

**TOC****INDEX****VIEW****S01 CDAT (Consolidation Discovery and Analysis Tool) Version 3.1  
by Thomas Vezina and Barry Krasner**

In depth technical session including demo of latest version of the CDAT Server Discovery Tool. Tool can collect server and utilization data from Wintel, Netware, and now AIX servers (with other Unix variants available 2H04) for Server Consolidation studies. This agentless tool collects 75% of the data needed to make a SCON recommendation. Session will demonstrate 'AutoDiscovery', discovery by IP or Server Name, Data Collection Wizard, Enterprise Data Collector, and will include a review of collected spreadsheet data. xSeries 'eXpresSCON' process, of which CDAT is a key component, will also be reviewed.
