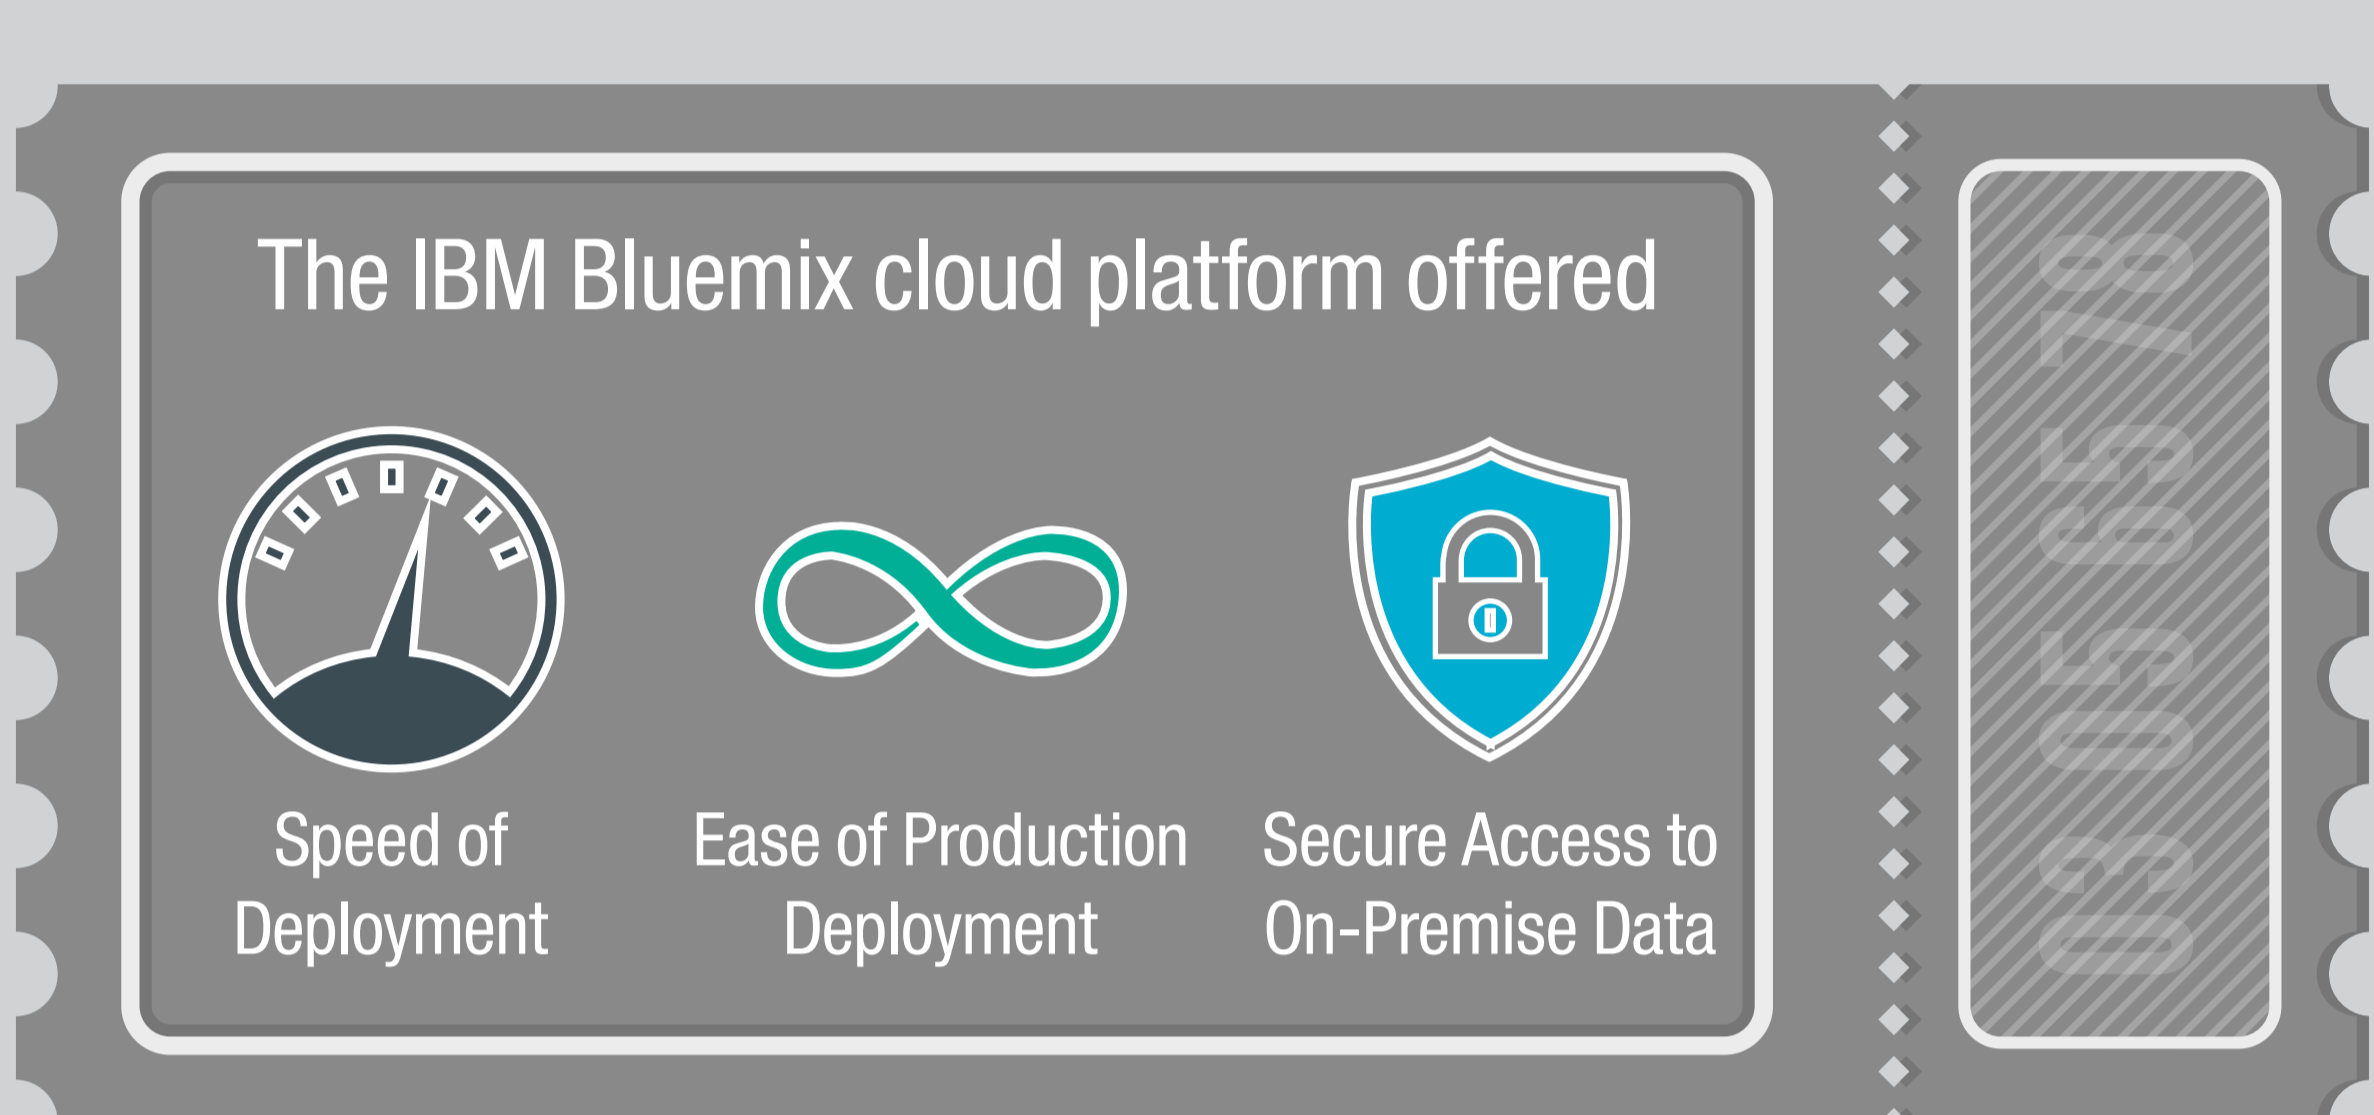

This is no small feat -  
BART operates **5 lines** on **104 miles** of track with **44 stations** in **4 counties**

One thing could derail the whole operation:

A pilot MARIS mobile app was just the ticket

The IBM Bluemix cloud platform offered

- Speed of Deployment
- Ease of Production Deployment
- Secure Access to On-Premise Data

With IBM Bluemix, BART began to pick up steam

In only **fifteen days** they...

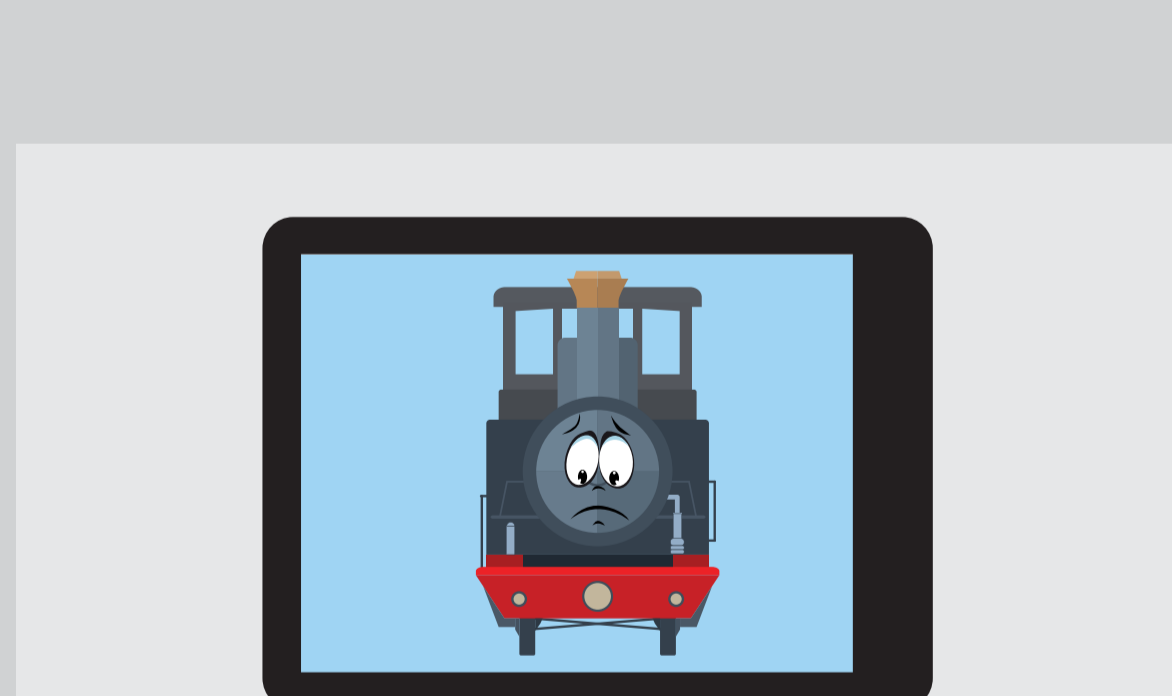

- Rolled out extensions to the database
- Developed a new mobile app pilot
- Designed new features

In the past, such a task would have taken **six months**

With Bluemix: 15 Days

Without Bluemix: 180 Days

Now, when MARIS is updated, the changes are pushed to the mobile app in seconds.

Managers in the field can plan and deploy in real-time

Maintenance can respond faster than before, providing better customer service.

With IBM's cloud platform, extending MARIS hardly takes any time at all.
