Agenda

- 9.30 IBM System z, the right platform Gianfranco Previtera
- 9.50 The smarter planet and System z Alan Fellwock & Fabio Riva
- 10.30 Smart work on System z Avijit Chatterje
- 11.10 Coffee Break
- 11.30 Handling the information explosion to make smarter decisions

 Avijit Chatterjee
- 12.30 Dynamic infrastructure with System z Alan Fellwock
- 13.10 Buffet Lunch
- 14.10 Enterprise systems management Jeff Miller
- 14 50 The rule of three Alan Fellwock
- 15.30 The Smart Platform & The IBM System z Strategy
 Avijit Chatterjee & Mario P. Santos
- 16.30 Chiusura della giornata

IBM System z
The right platform, now and for the future

Gianfranco Previtera, VP Strategic Initiatives, IBM Italy

IBM System z: per un pianeta più intelligente

Smarter planet: Thinking and acting in new ways to make our systems more efficient, productive and responsive.

"Our resources are limited"

I need efficiency

"Data is exploding and it's in silos"

I need Insight

New Intelligence

"My infrastructure is inflexible and costly"

I need to respond quickly

"New business & process demands"

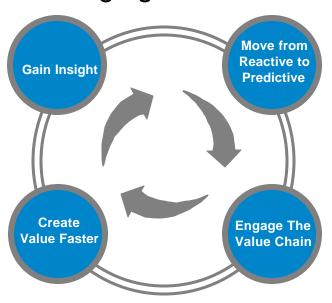

I need to work smart

New Intelligence:

Leveraging the Business Value of Mainframe Information

- Delivering an information led transformation:
 - Build an information agenda around centralized secure Data serving
 - Comprehensive business intelligence suite
 - Flexible information management platform

SMART IS: Improving patient experience

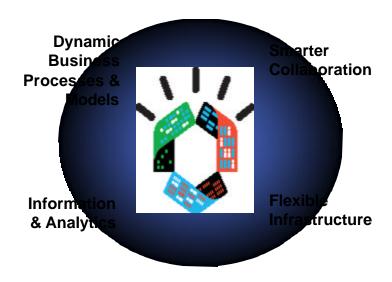

Aurora Health Care:

System z as the strategic platform for SOA hub extract data from approximately 1000 systems drive greater internal process efficiency, collaboration without the cost of rip and replace

Smart Work:

A dynamic business model powered by System z

- Delivering a foundation to enable smarter work:
 - The ability to identify, capture and react on events
 - Comprehensive business analytics
 - Adaptive and agile infrastructure
 - A central focal point for integrated solutions

SMART IS: Transforming integrated systems to integrated services

NYS Department of Taxation and Finance:

Deployed an SOA solution that leveraged existing assets

Delivers faster execution

Easily adaptable and fast to implement

Open to new technologies

Green and Beyond:

Innovative technology for a green infrastructure

Lower costs while overcoming operational barriers.

Strengthen reputations while meeting regulations.

Create products and services that give rise to new markets.

- System z can help deliver these benefits through:
 - Large scale consolidation to create Green Infrastructures
 - Investment protection and resiliency for sustainable solutions
 - Leadership in smart technologies to deliver intelligent systems

SMART IS: Consolidating hundreds of servers

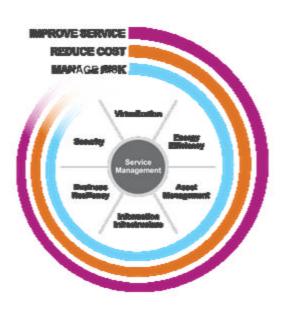

Bank of New Zealand:

Reducing its footprint by 30 percent Reduces power consumption by nearly 40 percent Reduces carbon dioxide emissions by 39 percent. Anticipated 20% ROI over the life of the platform

Dynamic Infrastructure:

Addressing today's challenges and tomorrow's opportunities

System z can help deliver systems for a smarter planet:

- Leadership in workload optimized technology
- industry's leadership capabilities for management,
 audit, automation and control across the enterprise
- flexible delivery choices for client workloads to match their unique business requirements

he result: lower cost, lower risk and improved service

SMART IS: Keeping up with growth while keeping markets on firm ground

Depository Trust and Clearing Corporation:

77% increase in transaction processing capacity handling 3x the highest volume ever recorded 100% rate of reliability the lowest cost per transaction in the world

Many clients are reducing cost with System z today by consolidating existing workloads

Why are clients consolidating to System z?

Real customers. Real workloads.

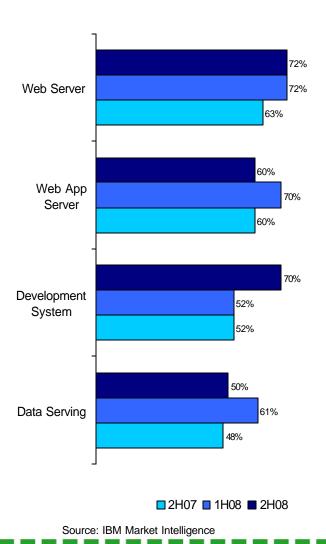

| Customer | Distributed Cores | IBM System z Cores | Ratio of Distributed to System z cores* |
|----------------------|----------------------|-----------------------|---|
| Nationwide | 450 | 21 IFLs on z9 | 21 to 1 |
| Large bank | 111 | 4 IFLs on z10 | 27 to 1 |
| Government Agency | 292 | 5 IFLs on z10 | 58 to 1 |

- Unique value of System z Virtualization
- Extremely efficient
- Superior availability and security

Source: zCPO

^{*} Client results will vary based on each specific customer environment including types of workloads, utilization levels, target consolidation hardware, and other implementation requirements.

What are clients consolidating to System z?

Surveys indicate IBM System z[®] customers use Linux for:

- Web Serving
- Web Application Serving
- Data Services
- Systems Development

"Best Fit" Workloads for Linux on System z:

- Business connectors: WebSphere® MQSeries®, DB2® Connect, CICS® Transaction Gateway, IMS™ Connect for Java®
- Business critical applications: e.g. SAP
- Development of WebSphere and Java[™] applications
- WebSphere Application Server (WAS)
- Email & collaboration: Domino[™], Web 2.0
- Network Infrastructure: FTP, NFS, DNS, etc. and Comm Server and Communications Controller for Linux, CommuniGate Pro (VoIP)
- Data services: Cognos®, Oracle, Informix®, Information Builders WebFOCUS
- Applications requiring top end disaster recovery model
- Virtualization and Security Services

Many clients are also choosing System z for deploying new applications

System z Solution Editions:

Unmatched value, competitive cost

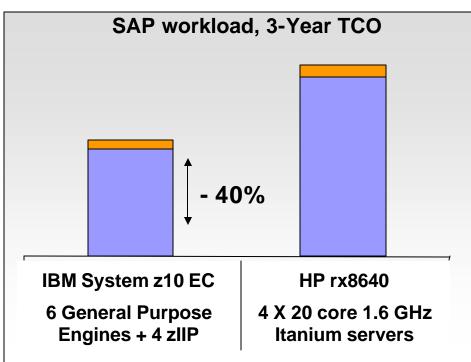

- Building on the popularity of the Solution Edition for SAP
- Special package pricing for our most popular solutions
 - z10 HW (standalone footprint or isolated LPAR)
 - Prepaid HW maintenance
 - Comprehensive middleware stack (including S&S)
 - Services and Storage (as needed)
- Competitive acquisition prices, leadership TCO

Competitive cost, plus the legendary value of the mainframe

System z Solution Edition for SAP

Save 40% when compared to HP with the System z Solution Edition for SAP

• Lower cost of ownership, plus:

- Unmatched resiliency for mission critical applications
- Industry leadership in large scale secure data serving
- Huge scalability and low cost for future growth
- Centralized management and automation to deliver better control and efficiency

Smart is: Reducing cost within one year.

Prices are in USD. Prices may vary in other countries.

Data is based on real client opportunity and on internal standardized costing tools and methodologies.

GKD-EL:

Migrated SAP solutions to a z10 EC Improved their SAP System throughput by 70% Cut their costs by 30%

Client results will vary by types of workloads, technology level of consolidated servers, utilization factor, and other implementation requirements. Savings will vary by client.

And what of the future...
