

IBM Program usage and installation report instructions

Db2 Content Manager Help Guide

Please see below the instructions for additional help in collecting deployment information for your IBM Software.

Instructions:

- "1. Provide version information of the product currently deployed in the environment.
2. For every DB2 Content Manager Install, Provide a text file containing output from the following select statement:
 select UserID, LastAccess, UserName from ICMSTUsers
3. If Multiplexing exists, Provide a list of users for each application that connects to DB2 Content Manager."
