New Enterprise Data Center Leadership Centers

The *New Enterprise Data Center* is an evolutionary new model for efficient IT delivery focused on:

- *Consolidation and Virtualization*
- *Energy Efficiency*
- *Business Resiliency and Security*
- *Service Management*
- *Information Infrastructure*

Leadership Centers

The IBM **New Enterprise Data Center Leadership Centers** offer a variety of workshops and programs to get you started NOW. Offerings can be customized to meet a specific client's needs and will provide clients with a clear and definitive bridge between their New Enterprise Data Center vision and an action plan.

The Leadership Centers combine the vast skills of over 500 of IBM's technical professionals together with a physical infrastructure investment of greater than $300M. To help clients validate their planned solution and create detailed implementation action plans, the New Enterprise Data Center Leadership Centers can provide:

- architecture and solutions design consulting support
- in-depth product knowledge
- education and skills transfer
- proof of concepts, demonstrations and benchmarks
