

IBM InfoSphere BigInsights Software Services

Highlights:

- Leverage IBM experts to seamlessly install and configure IBM InfoSphere BigInsights in your environment
 - Get support in defining the right big data architecture that would address your business need
 - Accelerate your implementation lifecycle by developing a powerful analytics solutions leveraging the built-in text processing engine and library of annotators
-

Build your BigInsights Solution based on proven methods & practices

Many companies are seeing dramatic growth in the variety, velocity, and volume of information being generated by their businesses. Organizations are struggling with how to analyze these vast and diverse data sets and find insights in these new and unconventional data types such as sensor data, web pages, web log files, click-streams, search indexes, text messages, and email etc.

As part of the IBM Big Data Platform, IBM InfoSphere BigInsights enables new solutions that turn large, complex volumes of data into insight, cost effectively. InfoSphere BigInsights delivers an enterprise-ready big data solution by combining Apache Hadoop, including the MapReduce framework and the Hadoop Distributed File Systems (HDFS), with unique technologies and capabilities from across IBM.

What we offer

Our Information Management (IM) Software Services team has a number of services which can accelerate your adoption to this new exciting technology.

Planning and Design of BigInsights Solutions:

Once your team has familiarized themselves with the basics of IBM big data technology, our technical experts will guide you in selecting the right use case and designing and planning your first big data solution focusing on how to best apply the technology to solve your identified business need.

InfoSphere BigInsights QuickStart:

Our technical professionals will support your team in specifying the BigInsights components to install and how to configure your platform. The engagement can be customized to spend more time on different activities, depending upon your needs.

InfoSphere BigInsights QuickStart for Data Accelerators:

IBM will work with you in building your first analytical pilot application leveraging the built-in text processing engine and library of annotators. With InfoSphere BigInsights, IBM can support you to quickly query and identify items of interest in documents and messages, including persons, email addresses, street addresses, phone numbers, URLs, joint ventures, alliances, and more.

Cloudera to InfoSphere BigInsights Migration Assessment

This assessment is focused on helping you to determine the optimal migration scope and plan to migrate your big data environment to InfoSphere BigInsights. Our consultants will conduct workshops focused on understanding your current environment and future environment requirements to help you build a successful migration strategy and approach.

InfoSphere BigInsights Query-ready Archive

Our experts will help you to free up capacity in your enterprise data warehouse by offloading rarely used data to Hadoop. You can use InfoSphere BigInsights as a query-ready archive for storage of queryable data where your data remains easily accessible and provides you with a platform for ingestion of new data.

BigInsights on Cloud QuickStart

This offering will help you accelerate the adoption of BigInsights on Cloud as well as plan for the integration of BigInsights into your enterprise environment. Our experienced professionals will help you to quickly implement a solution for managing and analyzing massive volumes of structured and unstructured data.

Custom projects

Our technical resources will support you in your integration projects with your existing data warehouse solution or any other type of custom project you may have.

Your independence is our greatest success

Nothing is more important than transferring IBM expert knowledge to your organization. This provides long-term self-sufficiency through a mentored approach.

Engage today

With a world-wide team of highly trained professionals, the IBM Analytics Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met.

Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership
- Information sharing through our mentoring approach

Available for any delivery approach, the IBM Analytics Services team will produce results quickly, and will help to put your project on the road to success.
