## The *Exceptional* Web Experience

*Considerations and Trends in Sustainable Multi-Channel Web Experiences*

#ibmsocialbiz

# The *Exceptional Web Experience*

## Why now?

Why is there so much **WW investment** in xWebX in 2012?

## The *Exceptional Web Experience Challenge*

*How to reach all channels (customers, partners/suppliers, employees) across different devices and sites?*

Why is there so much **WW investment** in xWebX in 2012?

Why Now?

## #1 Infrastructure Complexity

*With a traditional, "build-it-yourself" approach to multi-channel management, each existing, in-process, or future web or mobile channel represents:*

- Request for Information (**RFI**)
- Vendor/BP solution **briefings**
- Request for Proposal (**RFP**) or Tender
- Complex proposal/solution **evaluations**
- IT/LoB budget **negotiations**
- Time consuming **politics**
- Vendor **selection**
- Complex **procurement** phase
- ...

The time from identified business need to solution deployment is ***unacceptable***

Why Now?

## #1 Infrastructure Complexity (cont'd)

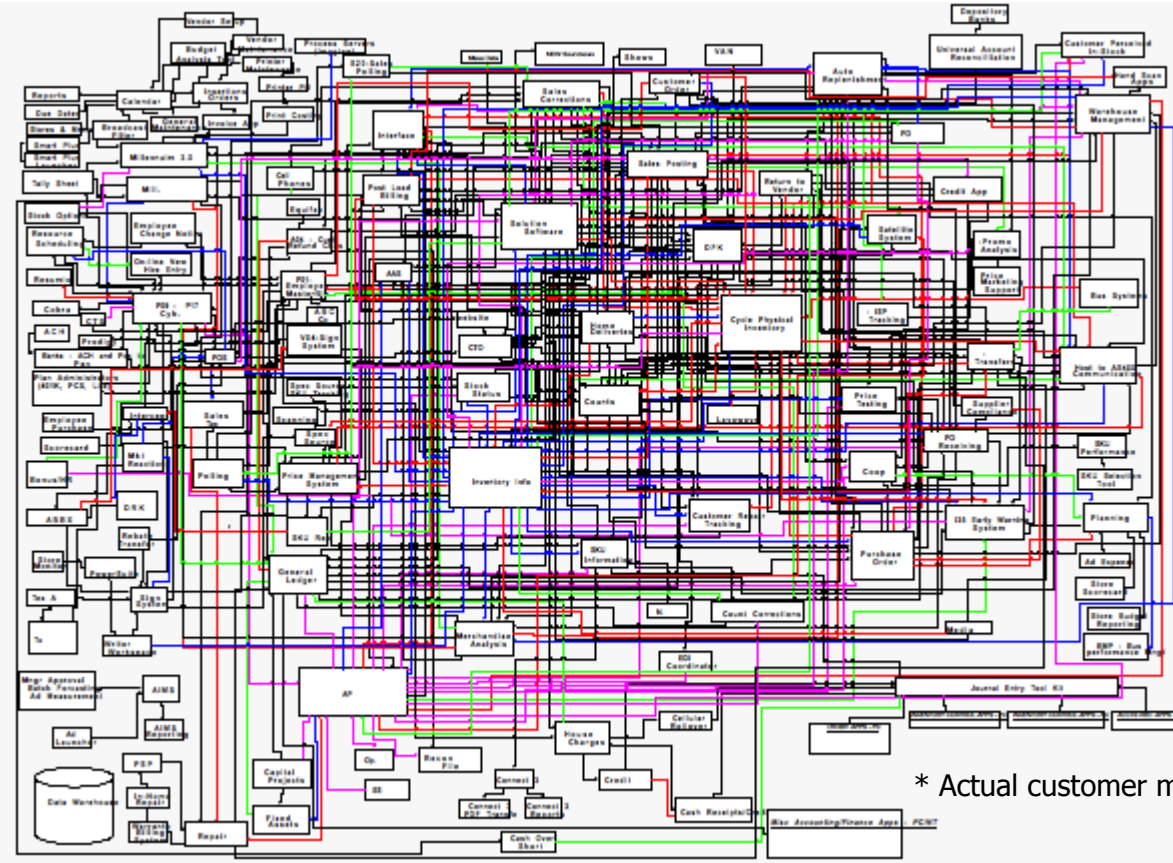

A traditional, "build-it-yourself" approach to multi-channel management **inevitably** results in:

- Disparate **environments**
- Slow **initial deployments**
- Complex **upgrades**
- A need for highly **specialized skills**
- Gross **version dependencies**
- Server/application **availability** problems

Meanwhile, each new channel/device is driving **increased complexity**

Why Now?

## #2 Out of Control Costs

# 76%

“76% of IT budgets today are spent on maintenance, leaving only 24% for new investments”

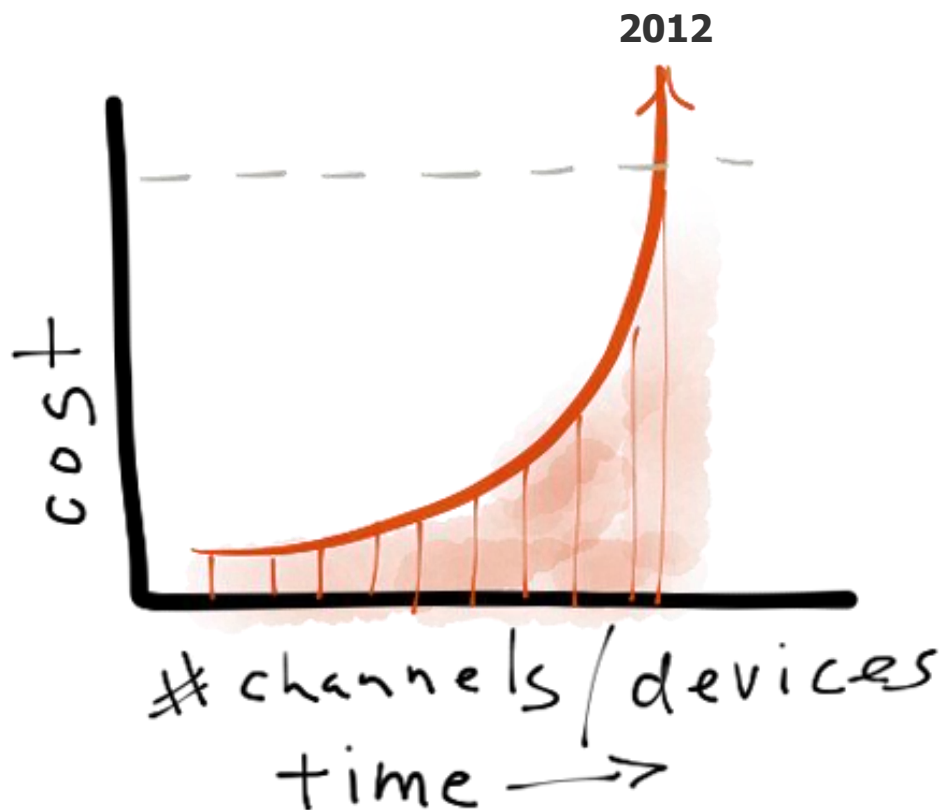

Forrester Research

\* Actual customer multi-channel topology

What happens when this number reaches 80%, 90%, 95%? Right, **game over.**

Why Now?

## #2 Out of Control **Costs** (cont'd)

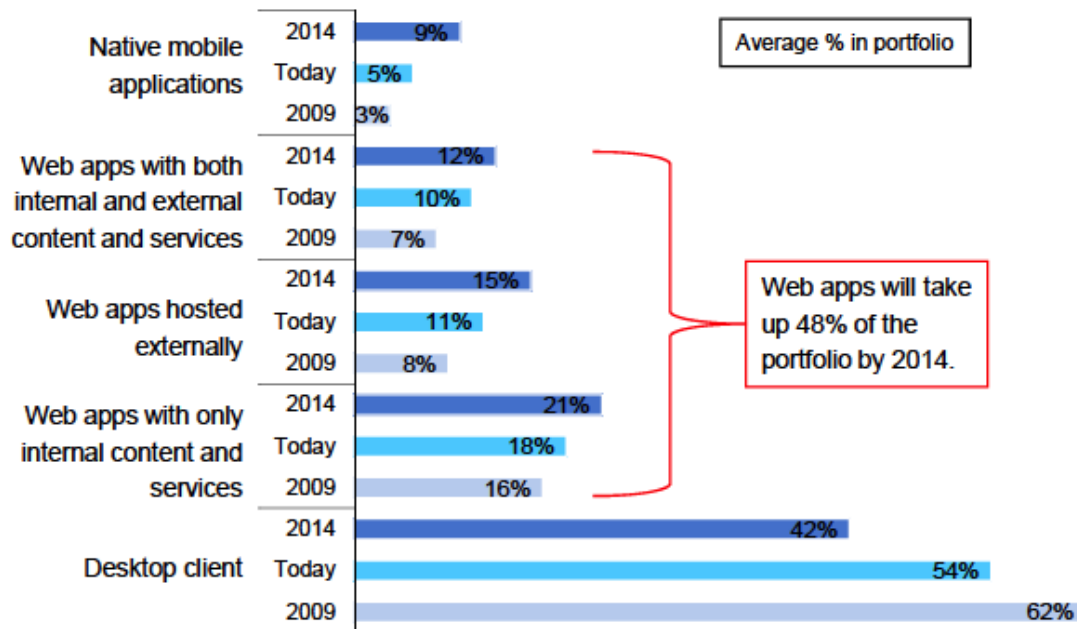

*In 2012, the cost of maintaining a traditional, "build-it-yourself" multi-channel environment has **finally** caught up with us ...*

This problem has developed over many years but has become **acute in 2012**

Why Now?

### #3 Significantly Increased Demand

*By 2014, nearly **50% of all applications** supported by IT will be web or mobile-web (up from 39% in 2009)*

Forrester Research: "A Tidal Wave of Dynamic Web Content Is Coming — How Will You Respond?" (March 2012)

How will you cope with **demand growth** for web & mobile channels?

*Why Now?*

## #4 Quantifiable **Opportunity**

- *An "Exceptional Web Experience" provides \* :*
  - **400% higher** visit-to-lead conversion rate
  - **200% higher** visit-to-order conversion rate
  - **41% lower** page abandonment rates
  - **16.6% more** customers who are likely to recommend products and services
  - **15.8% fewer** customers lost to competitors
  - **14.4% more** customers who show repeat purchase interest

\* Forrester Research: Best Practices In User Experience Design (September 2011)

For an increasing number of businesses, web/mobile is their ***primary route to market***

Why Now?

## #5 *Technical* problem = **Business** problem

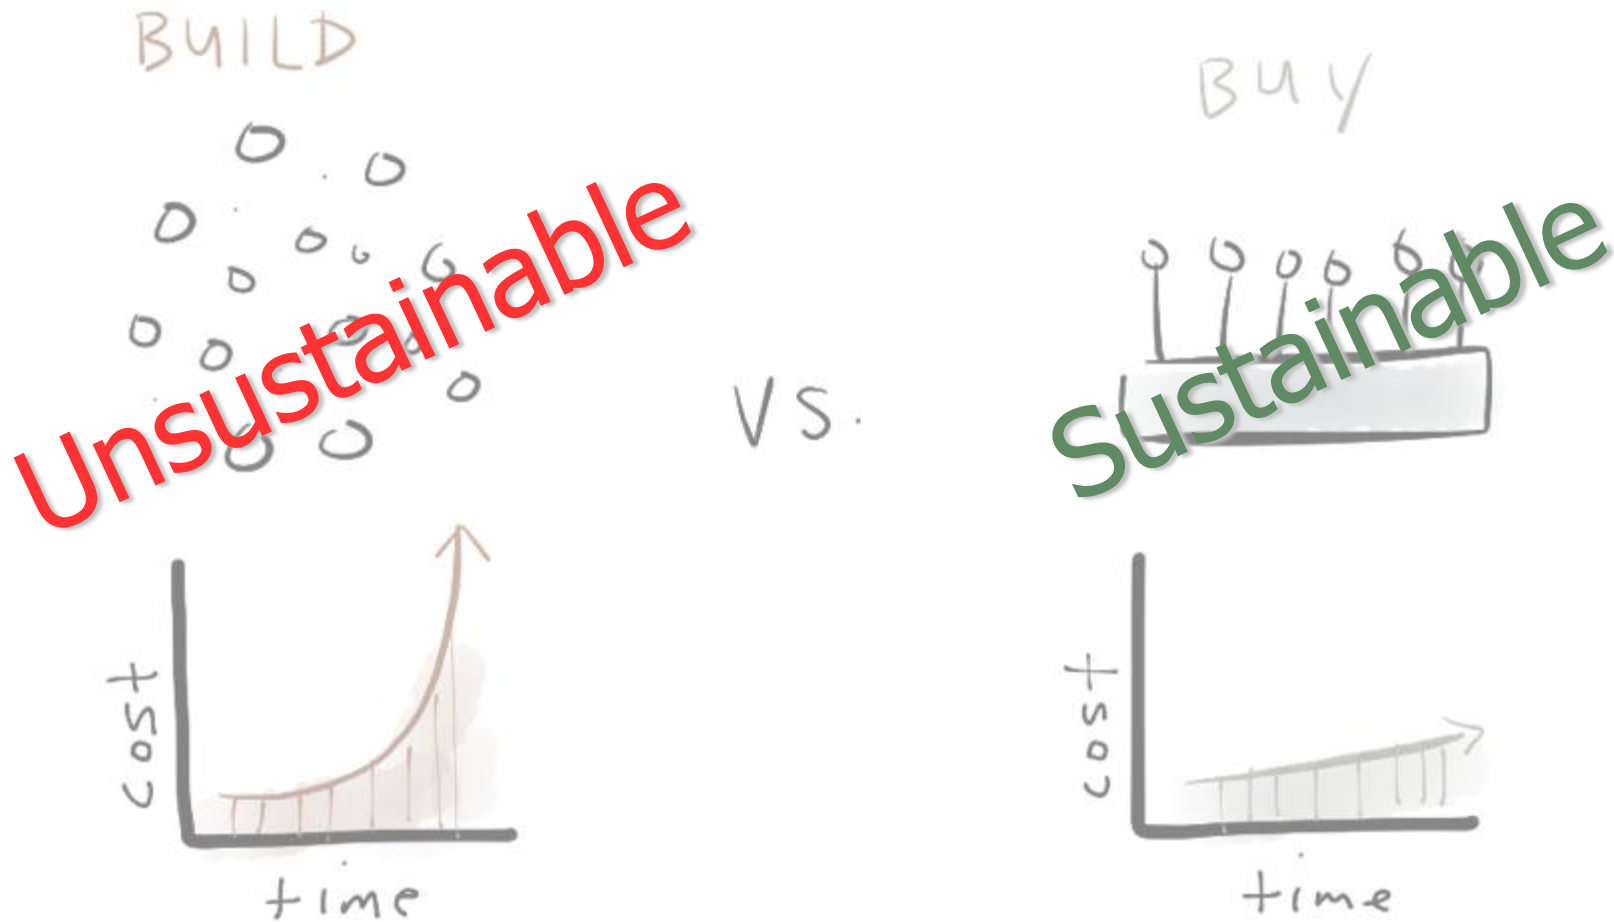

*In 2012, what was a **technical problem** has become an urgent business problem ...*

- No **360° view** of the customer
- No *consistent* **view of YOU** to your customers and partners
- No capacity to meet accelerating business need for **new channels/devices and updates/improvements**

To compete, LoB will need increasingly exceptional **web & mobile channels**

Why Now?

But really, it comes down to this ...

The key is to use a budgeted project to **start bending the cost curve**

## Choose "Buy" ... It's the *right* move

*A modern, purpose-built, **multi-channel** management infrastructure solution offers:*

- **29% lower** 5-year TCO for web/mobile apps \*
- **38% lower** labor costs for web/mobile apps \*
- Every \$1 spent on IBM xWebX = **\$4.80 in labor cost avoidance** \*
- **45% faster** initial deployments \*
- **78% faster** subsequent deployments \*
- **28% increase** in server/application availability \*

\* IDC: "The IBM [xWebX] Advantage" (August 2010)

Invest in IBM xWebX and start moving toward **sustainability**

# Demonstration

## IBM's Exceptional Web Experience portfolio The most widely used in the world today

Over 11,000 WW customers with customer facing apps and socially-enriched intranets, B2B, B2C, B2E applications

Industry leading Web analytics integration

80% of all transactions on the Web go through IBM middleware software

#1 in BPM market share with over 5,000 customers

#1 Enterprise Social Software market share with IBM Connections

#1 market share for Portals for 11 years running

WebSphere Commerce Market Leader in Forrester and Gartner ranking

Most customers in Top 100 Internet Retailers

### Globally...

9 of top 10 Global banks  
9 of the top 10 European banks  
10 of the top 10 US banks  
7 of top 10 Global P&C insurance  
8 of top 10 Global Life Insurers  
8 of top 10 retailers  
12 of the largest telcos  
50 major health providers  
500 gov'ts + every G8 nation

Over **300 million** named users in our top 15 xWebX customers alone

**1 in 6 people worldwide** with internet access is a named user in an IBM xWebX application
