

# Cars.com Accelerates Software Releases from 40 to 300 a Year

with Agile Methods Supported by IBM Rational Solutions

Cars.com's development processes needed turbo-charging to:

Streamline planning and reduce project backlogs

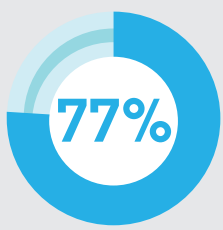

Automate manual steps to reduce errors

Release new innovations to market faster

Now they're in the fast lane with IBM Rational applications.

**less time** for releases and builds!

**650%** more new products per year!

Under **two weeks** to create software environments!

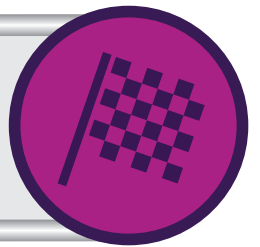

With the help of IBM Business Partner Ascendant Technology, Cars.com shifted gears to more agile software delivery.

**IBM® Rational® Build Forge**  
**IBM Rational Automation Framework**

- ▶ Easy integration with existing applications.
- ▶ Releases quickly pushed to testing and production environments.
- ▶ Automation of all manual test cases.
- ▶ Leveraged DevOps capabilities for continuous delivery, speeding innovations to market.

Cars.com is going full speed all the way to the finish line!
