

Operating environments supported on the pSeries POWER4 systems.

There are multiple pSeries systems that have the POWER4 processors in them and the operating systems that they support vary between the machine types and which mode the system is going to be configured in. The following details the supported environments:

<i>Model</i>	<i>Mode</i>	<i>Operating Systems Supported</i>
7040-681 (p690)	SMP	AIX5.1, AIX5.2
7040-681 (p690)	LPAR	AIX5.1, AIX5.2, SuSE Linux
7040-671 (p670)	SMP	AIX5.1, AIX5.2
7040-671 (p670)	LPAR	AIX5.1, AIX5.2, SuSE Linux
7039-651 (p655)	SMP	AIX5.1
7039-651 (p655)	LPAR	AIX5.1
7038-6M2 (p650)	SMP	AIX5.1, AIX5.2
7038-6M2 (p650)	LPAR	AIX5.1, AIX5.2, Linux (2Q/03)
7028-6C4 (p630)	SMP	AIX5.2
7028-6E4 (p630)	LPAR	AIX5.2, Linux offering

Note:

- 1 - For dlpar and CuOD, the systems have to be at AIX 5.2 and October 2002 firmware and HMC code.
- 2 - There is no dlpar and CuOD support for the Linux operating environment.
- 3 - Visit <http://www-1.ibm.com/servers/eserver/pseries/linux/> for additional information on the Linux environment.
