

IBM AutoDeploy for Connections

Automate deployment and configuration of your WebSphere Application Server infrastructure

- Install product binaries and custom components
- Single tool for multiple products
 - WebSphere Application Server
 - WebSphere Portal
 - IBM Connections
- Configure and Administer the whole WebSphere Application Server environment from one interface
- Less error-prone through standardized, automated deployments

- **Deploys releases about 20-times faster** than the manual way
- **Deploy and rollback a two-line golden topology** with fade in/out
