How to use the IBM Sizing and Planning Questionnaire for SAP Solutions

What changed?

So far the Sizing Questionnaire was a static document containing all possibilities of a SAP Solution Sizing. All documents for all components were included. The now macro based Questionnaire represents a new way of customizing the document to fit customers needs. Only the needed components and according pages are included.

How to use?

1. Download the Questionnaire zip file and decompress the content in a directory of your choice.
2. Open the document, !Sizing Creator.doc.
3. Dependent on your security settings there will be a question if you want to enable or disable macros. Please click on enable.
4. After the document has opened, a macro will be started automatically.
5. Now you can choose which documents shall be included by clicking the checkboxes.
6. If you need help for the Questionnaire you can include a help document for every component.
7. After you finished your selection click on Create Questionnaire to start the compilation.
8. During compilation your screen might flicker a bit. After approximately 15 seconds your Questionnaire should be complete.
9. Don't forget to save it!

Any Problems?

If the Macro doesn't start, please check you security settings for macros. (Tools/Options/Security/Macro Security) and set the Security Level on medium.

If you have general problems with the new questionnaire you can download a complete questionnaire as a MS Word File (Requirements: Word 2000).
