

IBM Program usage and installation report instructions

NetCool OmniBus Help Guide

Please see below the additional help in collecting deployment information for your IBM Software. (You may need to zoom in to more easily view the screenshots.)

Sample screenshot of output:

The screenshot displays the Network Pilot web interface within a Windows Internet Explorer browser window. The interface is divided into several sections:

- Navigation:** Includes search fields for elements and message logs, and a list of actions such as "View all Network Elements", "View all Logs", "View Server Status", "Create Network Element", "Delete NE...", "Delete all NEs...", and "Purge Logs...".
- Network Elements:** A table listing network elements with columns for TID, Protocol, Address, State, View, and Actions. The table shows 15 elements, all with a state of "ACTIVE".
- All Alarms:** A table showing a list of alarms with columns for Cnt, ACK, NA, Time, Source, Type, Condition, and Description. The table shows 3 alarms, all with a type of "Processing Error" and a condition of "RequestTimeout".

TID	Protocol	Address	State	View	Actions
000101CAB01AA	TL1		ACTIVE	logs	passthru... bounce resynch delete
1AR0AA	TL1		ACTIVE	logs	passthru... bounce resynch delete
