

**R11 xSeries Technology Trends and Roadmap
by Mike Gibson and Tom Boucher**

This session is designed to bring you up to speed on the xSeries Value Proposition and then dive into all the latest in the xSeries Server, IntelliStation Workstation and BladeCenter Portfolios. In particular, we'll take a deep look into the world of 64-bit technologies, from AMD Opteron and Intel Itanium2 to the new Intel EM64T Technologies. This session is a technical marketing overview of the products and technologies we'll see in 2H04 and into 2005.
