R05 New User Camp (XTR01)
      by Gary Lehnus/CertifyU

This course is the entry course for all xSeries Technical Education Roadmaps (Certification, Clustering, Systems Management, etc.). Students will gain a thorough understanding of the design, architectures, features, and functions of IBM eServer xSeries servers. Topics include a discussion of key server types, functions, and operational characteristics, basic networking terminology and components, IBM X-Architecture and Enterprise X-Architecture, IBM Director, Hardware Manageability Tools, Deployment Tools and Configuration Tools. In addition, students will participate in hands on labs covering System Configuration, ServeRaid Mini-Configuration, ServerGuide Setup and Installation, ServeRaid Driver Update, Backing Up a RAID Configuration, ServeRaid Manager, Server Selection, and the Remote Supervisor Adapter.
(2 day session)
