

IMS and Web 2.0 Go to Work

*Jenny Hung
IMS On Demand SOA Solutions
Silicon Valley Laboratory
IBM Corporation*

Act.Right.Now.

Agenda

- Business Values of Web 2.0
- SOA and Web 2.0
- Mashups 101
 - Feed and Widget
- IBM Mashup Center (Info 2.0)
- IMS Web 2.0 Support
- Business Mashup Scenarios
- Demo: Building a Mashup
- Questions & Answers

What is Web 2.0 all about?

Achieve Growth, Efficiency, and Collaboration with Web 2.0

- Being **more responsive** to customers, with knowledge from subject experts you may or **may not** know
- Harnessing the **knowledge of the wise**, before they retire
- Enabling employees to be **more productive, more knowledgeable**, faster
- From a technology perspective Web 2.0 uses AJAX, Mashups, and Feeds predominantly
- Mashups rated by Gartner as Top 10 Strategic Technology for 2008

Personalization becomes collaborative!

IBM Software

© 2008 IBM Corporation **Act.Right.Now.**

Web 2.0 Business Benefits

**Improved Growth
Through Innovation**

- Faster response to customer facing issues
- Improved effectiveness of intra- and inter-company communications and collaboration
- Greater hit rate / faster time to value on innovations

Faster Task Execution

- Faster access to critical information and experts
- Faster response to customer facing issues
- Real time collaboration on tasks

Improved Efficiency

- Faster ways to find experts and information
- Reduced recruiting costs for expertise already available in the company
- Reduced rework on overlapping projects
- Common collaboration platform and tools saves infrastructure costs; enables metrics by task and by person for better decisions

**Increased
Empowerment of
Key Resources**

- Greater leverage of key experts across an organization
- Improved retention of younger employees
- Faster development of high performing resources
- Easier to build "reputation capital"

Extending SOA with Web 2.0

Personalizing SOA for efficiency and innovation

Simple to use, quick to develop and deploy

- Rapidly assemble mashups
- Simply create widgets, feeds
- Reuse information and services
- Unlock enterprise and web contents
- Increase effectiveness with rich interface

Simple to access

- Access resources with simple RESTful interface
- Reduce development time and skills needed
- Quickly transform and mix information
- Wider access from a variety of consumers
(web apps, outside partners, etc.)

Web 2.0 Interface

What is a Mashup?

- A “mashup” is a lightweight web application created by combining information or capabilities from more than one existing source to deliver new functions and insights.

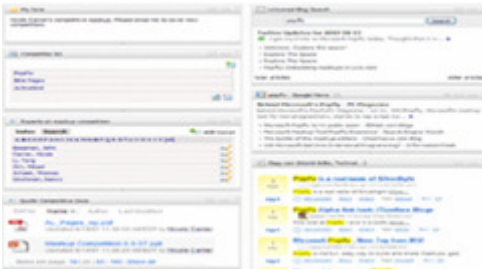

iGoogle

Zillow.com

Competitive Mashup

- What typically characterizes a mashup?

–“Widgets” and “feeds” that are mashed together often come from independent sources **and** do not change when mashed

➤New applications deliver new insights and capabilities (1+1 = 4)

–Built on a web-oriented architecture (REST, HTTP) and leveraging lightweight, simple integration techniques (AJAX, RSS, JSON)

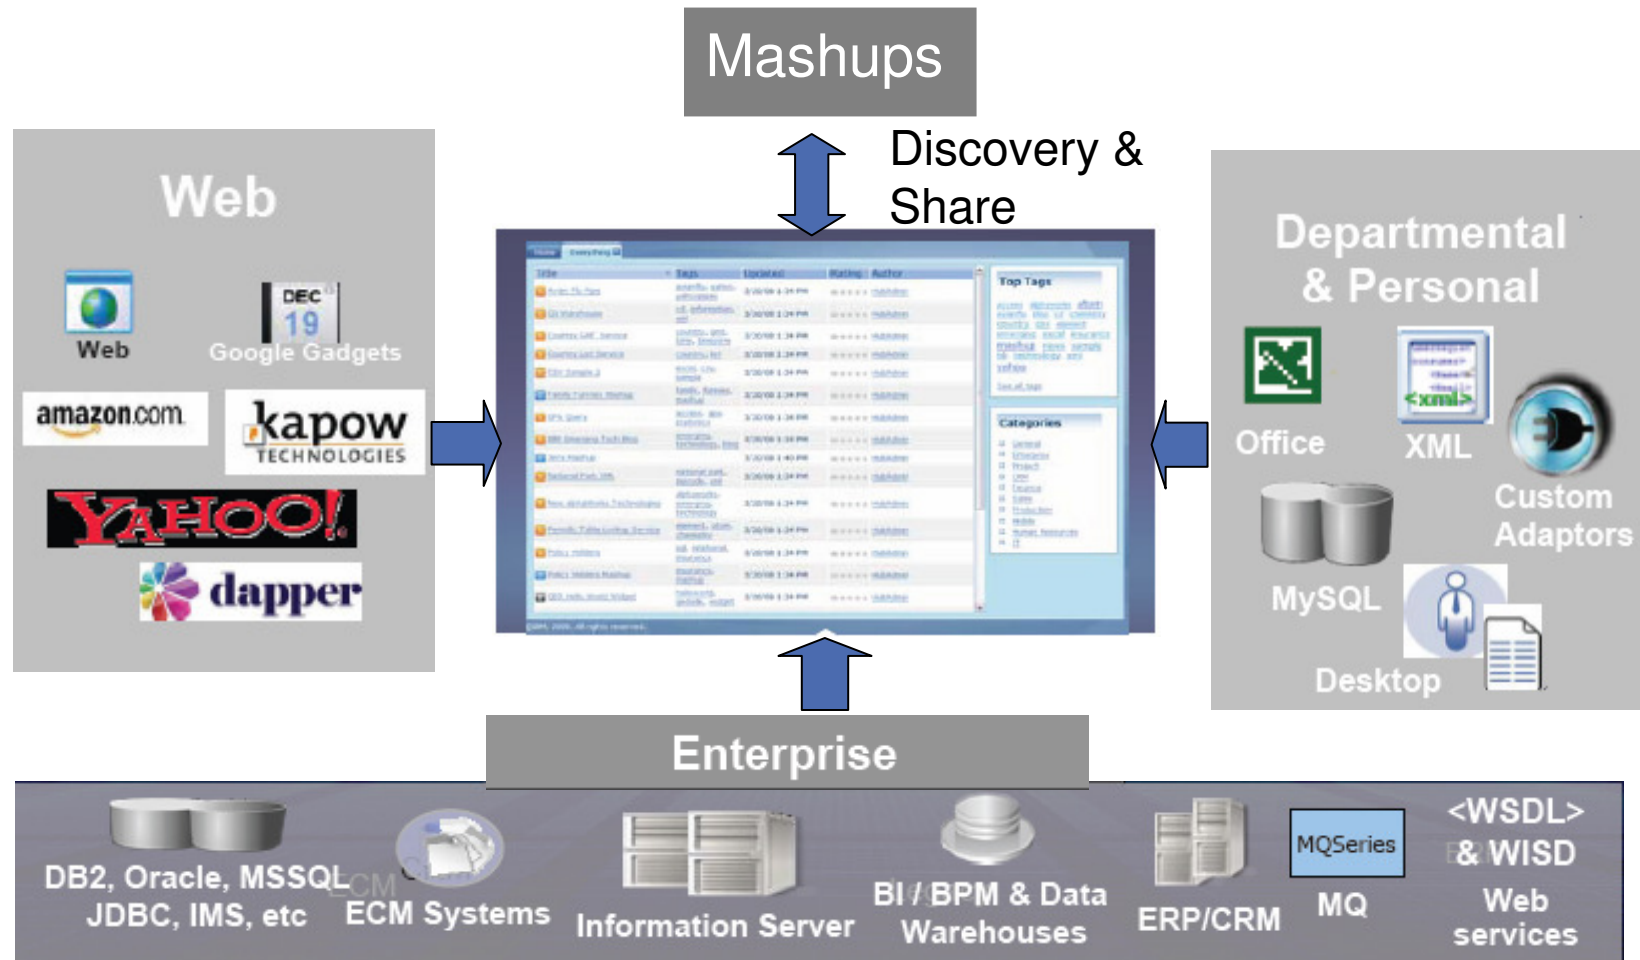

➤The result is fast creation of rich, desktop-like web applications

- What’s new about mashups?

- Using the application includes creating and configuring the application

Mashable Content Can Come From Diverse Feeds

Mashup Example: Global Telco Provider

- Customer Motivation: Combine network-based services with existing data to offer a new category of communication-aware applications
- Scenario: Trouble Ticket Tracking Mashup
 - Monitor problems associated with sales and installation situations including who is handling problem
 - Sales order tracking
 - Inventory tracking
 - Ticket resolution statistics
 - Filtered ticket list
 - Ticket details
 - Third-party call
 - Send Email
 - Send SMS

INTELLIGENT COMMUNICATIONS

Feed

- A **web feed** is a data format in XML used for providing users with frequently updated content. Content distributors *syndicate* a web feed, thereby allowing users to *subscribe* to it. Making a collection of web feeds accessible in one spot is known as *aggregation*, which is performed by an Internet aggregator.
- A web feed is also sometimes referred to as a *syndicated feed*.
- RSS, XML, and ATOM feed format

Widget

- A **widget** is a small program or piece of dynamic content that can be easily placed into a web site.
- Widgets are called different names by different vendors: gadgets, blocks, flakes.
- Widgets can be written in any language (Java™, .NET, PHP, etc.) and can be as simple as an HTML fragment.
- Widgets can be non-visual.
- Widgets often encapsulate an API.
- “Mashable” widgets pass events, so that they can be wired together to create something new.

Web Mashups- Architecture

Discover & Share
Find, rate, tag, comment, share widgets, mashups, and feeds

IT professionals

Information / Business Analyst

Business Users

Assemble Mashups

- Discover
- Wire & mash
- Utilize recommendations & filtering
- Transform

Create Widgets

- Mash visualizations w/ feeds
- Import HTML
- Use IDE of choice

Generate Feeds

- Connect
- Transform and filter on server (Info 2.0.)

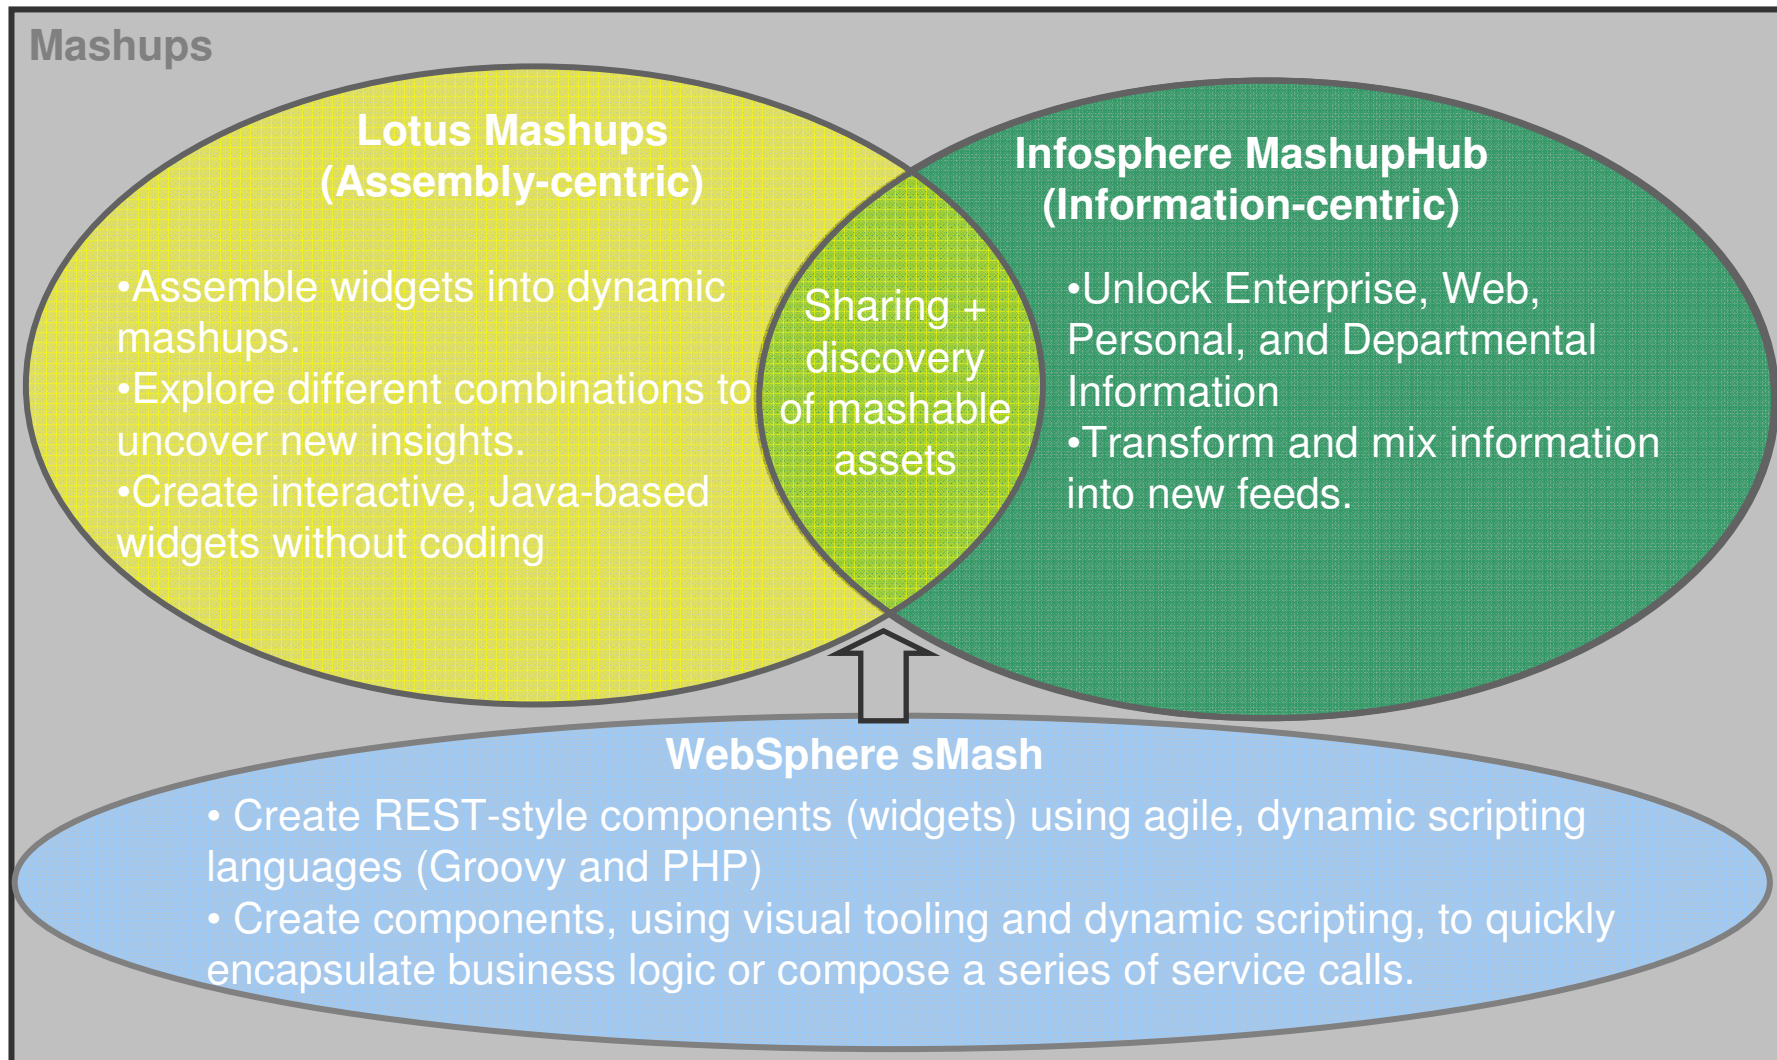

Vast Array of Information Sources

Web

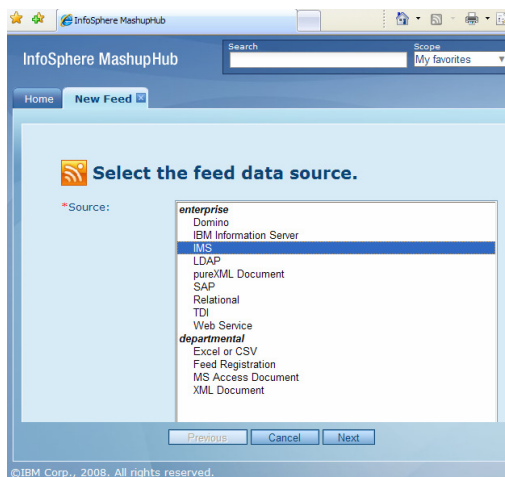

IBM Mashup Offerings and Roles

IBM InfoSphere MashupHub

A visual tool for creating, storing, transforming, and remixing feeds to be utilized in mashup, and a central catalog for users to tag, rate, and share mashable assets.

Transform and Mix:

- *Importing Feeds*
- *Filtering Feeds*
- *Annotate Feeds*
- *Merge Feed*
- *Publish Feeds*
- *Transform Feeds*
- *Group / Sort / Union Feeds*

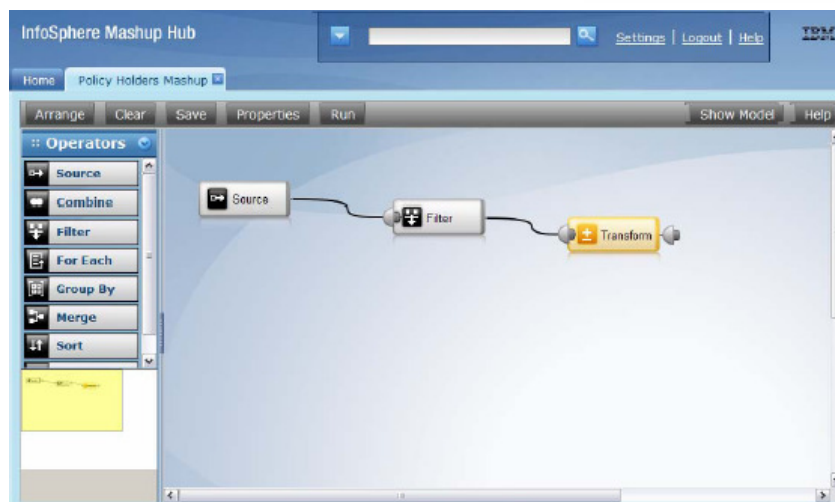

Catalog

Sharing & discovery of mashable assets.

Create Feed from:

- *Domino*
- *IBM Information Server*
- ***IMS Transaction***
- *LDAP*
- *pureXML Document*
- *SAP*
- *Relational*
- *TDI*
- *Web Service*
- *Excel or CSV*
- *Feed Registration*
- *MS Access Document*
- *XML Document*

IBM Lotus Mashups

Quickly Assemble and Share New Mashups

Browser-based tool supports quickly and easily on-the-glass assembly of situational applications by non-technical users.

- Easily Mix and Mash content without coding!
- Rapidly creation to address an immediate need of an individual or community
- Just-in-time solution
- Intuitive, on-the-glass wiring of widgets & feeds
- Increase agility by fostering reuse and rapid remix of content into new, compelling Web applications
- Support innovation and new business opportunities

- Share –public or by user/group.
- Automatic wiring
- Embed
- Save new assemblies as widgets
- Edit Source

IMS Web 2.0 Solution

IMS and Web 2.0: Unleash and Reshape IMS

“ I want my IMS Assets to be mashable...

Enterprises will be **exposing** more services to the web, transforming the web into a platform...

...and **consuming** more services and feeds from the web

...what should I keep in mind? ”

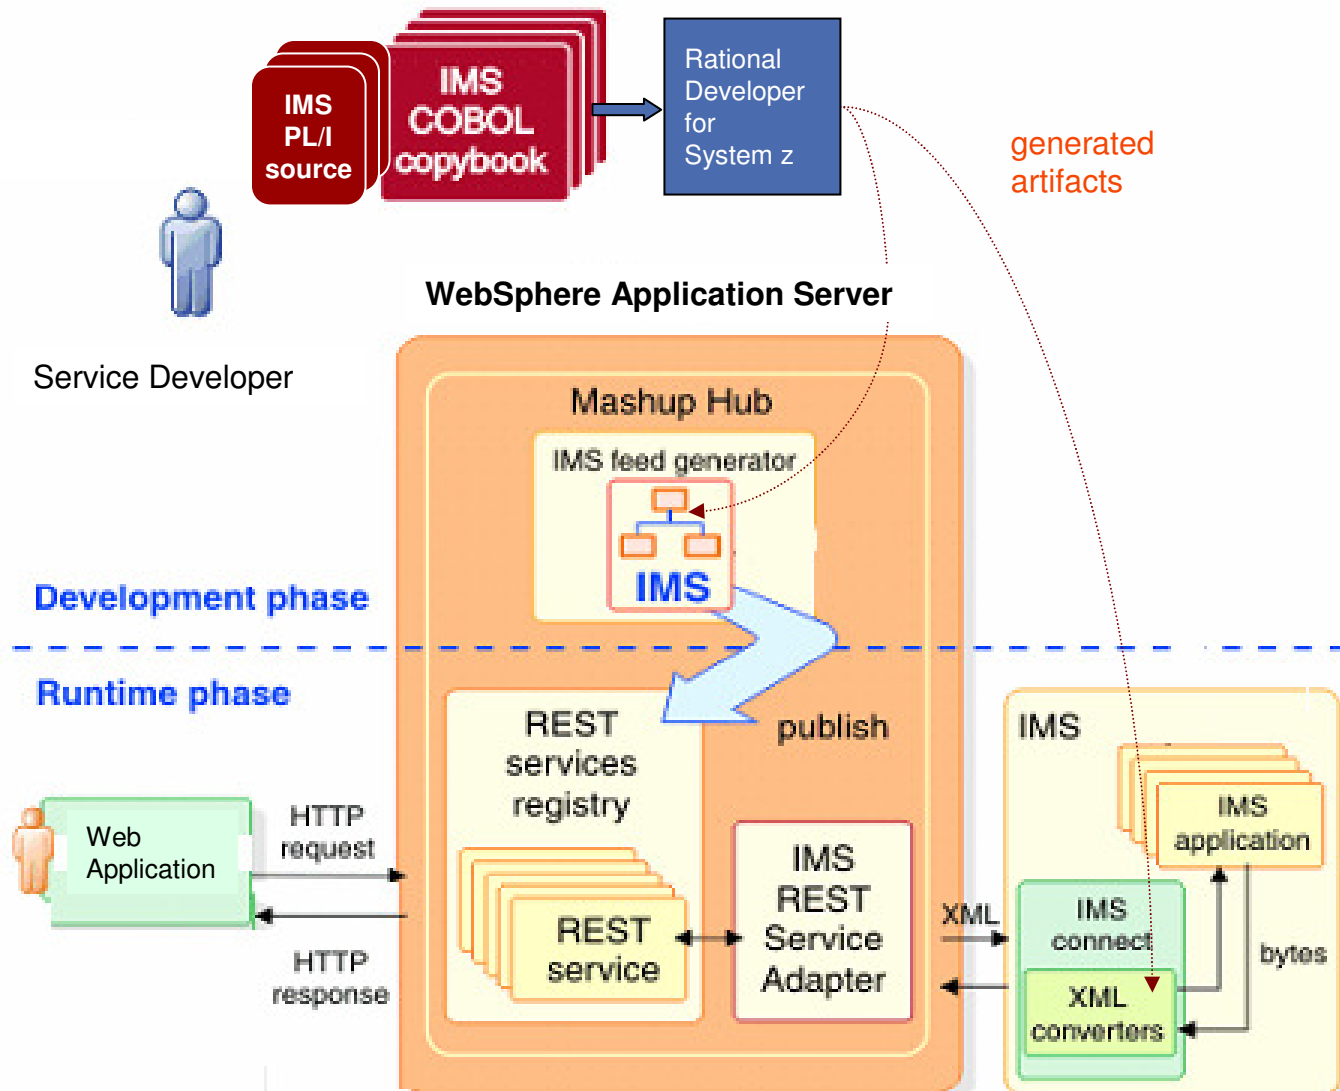

Mashup Scenarios:

- * Compose services (data or function) into a composite service
- * Compose widgets / HTML segments into a composite UI or an application template
- * Binding service (data or function) to the composite UI

IMS **i** info 2.0 : Web 2.0 Goes to Work

IMS Info 2.0 demo video on YouTube: <http://www.youtube.com/watch?v=BWJGSC-RyXQ>

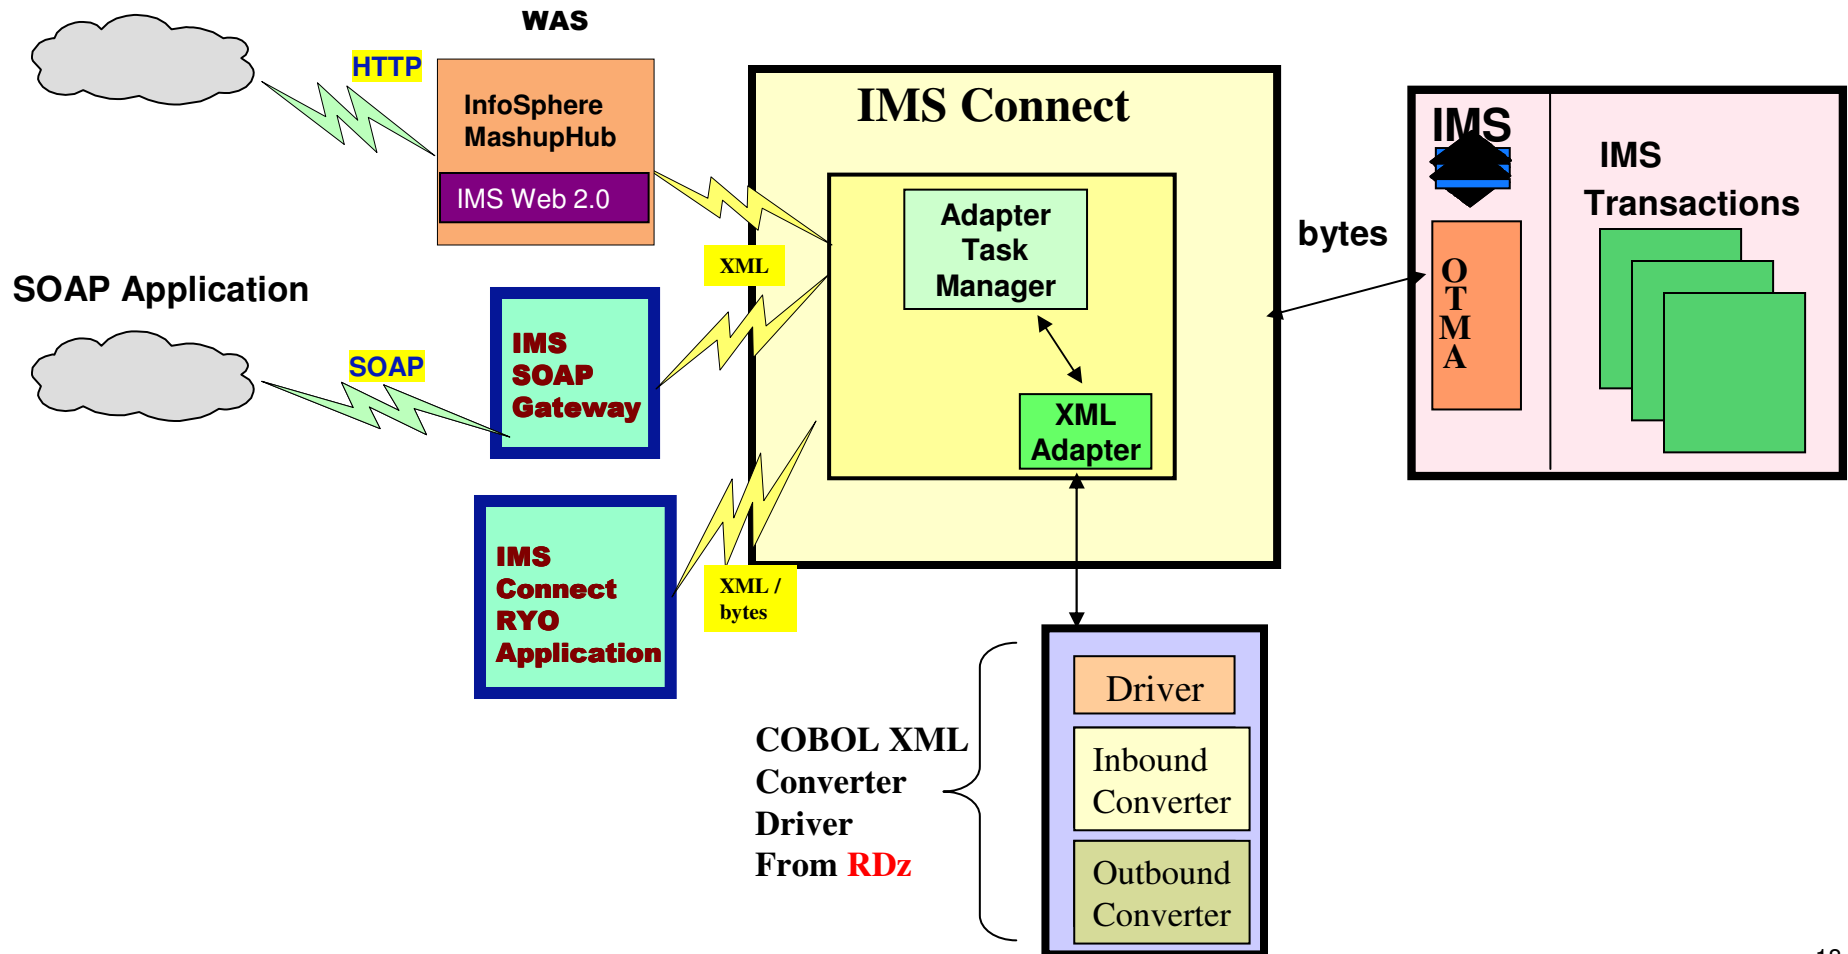

Prerequisites and Restrictions

- Software requirements
 - IMS V10+, IMS Connect V10+
 - Rational Developer for System z V7.1.1+
 - InfoSphere Mashup Center V1.0
 - bundles InfoSphere MashupHub Enterprise Edition
 - bundles Lotus Mashups
 - bundles WebSphere Application Server V6.1.0.13
 - Windows 2003 Server
 - Internet Explorer V6, Internet Explorer V7, Firefox V2, and Safari V3
- Restrictions
 - Single Segment message support only
 - No conversation support
 - No callout support
 - Commit Mode 1 and Sync Level None support only

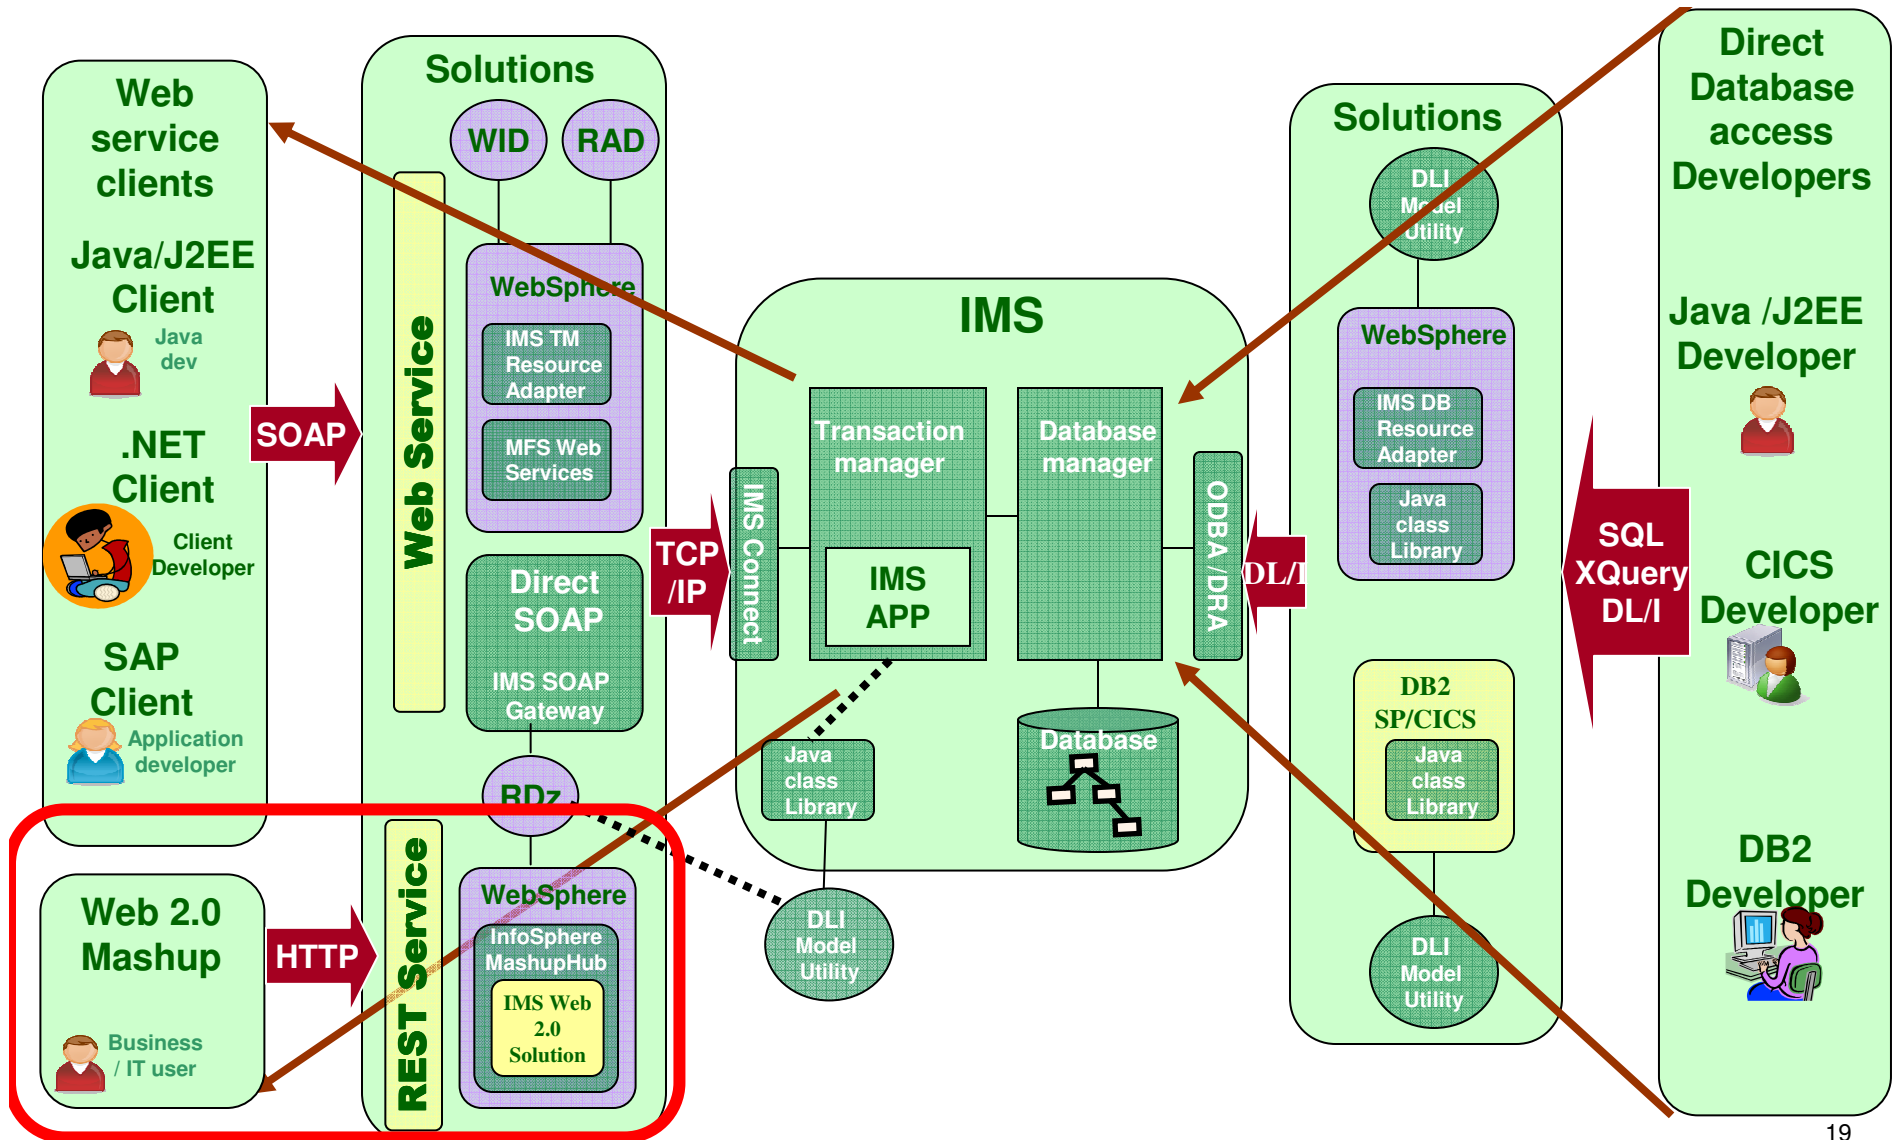

How IMS Web 2.0 Solution Fit in with IMS On Demand?

Web Application

IMS On Demand Overview

Business Scenario 1: Rapidly Extend Business Logic

Customers can extend their IMS investment by converting an IMS asset into an IMS RESTful service, which has the ability to consume and be consumed by other Web 2.0 services.

IMS customer can then remix and mashup their data rapidly with IBM Info 2.0 tools to extend their business logic without the need to write a single line of code.

IMS feed
Inventory and branch locations

Google Maps feed

Other web feed

Name	Address	Phone
INDUSTRIAL EQUIPMENT LAWN N GARDEN	4100 Bohannon Dr Menlo Park CA 94025	(650) 926-6300

INDUSTRIAL EQUIPMENT LAWN GARDEN \$1849.00

4100 Bohannon Dr Menlo Park CA 94025
(650) 926-6300
allturf@somewhere.com

Quantity Available: 1

A 21-hp National Tractor Co. twin engine has plenty of power and torque to handle tough mulching, mowing, and bagging conditions

One-piece frame is constructed of 10-gauge steel

Automatic transmission control for easy speed and direction changes on all surfaces

Business Scenario 2: Extending Business Value

By publishing an IMS RESTful Service to the Web 2.0 community, this opens up the possibility of 3rd parties to generate creative mashups which can benefit both 3rd party developers as well as the original IMS service provider. The 3rd party developer will now have IMS assets available to them. While, the IMS service provider can benefit from new business opportunities and increased partnership on the web.

The screenshot shows a web browser window displaying the 'Local Hardware Supply' website. The page features a search bar with the word 'Tractor' entered, and a 'Sorry, we do not carry the product you requested...' message. Below this, there are three provider logos: RT_{co}, NT_RC, and Alvarez Tractors. A table of 'X100 Series Lawn Tractor' specifications is visible, including engine power, type, displacement, cooling, lubrication, fuel capacity, transmission, number of speeds, differential, cruise control, and travel speeds. A table of 'INDUSTRIAL EQUIPMENT' and 'LAWN N GARDEN' is also shown, listing various tractor models, addresses, and phone numbers. Callouts highlight the existing web page, a new mashup, an other web feed, and IMS inventory and branch locations.

Mashup Example: Customer Quick View

1 Select a customer

Customer Name	Address	Zip	Contact
American International Group	70 FINE ST New York NY	10270	Kent E. Price
Capital One	1940 Marbut Forest Dr Lithonia GA	30058	Edward A. Bottoms
Cisco	1738 N Neville St Orange CA	92865	Sharon E. Kohler
Dell	48650 Seminole Dr Cabazon CA	92230	Janis H. Morehouse
Ford	3001 Chamberlain Ln Louisville KY	40241	William M. Aston

2 View stock price. Bad news/results informs the rep that he might be better off focusing elsewhere for the quarter.

3 Dogears allow the rep to keep track of news and blogs about the customer that he might have missed.

4 View sales by date for selected customer.

5 Critical situations is a good indicator for customer receptivity to spending. The more critical situations, the less likely the customer will buy more.

Mashup Example: Healthcare Record System

Featured Client

Challenge:

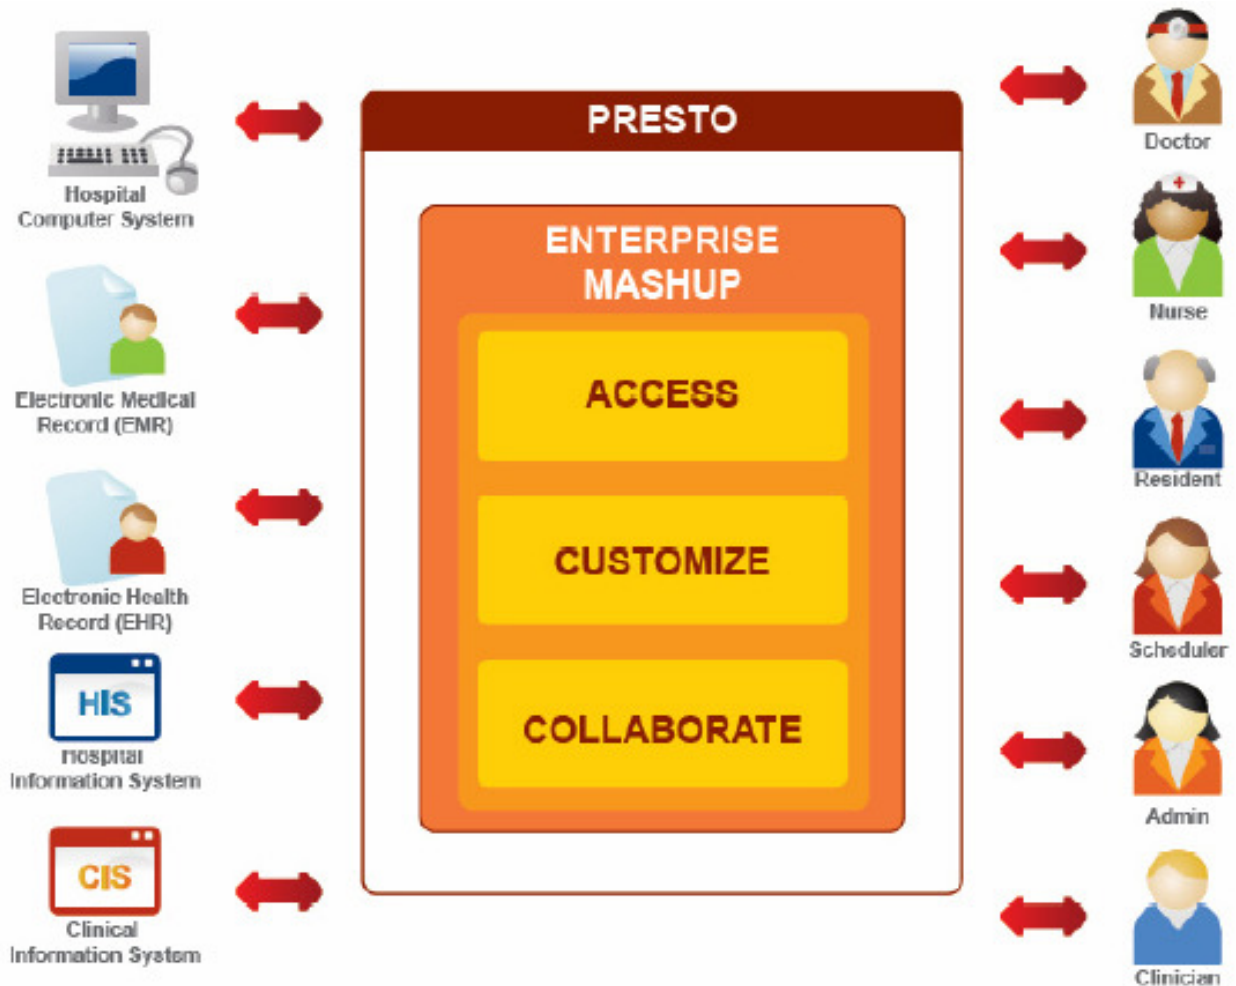

Attract referring physicians with the more leading edge, easy to use technology.

Solution:

A user-driven web 2.0 electronic health record system and a patient scheduling system.

Benefit:

Provided accurate and time sensitive information to those who needed it, while also providing a more efficient & user-friendly patient care management system that integrates multiple information sources.

Reference: http://www.jackbe.com/downloads/JackBe_Mashups_for_Healthcare_Feb2008.pdf

7 Mashups Starters

1. Customer Service: Mashup your call center application with package tracking
2. Client Prospecting: Mashup your sales prospects with external news, stock and company information.
3. Human Resources: Mashup your internal job postings with external resume services
4. Competitive: Mashup your competitive position in the marketplace.
5. Community: Mashup your product defect tracking with code management, time-tracking systems and blog commentary.
6. Research Information: Mashup relevant Medical, scientific and Law research with your own internal data.
7. Decision Dashboards: Mashup your product specifications, revenue planning, and product information with other products in the market.
