

## WebSphere Business Integration QA Review Service

### Highlights

- **Are you getting the most out of your IBM WebSphere Business Integration Software? Team with IBM technical consultants to find out!**
- **Leverage the deep technical skills and best practice experience of IBM Software Services for WebSphere consultants to identify potential opportunities and risks of your WebSphere InterChange Server software implementation**

### Your Business Challenge

- *You need to maximize the benefits of your WebSphere InterChange Server software implementation and want to ensure it is meeting all of your business requirements*
- *You want to enhance and improve the overall quality of your current WebSphere InterChange Server software implementation projects by building in a review mechanism*
- *You want to prevent early missteps from spiraling out of control*

### Services Solution

IBM WebSphere Business Integration QA Review Service will enable you to realize your BI Software's full potential. We realize that your business problems cannot be solved with a one-size-fits-all approach.

That's why IBM WebSphere Business Integration QA Review Service adapts to your business' specialized needs—we provide unique solutions to unique problems!

To customize our solution to your business' needs, we offer several types of reviews which reflect key milestones during an implementation:

Scoping Process Review:

- *To ensure that your project's framework is in place*

Design Review:

- *To intercept any flaws in design before a significant amount of effort has been invested*

Development (Configuration) Review:

- *To validate that the implementation has the functionality as originally intended*

Cutover Review:

- *To evaluate project management elements, ensuring that all support staff is prepared to inherit the interface*

Post-Implementation Review:

- *Ensures that those inevitable wrinkles of going live are ironed out—and lessons learned are profited from*

### **Benefits**

Above all, this service offering is an excellent exercise to ensure that the project team is following proven implementation best practices. In turn, this is key to reducing risk by identifying exposures as early as possible. You will also gain added confidence in your WebSphere InterChange Server software implementation—you can be sure you are getting the most out of what you have!

### **Typical Activities**

Over the course of the IBM WebSphere Business Integration QA Review Service, our consultants interview key project team members and stakeholders, review project documentation and code, and analyze response times and performance statistics.

### **Solution Outline**

The IBM Business Integration QA Review Service begins with establishing the scope and parameters by defining the engagement. Next, fieldwork is performed in order to gather data on the project performance to date. The collected data is then analyzed and evaluated. Finally, findings are summarized and recommendations are provided regarding open issues.

### **Deliverables**

You receive a completed QA Checklist and a set of Recommendations—the content of both of these varies based on the type of QA Review.

### **Your Requirements**

To reap the rewards of this service, you will need to make personnel, documentation, and systems available for the QA Reviewer. Engaging in an open-minded, frank exchange in the spirit of exploration will further help you to take full advantage of the review.
