

Migration Assessment for IBM® WebSphere Commerce Search

Engage our team of experts to assist you in analyzing your current WebSphere Commerce solution and identifying the best path to take advantage of native search functionality rather than using expensive 3rd party search providers.

Working with your team, IBM Commerce Services will:

- Analyze your current search capability implementation
- Map the WebSphere Commerce structured data as well as the unstructured data which is used by the existing search engine to either filter and/or create the response data
- Create a Migration Assessment Report to outline the best path for the migration to WebSphere Commerce Search

Offering Deliverables

- *Migration Assessment Report*

Offering Tasks

T1. Kickoff Meeting

- Review Statement of Work
- Set up schedule of activities for the week

T2. Information Gathering (First Week)

- Analyze search capability and implementation
- Map search data with commerce structured data
- Map search data with commerce or non-commerce unstructured data
- Analyze infrastructure and index-building topology
- Analyze search data / metadata refresh
- Gather performance benchmarks for the search
- Gather information about release management and deployment processes

T3. Recommendations (Second Half Week)

- Provide a like-for-like business function/feature mapping of existing search engine with an IBM Integrated Search based solution
- Provide the search infrastructure, index-building topology and process with the IBM Integrated Search solution
- Provide a list of tangible benefits with migration to IBM Integrated Search solution

Education

Assessment

An Education Assessment may be delivered as part of every IBM Commerce project to help you validate your team's skills. For more information on Commerce training plans, contact the IBM Education Team:

ibmswedu@us.ibm.com

Service Delivery

Services may be delivered on-site or remotely depending upon the complexity of the engagement. Service offerings are billed on a time and expense basis.

Contact

For more information regarding this or any Commerce Software Service, please contact your Commerce Sales Representative or visit our website at <http://www.ibm.com/software/commerce/services/>

Benefits

- Improve the customer browsing experience by selecting the product attributes for facet display
- Make search smarter by exerting more granular control over search results to ensure the most "relevant" products are offered during a search
- Achieve your business imperatives by promoting, demoting, or excluding products based on attributes, properties, and other dynamic content
- Save money by terminating the contract with your third-party search tool
