Why Operational Decision Management and What Is it?

WebSphere Operational Decision Management:

Operational Decision Management Use Cases

Why IBM and What Next ?

Transformation and Growth Require Better Decisions

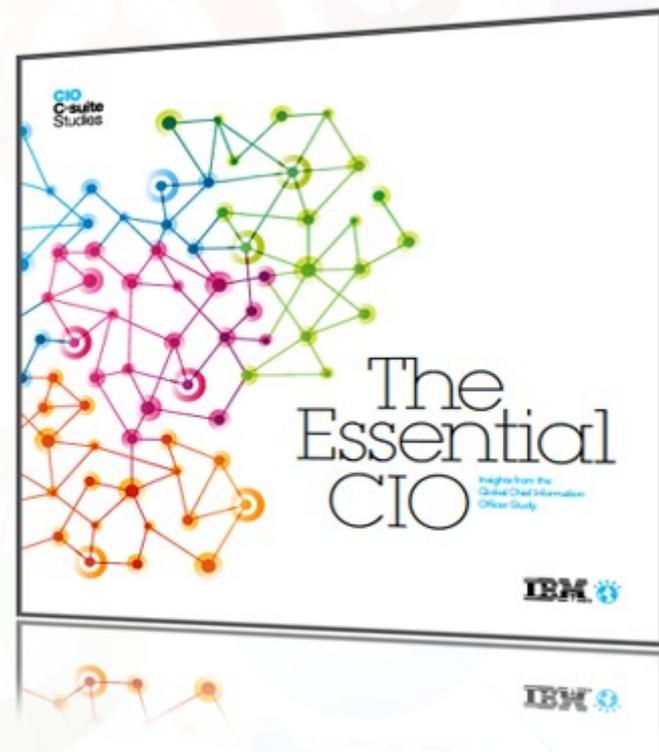

CIOs recognize that effective decision automation is key to success

75%

of CIOs with mandates to **transform the business** are looking to “drive ***better real time decisions.***”

72%

of CIOs with mandates to **expand cross-enterprise growth** are leading the charge to “drive ***better real time decisions.***”

Source: IBM Global CIO Study 2012

Why Better Decisions are Critical to Success

Accurate, real-time decisions improve business performance and results

Identify opportunities to *increase profitability*

Enforce consistency to *ensure compliance*

Leverage information to *manage risk*

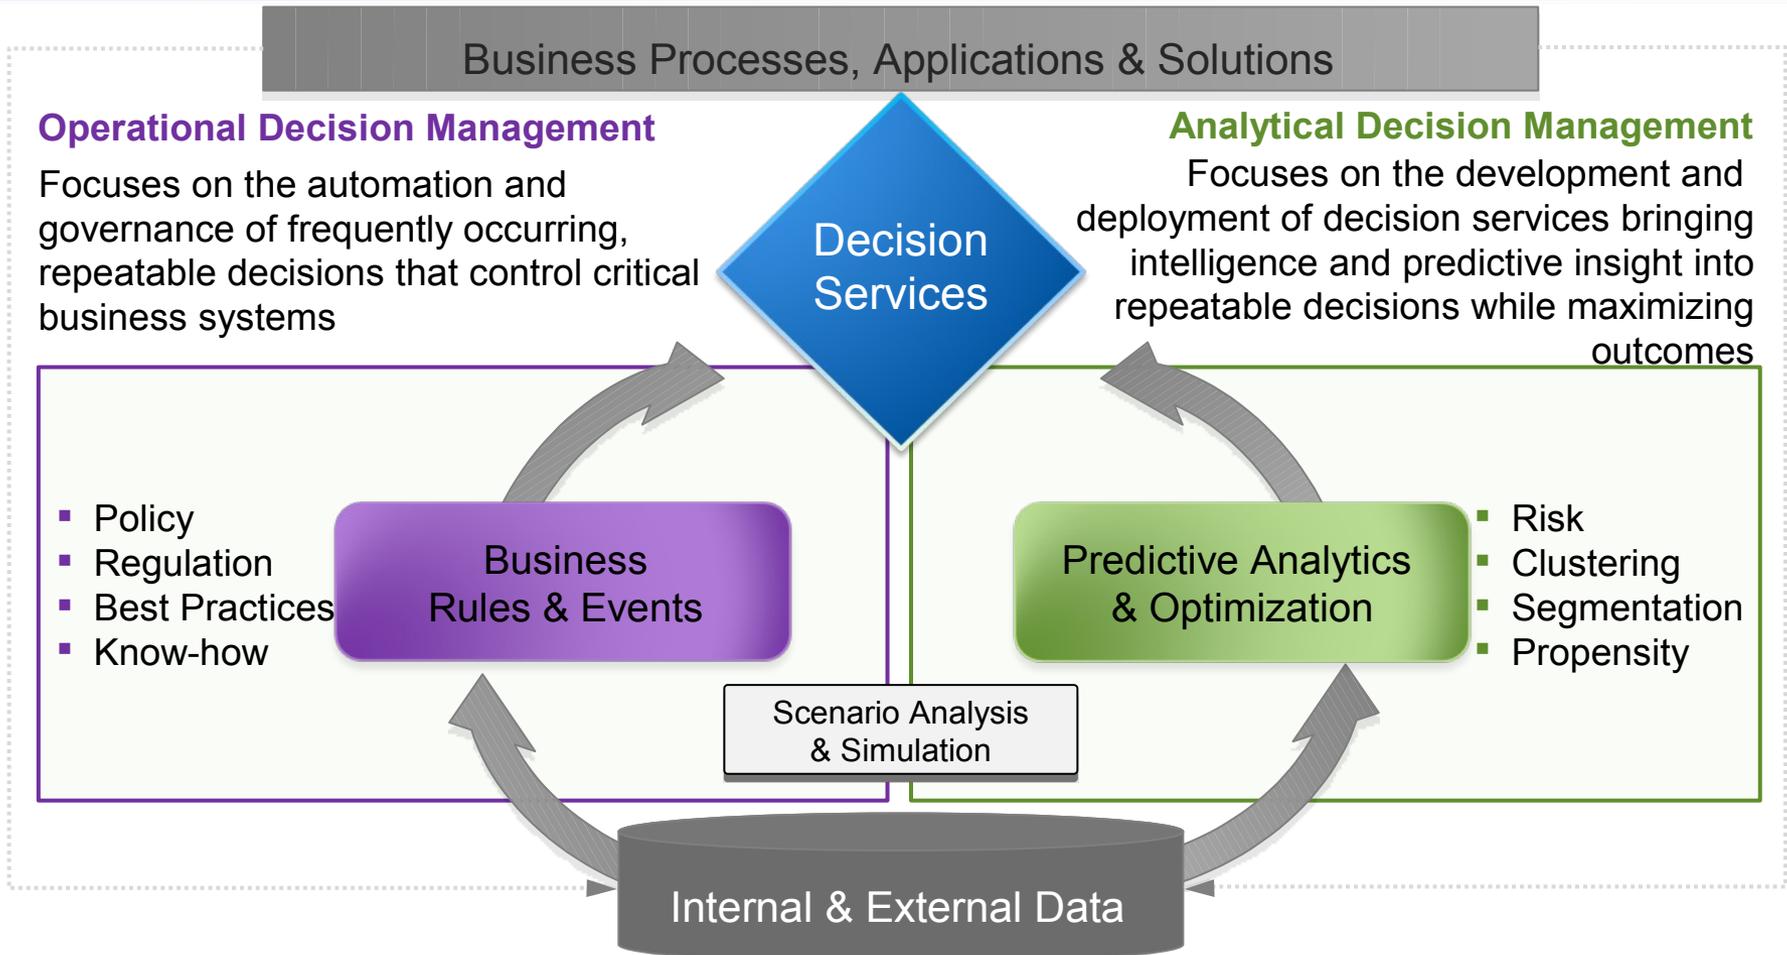

“Decisions are what make strategy real and drive results and performance against metrics... decisions made about how to interact with partners, suppliers, customers, employees.”

James Taylor, “Becoming a Decision-centric Organization,” 2012

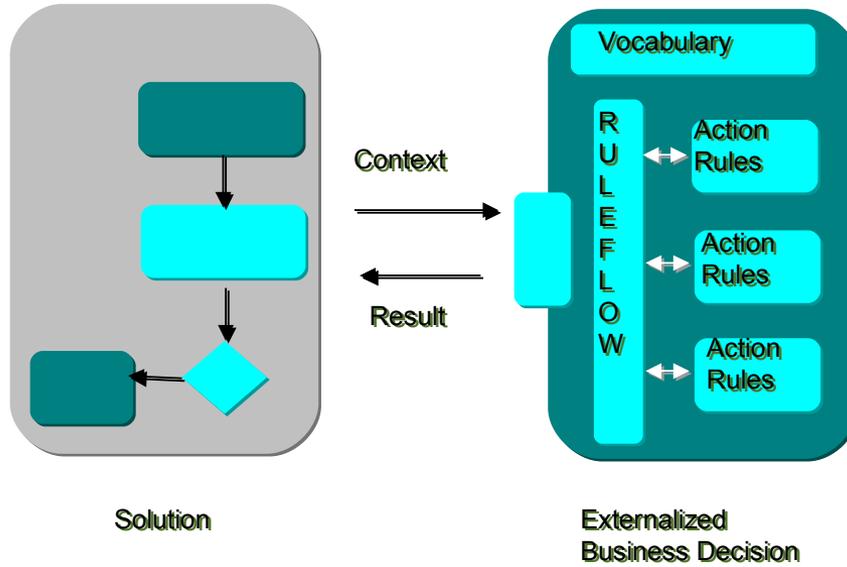

What is Decision Management?

Decision Management is a business discipline that enables organizations to automate, optimize and govern repeatable business decisions.

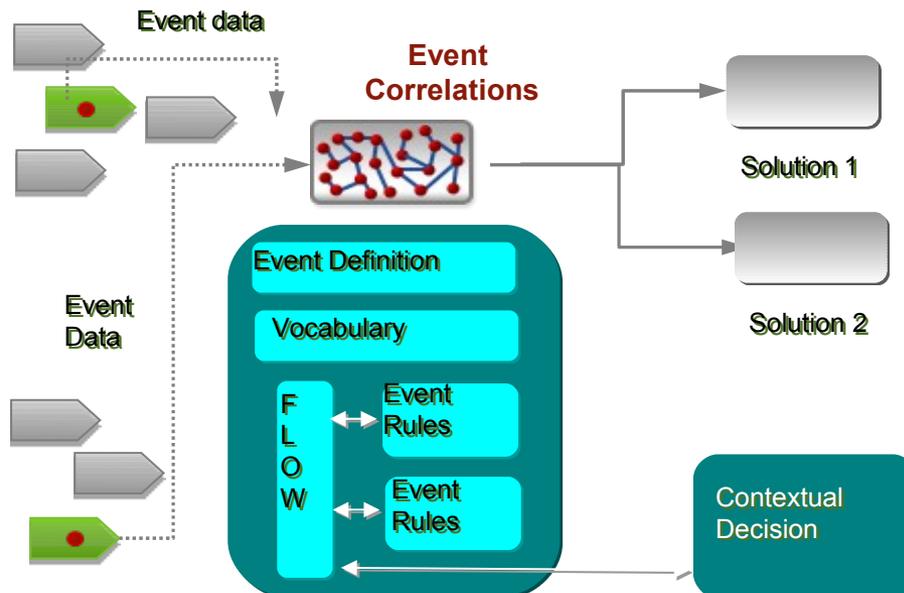

Business Rules and Business Events

Contextual

Business Rules

Situational

Business Events

Imagine an auto insurance company has 2 basic requirements for a new project:

1. Provide more detailed coverage pricing, in real-time, and to make it dependent on a wide-array of business data.
2. Follow-up on potential customers who have declined a quote from any channel (web, call center, office) a certain number of times, and are not yet customers.

Different Scenarios Have Different Requirements

1. Provide more detailed coverage pricing, in real-time, and to make it dependent on a wide-array of business data.
 - ✓ Adjust logic within an application
 - ✓ Return a fixed-set of information
 - ✓ Must be easy-to-use but have sophisticated governance
2. Follow-up on potential customers who have declined a quote from any channel (web, call center, office) a certain number of times, and are not yet customers.
 - ✓ Adjust logic across multiple applications
 - ✓ Decision criteria is time-based
 - ✓ Dependency on occurrence, and absence, of events

Different Requirements, Different Types of Decisions

1. Provide more detailed coverage pricing, in real-time, and to make it dependent on a wide-array of business data.
 - ✓ Adjust logic within an application
 - ✓ Return a fixed-set of information
 - ✓ Must be easy-to-use but have sophisticated governance

Business Rules

2. Follow-up on potential customers who have declined a quote from any channel (web, call center, office) a certain number of times, and are not yet customers.
 - ✓ Adjust logic across multiple applications
 - ✓ Decision criteria is time-based
 - ✓ Dependency on occurrence, and absence, of events

Business Event Rules

What a Rule is ! What an Event is !

Business Rules

Business Event Rules

if
the driver has completed drivers ed course
and the number of accidents **the driver** has been involved is 0
then
 add a 2 % discount to 'Auto Quote Response' , reason: "Good Driver Discount" ;

	Vehicle Value		Deductible	Base Premium
	Lower	Upper		
1			\$250	\$ 36
2	\$ 0	\$ 4,000	\$500	\$ 33
3			\$1000	\$ 23
4			\$250	\$ 43
5	\$ 4,000	\$ 10,000	\$500	\$ 39
6			\$1000	\$ 27
7			\$250	\$ 47
8	\$ 10,000	\$ 30,000	\$500	\$ 41
9			\$1000	\$ 32
10			\$250	\$ 52
11	\$ 30,000	\$ 60,000	\$500	\$ 49
12			\$1000	\$ 40
13			\$250	\$ 62
14	\$ 60,000	\$ 100,000	\$500	\$ 59
15			\$1000	\$ 48

if
 past occurrences of **web quote rejected** within 1 minute is at least 3
and
 past occurrences of **customer accepts web quote** within 1 minute is 0
then
 follow up quote request ;
 refer customer to call center ;

How can we rapidly respond to evolving market demands, competitive actions and regulatory requirements?

→ *Adapt* to rapid change

How can we simplify the visibility and governance of business decisions?

→ *Align* across business & IT

How can we ensure that business systems deliver the right interactions at the right time?

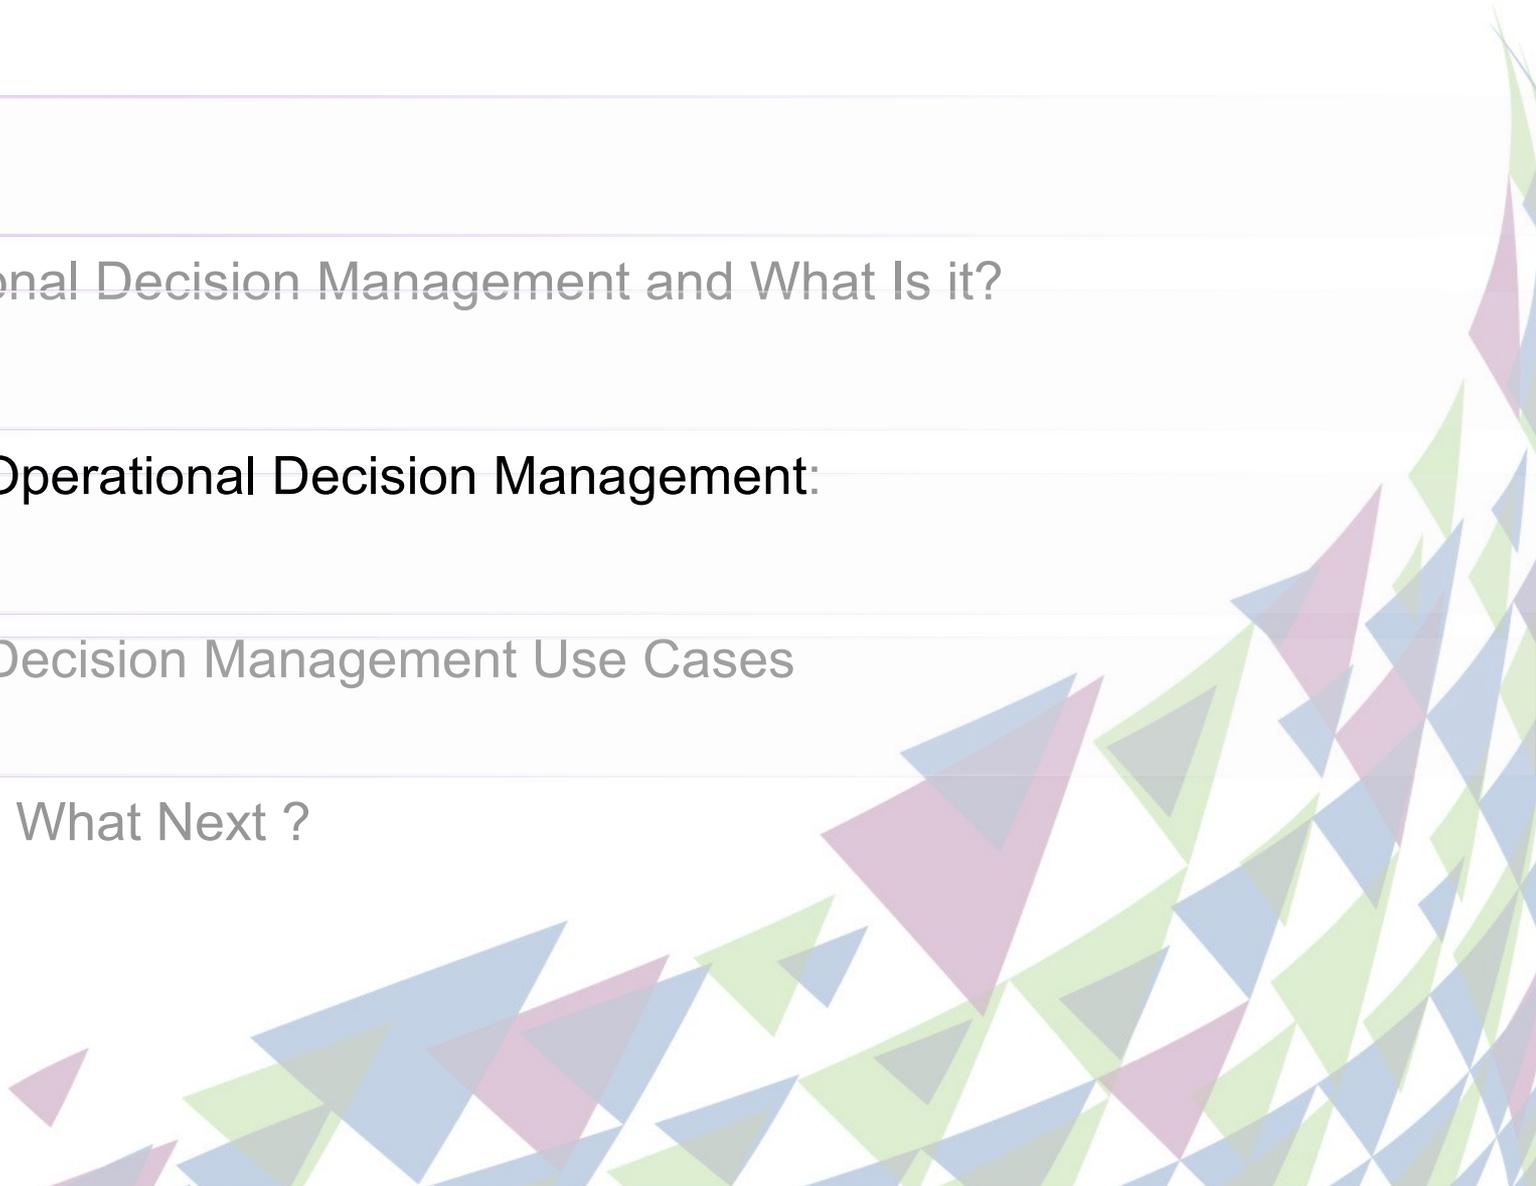

→ *Act* with precision and reliability

Business User Empowerment

WebSphere Decision Center

- *Project governance*, including role-based security, history maintenance and custom metadata
- *Same management* and authoring environments for business users
- Team collaboration through role-based *multi-user access* for business users and synchronization between IT and business user environments

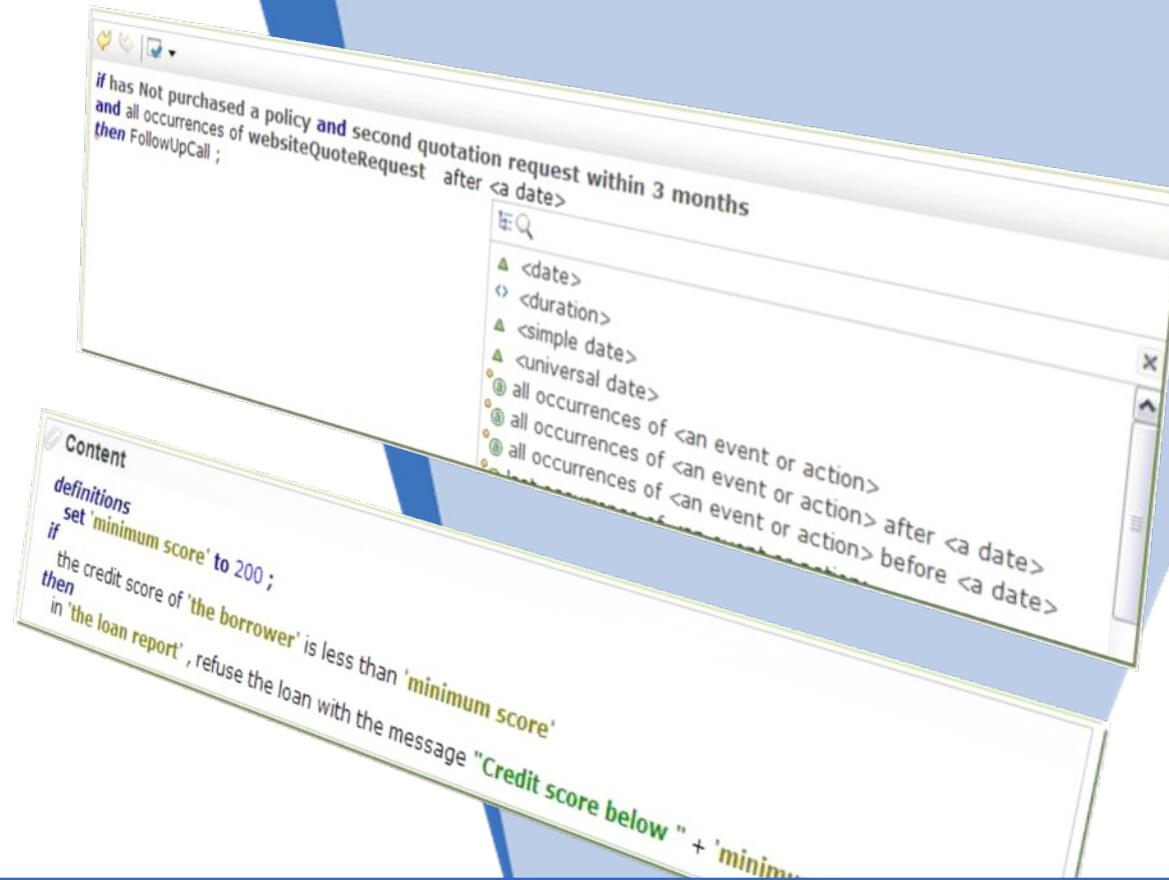

Decision Center Console: A web environment for business users to access and collaborate around decisions updates in a simple, secured and controlled way

One Business Language

Support for a wide range of business decisions

- Easy to understand and to adopt
- Same language for Business and IT users
- Multi language support
- Triggering real business Actions

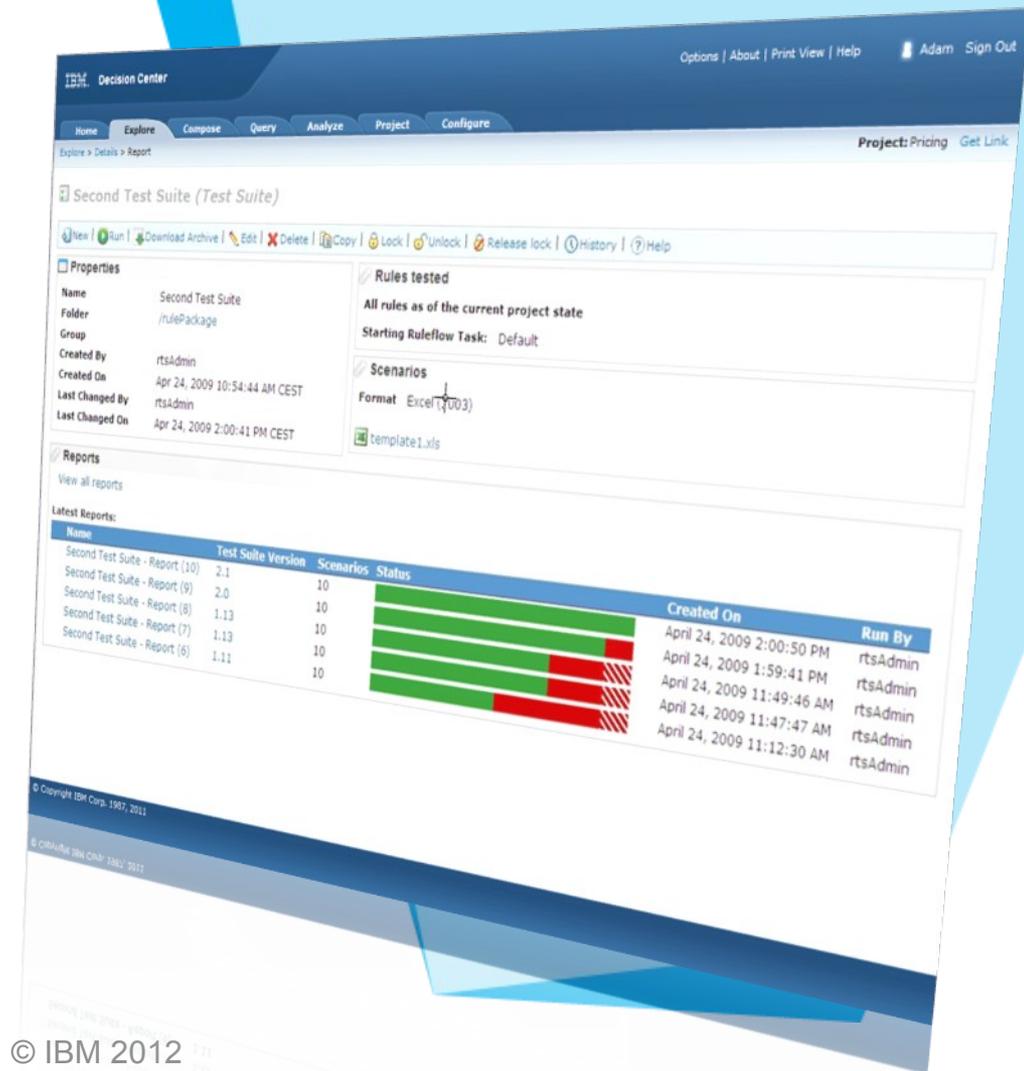

Business rules and events unified language : Provide a unique, easy to learn and to use language for capturing complex context and time based business decisions

Support for Business Led Testing & Simulation

Integrated decision validation services

- Out-of-the-box ruleset testing
- Business impact simulation
- Scenario configuration and customization
- Audit - Decision Warehouse

Support for Business Led Testing & Simulation

Champion and challenger capabilities

Rule Solutions for Office

Business user rule authoring & maintenance using Microsoft Office Word and Excel

- Line Of Business
- Subject Matter Expert

The Three A's of Operational Decision Management

dapt to change with increased speed & agility

- Intuitive natural language for specifying rules and events

Why Operational Decision Management and What Is it?

WebSphere Operational Decision Management:

Operational Decision Management Use Cases

Why IBM and What Next ?

Operational Decision Management Helps Solve Many Common Business Problems

Identify opportunities to increase profitability

Personalized Product Recommendations
Promotions & Loyalty Programs
Automated Sales Commissioning

Enforce consistency to ensure compliance

Claims Validation
Payment Authorization
Eligibility Determination

Leverage information to manage risk

Underwriting and Credit
Border Control
Physical Infrastructure Monitoring

The Power to *Adapt*

Respond to change with increased speed & agility

- Decision logic is defined in non-technical, **intuitive language** appropriate for business people
- Business experts can author, improve and validate decision logic through **user-friendly tooling**
- **Deploy once** and changes are immediately available for processes and business systems across the enterprise

Visa Europe responds to new regulations, unifying 36 diverse currency markets with over 60 rules changes in 13 months

The Power to *Align*

Improve decision collaboration with enhanced visibility & governance

- Streamlined cross-team collaboration which **improves communication** and eliminates misinterpretation risks
- Simplified decision auditing, and change control through an **easy-to-use governance** allowing to meet changing requirements
- Management of business rules and events in a unified environment **enhances visibility and control**

***BeneCard** improves speed-to-market by 70% and reduces processing time by 30% with tools that enable collaboration between business and IT*

The Power to *Act*

Automate real-time actions with high performance & reliability

- Detect and **react in real-time** to critical business situations
- Leverage specific context and predictive models to **customize decisions** resulting in increased accuracy
- Deploy to a scalable runtime engine capable of handling high volume **mission-critical decision services**

Swiss Customs streamlines tariff processing and border control by pre-validating over 200,000 customs declarations daily

dapt to change with
increased speed & agility
*Intuitive natural language for
specifying rules and events*

lign business units and IT with
enhanced visibility & governance
*Integrated repository for reliable
versioning and change control*

ct in real-time with
high performance & reliability
*Robust runtime for mission-critical
deployment*
