# Storage Control

Is your SAN ready for e-business?

## Introducing a smart storage solution for the new economy

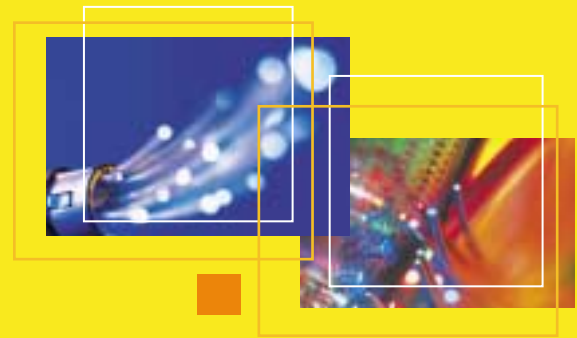

### Take control and manage your SAN environment with Tivoli® SAN Solution from Business Partner Name.

As the technological world continues to boom, businesses face the challenge of managing the tremendous growth of data. To help you gain back control, Tivoli offers a SAN Solution comprised of a family of products that delivers true end-to-end data protection, resource sharing, and SAN management for your increasingly complex storage environment. Tivoli SAN Solution provides a powerful collection of advanced storage applications to improve data access and offers the ability to manage information across increasingly complex multi-vendor networks. Tivoli SAN Solution makes it easier than ever to install a scalable storage network infrastructure that supports industry standards, reduces the number of management interfaces, and provides all your essential management functions.

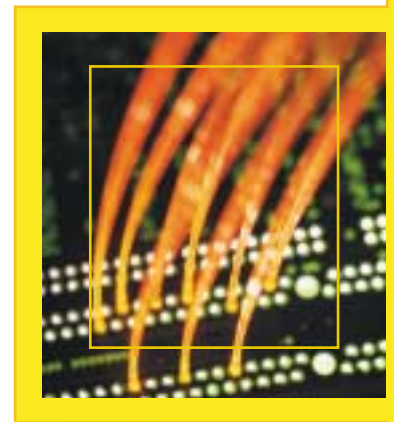

### Tivoli SAN Solution exploits, manages, and controls your SAN environment.

The products in the Tivoli SAN Solution protect, share, discover, allocate, automate, monitor, and manage SAN components and storage resources.

- **Tivoli Storage Network Manager** helps you integrate new SAN and storage technologies quickly and easily, simplify the management of existing and new technologies, and reduce the overall cost of managing your SAN environment.

- For high-performance file sharing, **Tivoli SANergy™** gives you the power to simultaneously share the same storage, the same file systems, and even the same files between multiple computers connected to a SAN.
  - If protecting and managing a broad range of data is what you need, **Tivoli Storage Manager** is a full-function data protection and recovery product that addresses the challenges within a complex distributed environment.
- Tivoli is creating the next generation of integrated enterprise networking systems to give you more options, more power, and more control.
