

TOC**INDEX****VIEW****V09 The Altiris Deployment Solution****by Brian Higbee and Rick Gines, Altiris**

Altiris Deployment Solution is now IBM ServerProven! This session will consist of a solution overview, best practices, and methodologies for deploying and provisioning IBM Bladecenterservers and xSerieservers using Altiris Deployment Solution and the IBM Server Guide Toolkit Integration. This management tool allows for automated bare-metal server provisioning, automated OS deployment, desired-state management, change and configuration management, and rip-and-replace re-provisioning of blade servers. The Altiris toolset allows IBM customers, IT administrators, and Service Providers alike to leverage a single console to manage Windows or Linux based servers in diverse hardware and software environments.
