

We've got LAN to host **reliability**
covered at both ends

Many of the users on your LAN need access to applications and data that are on your IBM AS/400 system. The AS/400 gateway solution you choose needs to enhance the integration of IBM AS/400s into your Novell® NetWare® networks to ensure reliable and easy access to the AS/400 and its information.

NetWare for SAA:AS/400 Edition is a set of NetWare Loadable Modules (NLM™s) that execute on a Novell IntranetWare 4.11 server; a NetWare 3.12, 4.1, or 4.11 server; or on an IBM AS/400 Integrated PC Server (IPCS).

NetWare for SAA:AS/400 Edition is a member of the family of NetWare for SAA products which is jointly developed and supported by Novell and IBM.

NetWare for SAA:AS/400 Edition provides complete access to IBM AS/400 data, applications and services and supports 5250 terminal emulator, AS/400 Client Access and PC Support applications such as shared folders and virtual print. DOS and Windows workstations connect to NetWare for SAA:AS/400 Edition servers using IPX/SPX™ or TCP/IP over any NetWare supported LAN topology.

LAN-BASED NETWORK MANAGEMENT

NetWare for SAA:AS/400 Edition is fully integrated with NetWare administration, security and management. It is designed for configurations ranging from five to 200 users. Administration is easy—existing NetWare users, groups and other bindery and Novell Directory Services™ (NDS™) objects can be assigned to AS/400 communication resources.

**NetWare® for SAA®
AS/400 EDITION**

Novell.

NetWare for SAA:AS/400 Edition includes the NetWare for SAA Services Manager (SSM) application, which enables network managers to analyze usage trends, and to configure, monitor and maintain multiple NetWare for SAA servers over local or wide area network connections.

The SSM enables the configuration, administration and management of any NetWare for SAA server from a single workstation and can provide audit trails, real-time status display, and trace facilities to ease troubleshooting.

FLEXIBLE PRINT SERVICES INTEGRATION

With the addition of the optional NetWare HostPrint/400™, users can leverage their LAN-based printers for AS/400 print jobs. Printers can be anywhere on the NetWare network, making printing more flexible and convenient. NetWare HostPrint/400 can reduce network traffic and simplify administration, improving the performance and reliability of AS/400 printing.

FLEXIBLE PACKAGING OPTIONS

Available in 5-, 10-, 25-, and 100-user packages. Concurrent user-based licensing more closely reflects both NetWare and AS/400 environments and simplifies licensing administration. NetWare for SAA: AS/400 Edition includes NetWare Runtime 3.12 and 4.1 for dedicated NetWare for SAA:AS/400 Edition server configurations and is distributed on both CD-ROM and diskettes.

PACKAGES AVAILABLE

Available in 5-, 10-, 25-, and 100-user packages. Licenses are additive, to a maximum of 200 users.

25 users	00662644089928
100 users	00662644089935

COUNT ON NOVELL AND IBM FOR RELIABLE

LAN-TO-HOST CONNECTIVITY SOLUTIONS.

NetWare for SAA 2.2 is co-developed by Novell—the provider of NetWare and best-of breed network services, and IBM—the originator of SNA and the world leader in high-end and mid-range computing solutions. This successful partnership has also produced tightly integrated solutions for AS/400 connectivity and LAN-to-host printing. NetWare for SAA:AS/400 Edition is cost-effective software specifically designed to meet the needs of the networked AS/400 environment. NetWare HostPrint™ 1.11 offloads 3270 printer emulation to NetWare servers, letting you print host data on networked printers. Likewise, NetWare HostPrint/400™ provides elegant network-based printing for AS/400 system users. Both route host print jobs directly from the host to NetWare print queues, reducing network traffic and providing centralized administration and control.

SYSTEM REQUIREMENTS

SERVER REQUIREMENTS:

- **NETWARE VERSIONS SUPPORTED:** NetWare 3.12, NetWare 4.1, and NetWare 4.1; and IntranetWare 4.11
- IBM PC, PS/2 or compatible with at least a 80386 processor
- Higher performance systems are recommended.
- 16MB additional RAM above the memory necessary to run the NetWare environment
- An AS/400 with IPCS requires a minimum of 32MB of RAM

LAN ADAPTERS:

- Any Novell-certified ODI-compliant 4.0 or greater ISA, EISA or Micro Channel LAN adapter

HOST DATA LINK OPTIONS:

- Call the Novell Labs FAXBACK server at 1-800-414-5227 for a hardware matrix listing Token-Ring, Ethernet, FDDI, SDLC, and QLLC/X.25 adapters

WORKSTATION REQUIREMENTS:

- More than 50 third-party 5250 and terminal emulation packages support NetWare for SAA: AS/400 Edition.
