

# IBM® Simplified Search for IBM Content Analytics with Enterprise Search

*A simplified enterprise search approach*

## Highlights

Simplified search application for *IBM Watson Content Analytics with Enterprise Search*

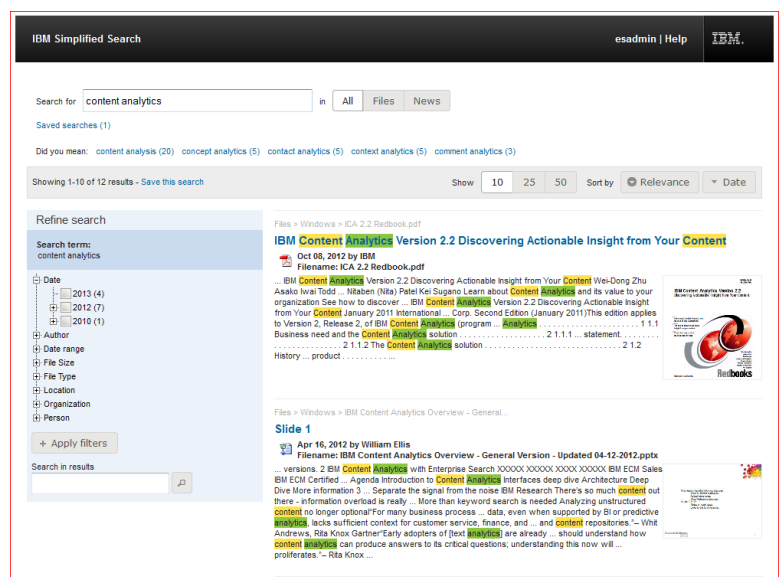

Runs either as a stand alone web application or as a portlet

Can be easily customized to fit your specific requirements regarding look and feel or additional features

Separate maintenance contract, thus independent from the base products update cycle

*IBM Content Analytics (ICA) with Enterprise Search* is a search and analytics platform that combines the power of content analytics with the scale of enterprise search and includes pre-built integrations for indexing data and content from file shares, databases, collaboration tools and web sites.

*IBM Simplified Search for IBM Content Analytic with Enterprise Search* offers an alternative search application besides the standard *ICA* search application to address customer needs for a simple search application.

The *IBM Simplified Search for IBM Content Analytic with Enterprise Search* does not replace the standard search application provided by *IBM Content Analytics with Enterprise Search* but can be used in parallel.

Thus power user can still use the full featured default search application whereas the standard enterprise users can be offered a simpler and clearer user interface for their daily search scenarios. This application can be preconfigured for their search areas, facets, result types and much more.

## Solution Description

The *IBM Simplified Search for IBM Content Analytic with Enterprise Search* can be selected as an alternative to the standard when a tidy, reduced and easy to use search application is required. Either as stand alone web application, as portlet or as *IBM Content Navigator* plugin is available.

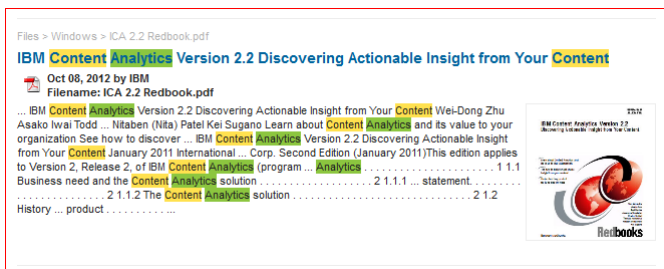

Predefined search areas enable the users to limit the scope of their searches with a single click:

Intelligent, localizable and sortable facets for a quick drill down in the search results:

Smart and customizable display of search results depending on the type of the search result:

## Technical Information
