Dan pametnijih rješenja

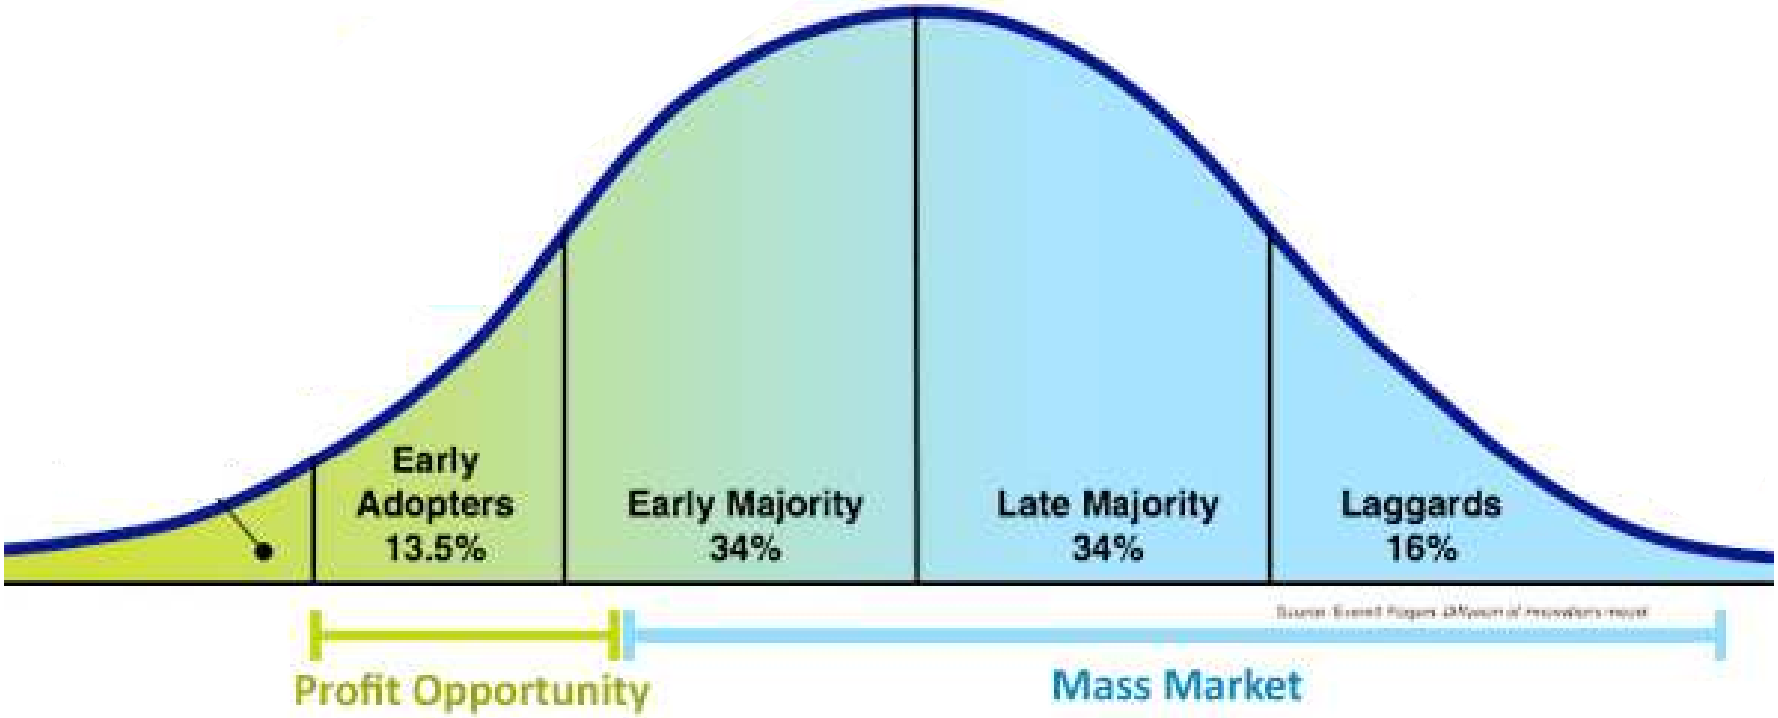
How does PureApplication System do this?

- **Deployment**
  - Fully assembled and configured
  - Pre-installed management software
  - Fast pattern-based deployment
- **Incident/capacity management**
  - Centrally monitor and resolve issues
  - Automatic scaling
- **Asset management**
  - Track license usage of products
- **Security management**
  - Centralized access control
- **Change management**
  - Visibility into relationships of virtual images in a workload
  - Automatically apply changes to desired virtual servers

Roger's bell curve



Thank You
