Don't Let Security Issues Slow Your e-business Success

Tivoli provides the software that enables you to quickly deploy an e-business applications portal so your customers simultaneously feel welcome and secure. Above all, it protects the privacy of your customers' data using predefined and dynamic privacy roles. You can now rapidly respond to an evolving e-business environment.

Faster and Easier Deployment of Secure e-business Initiatives

Tivoli eliminates the need to write security controls into each application. This solution lets you use any Web server and any Internet client on any platform. Additionally, Tivoli applies security across the entire organization, from the Web to legacy back-end systems.

(Business Partner Name) Delivers Security

Together with Tivoli Security Management Software, [Business Partner Name] can provide you with the security solutions needed to effectively manage your e-business initiatives.
