

Dennis Wunder has been with IBM for 32 years. He is currently an Executive IT Specialist with the Executive Briefing Center at Poughkeepsie, and has been briefing IBM's customers from around the world for the past 23 years. Dennis has expertise in many areas, including z/VM, z/OS, Linux, IBM Middleware, Networking, and Desktop operating systems. He explains the business value of new technologies with an easy to understand, common sense manner.

Dennis has designed and delivered hand on workshops which introduce IBM's clients and Business Partners to IBM's new technologies. The workshops were adopted by IBM's Learning Services and Technical Sales support and have become world wide offerings. He has lead on several successful proof of concept projects and solution design workshops with IBM's clients. He enjoys sharing his experiences and explaining how IBM Strategies provide solutions to challenges we all face today. Dennis is currently focused on creating flexible, cost effective infrastructures through Smarter Virtualization.

Dennis interacts annually with hundreds of IBM's customers. His technical expertise and broad experience with customers make him a valued resource within IBM; he is frequently called upon to meet onsite with customers or to present at national and international events.

Previous to joining the Briefing Center, Dennis worked in IBM Development in Endicott, as an instructor in IBM's Chicago Education Center, as a Program Support Representative (PSR) around Wall Street in lower Manhattan, and as a Customer Engineer (CE).
