Aligning IT and business goals

Omar S. Peña

omarpena@cn.ibm.com

Cloud Solution Growth Initiative Leader

IBM Growth Markets

Business has reached an inflection point.

The rapid emergence of **new technologies and ways of working** is challenging traditional computing models—and, by extension, the business models they enable.

Rethink IT

Reinvent Business

Cloud enables new business value and models: Speed, agility, innovation, monetization, global

Save and simplify:
Reduce IT expense, complexity, and risk

Speed:
Accelerate time to market with rapid scalability

Agile:
Easily access or deliver and manage mobile apps & devices

Innova
Support new business models and monetization

Four major categories of cloud computing services have emerged that transform how IT services can be consumed

Software as a Service

- Collaboration
- Analytics
- ERP/SCM/CRM
- Core Banking
- Industry applications

Business Process as a Service

- Industry-specific processes
- Employee benefits management
- Business travel
- Procure

Infrastructure as a Service

- Servers
- Storage
- Network
- OS, Virtualization
- Dynamic provisioning
- Security

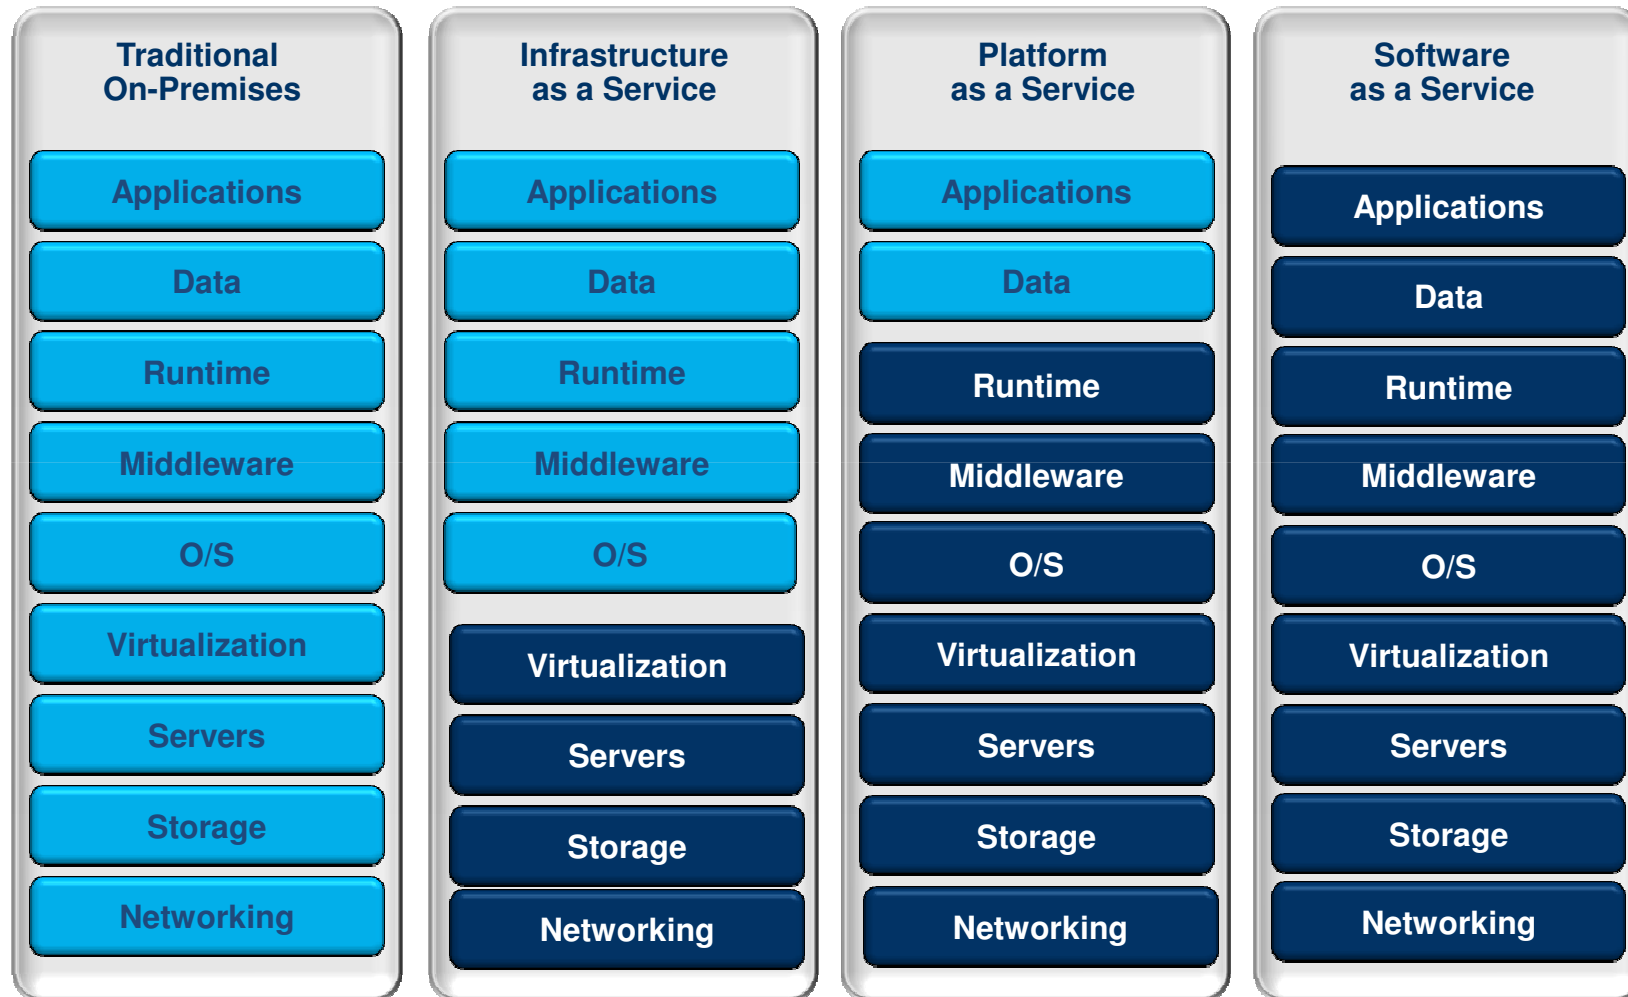

Platform as a Service

- Middleware
- Database
- Development tools
- Web Application
- Backup/Restore
- Security

With cloud, IT resource consumers have the opportunity to apply any or all of these types of services

Clients cost benefits increase as you move to the right...

Clients are choosing a variety of cloud models to meet their unique needs and priorities

Private cloud

On or off premises cloud infrastructure operated solely for an organization and managed by the organization or a third party

Public cloud

Available to the general public or a large industry group and owned by an organization selling cloud services

Hybrid IT

Traditional IT and clouds (public and/or private) that remain separate but are bound together by technology that enables data and application portability

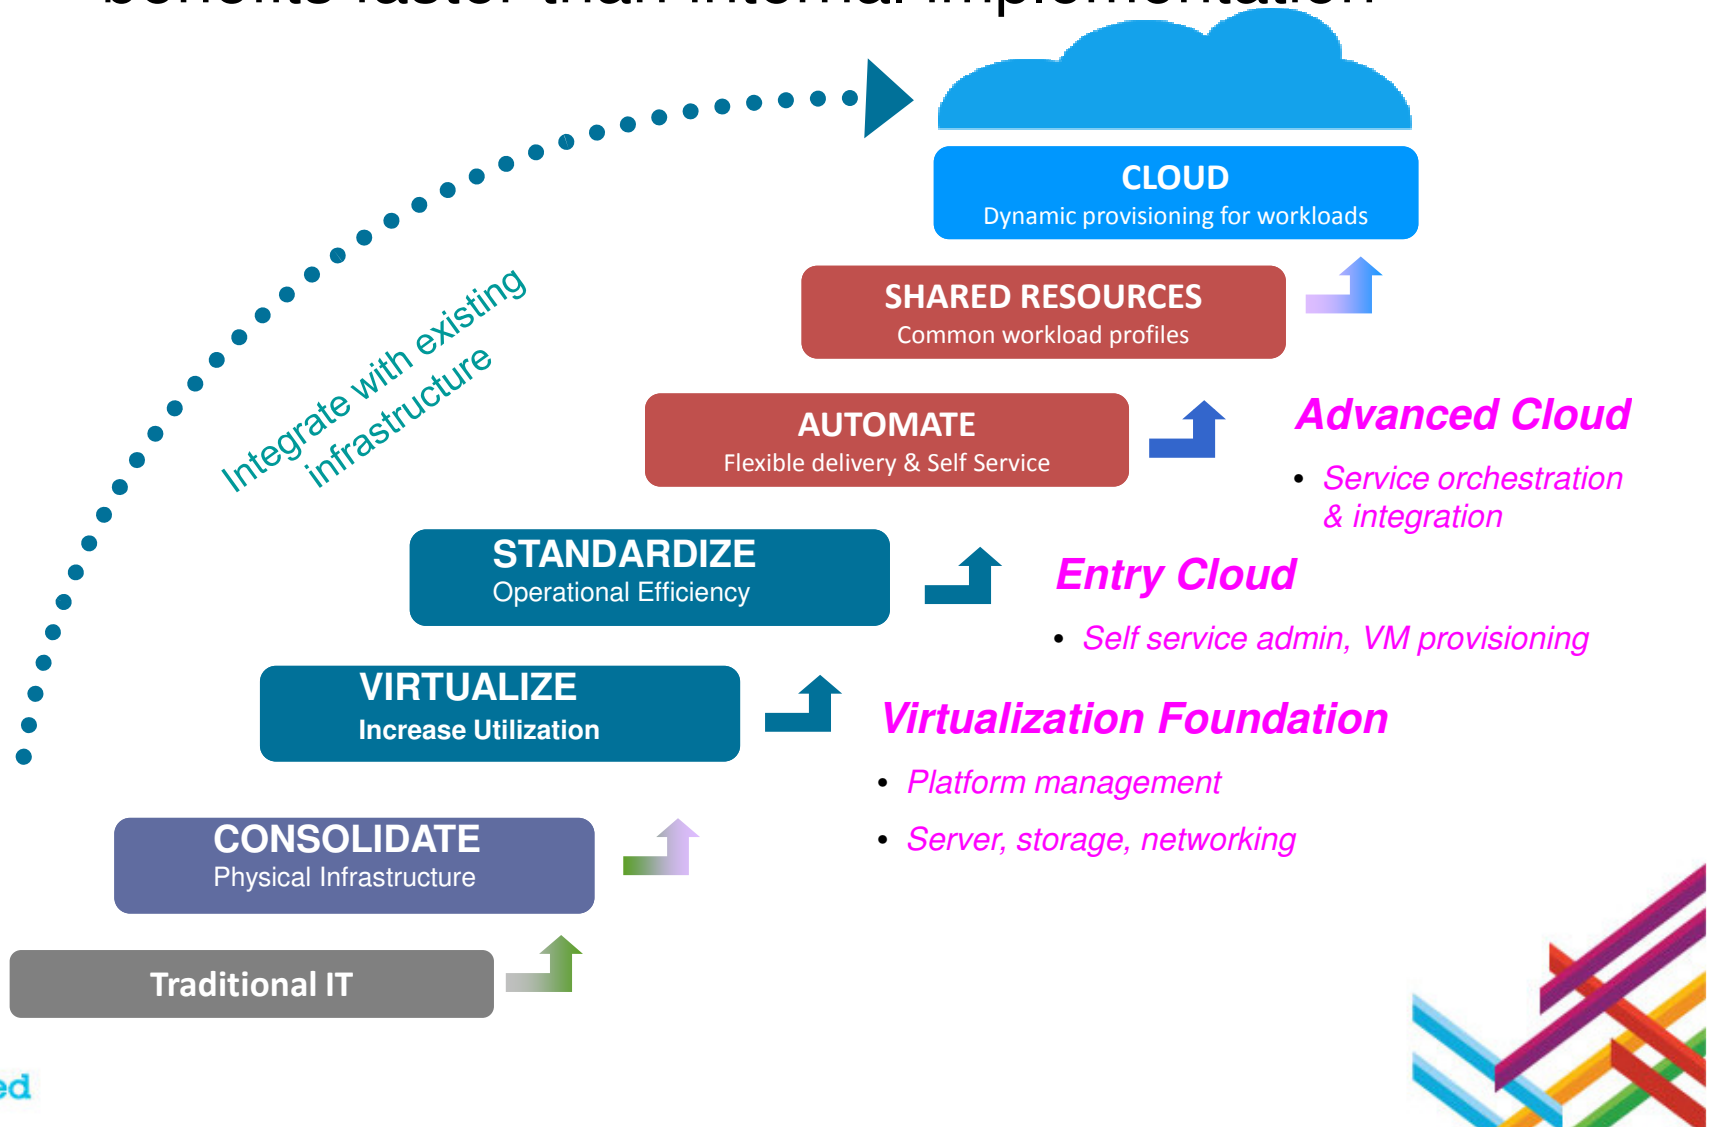

Traditional IT

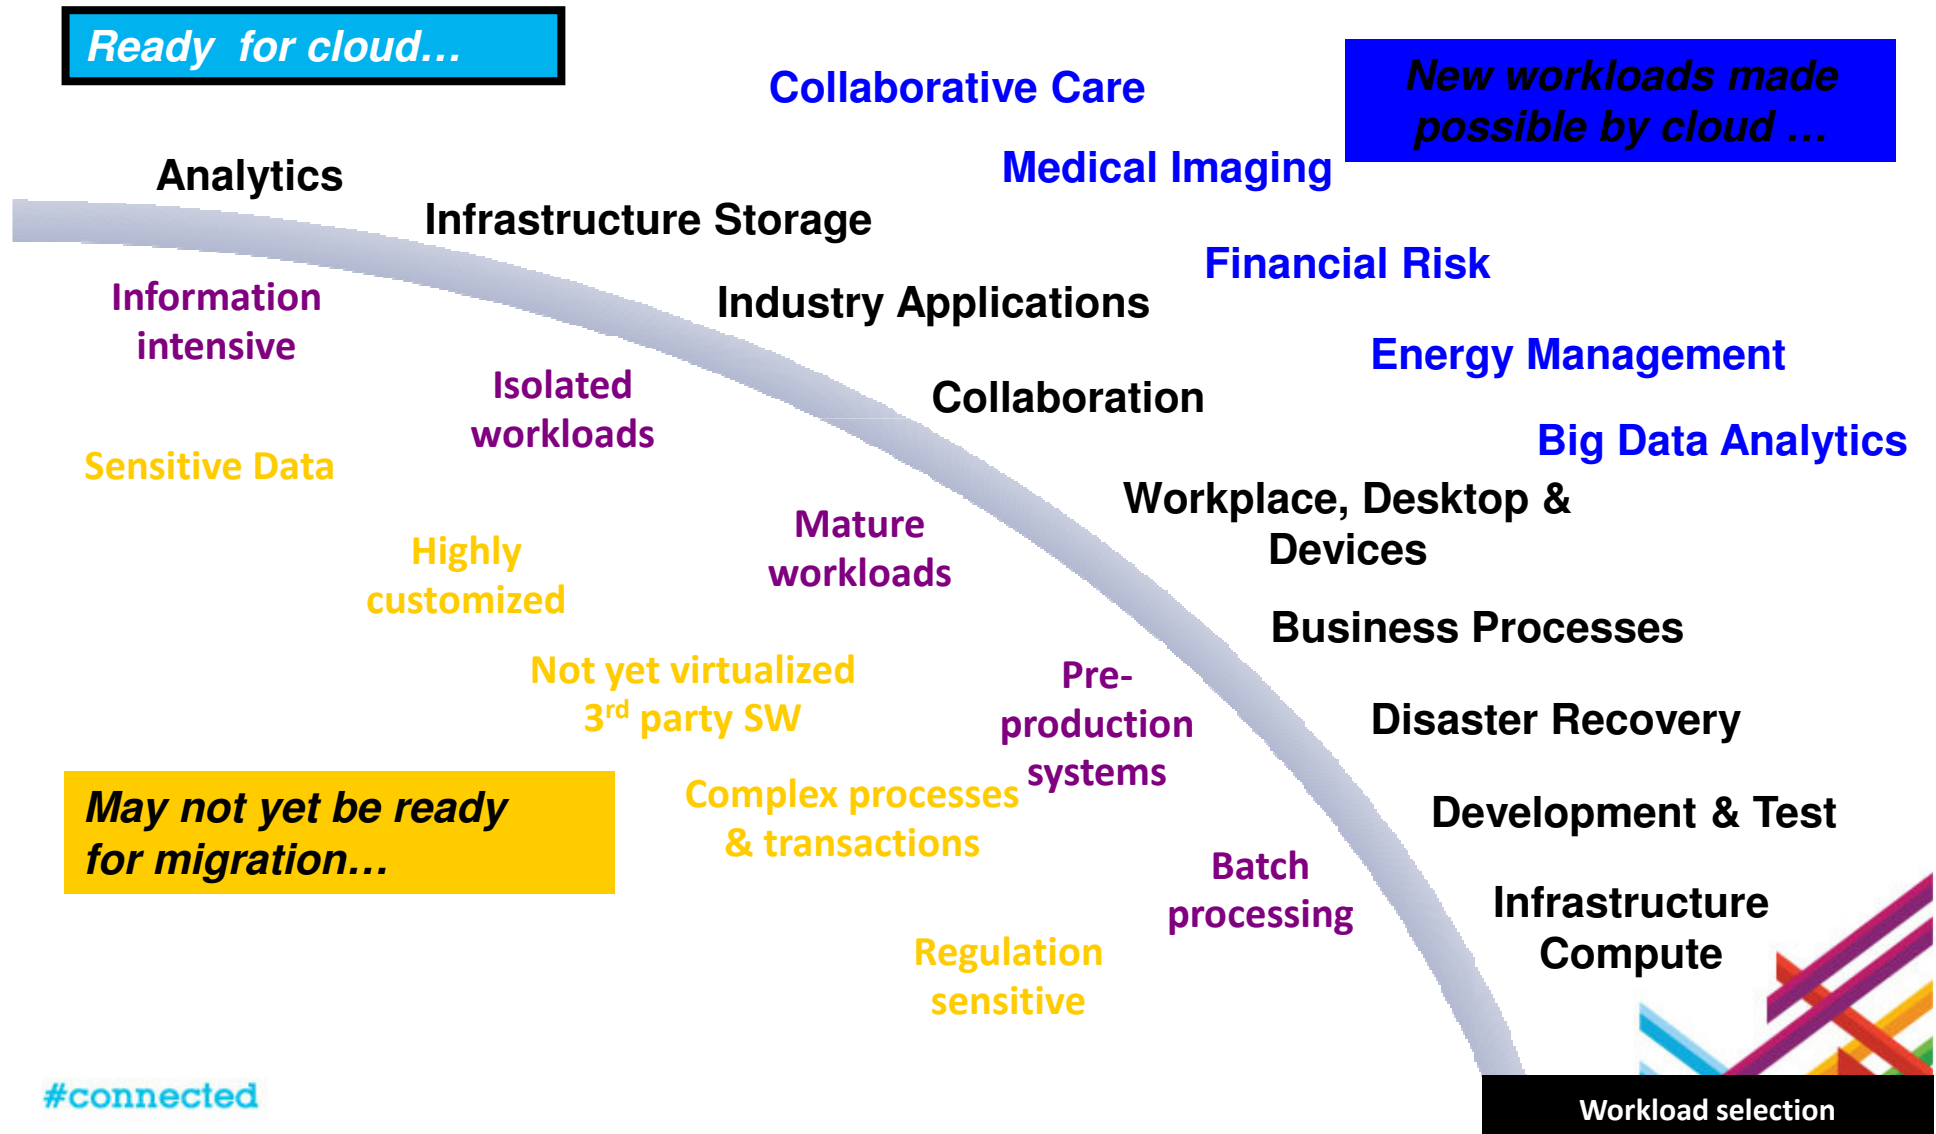

Appliances, pre-integrated systems and standard hardware, software and networking.

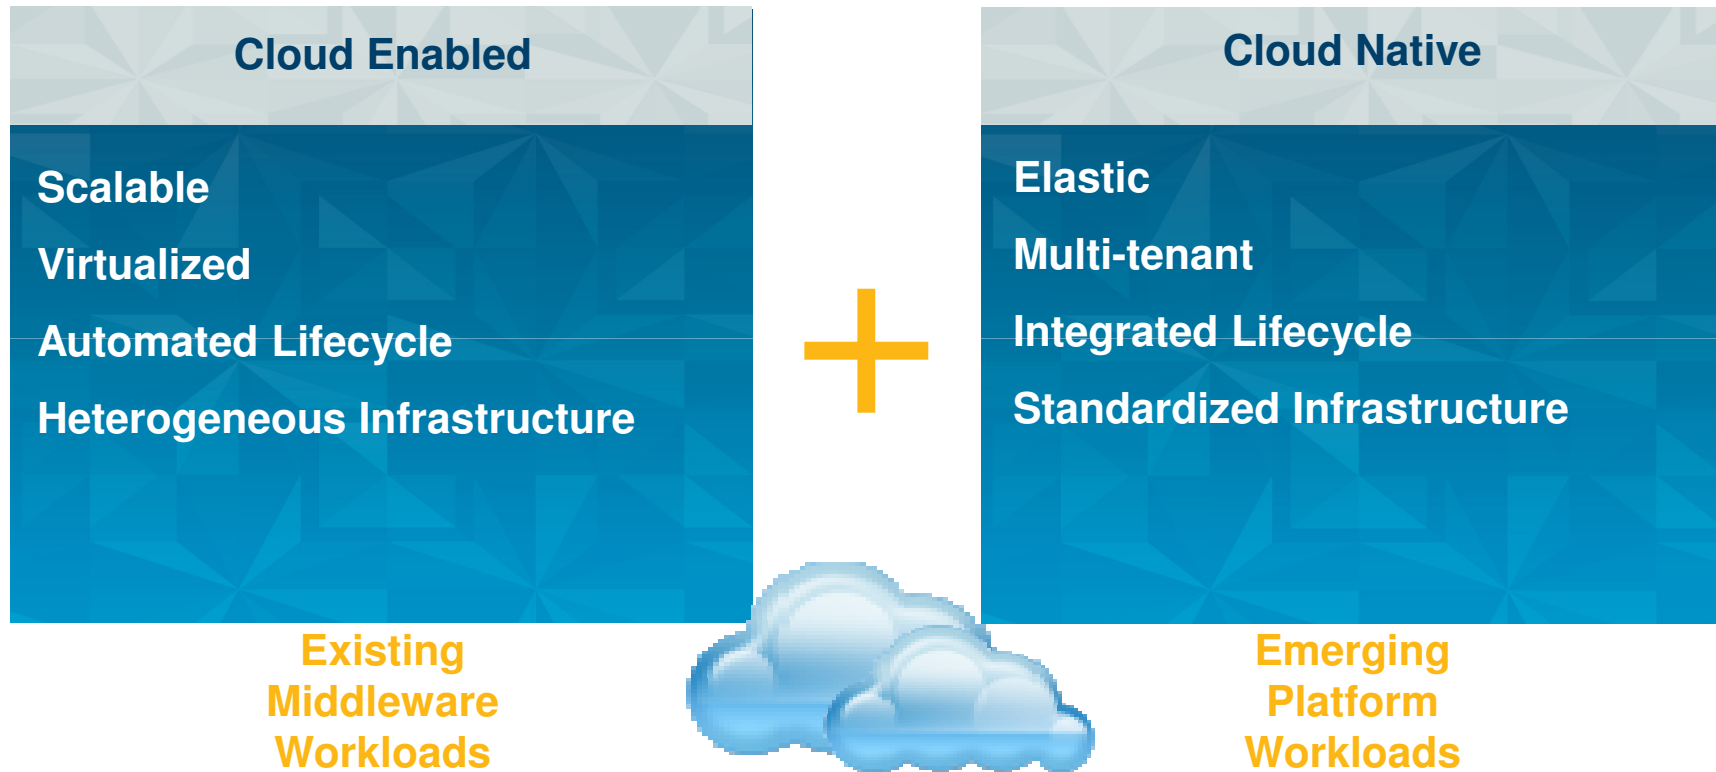

Moving selected workloads to public cloud could gain benefits faster than internal implementation

Workloads Matter: Cloud adoption driven by workloads

Two major application deployment models have emerged in cloud adoption

Compatibility with existing systems
“Systems of Record”

Exploitation of new environments
“System of Engagement”

IBM's strategy and portfolio is designed to help clients adopt cloud models that best meet their unique requirements

IBM has the hardware, software, services, research and delivery capabilities to address both new cloud applications and traditional IT to cloud transformations

IBM SmartCloud Services: High-value cloud services and capabilities on an enterprise-class delivery platform

IBM SmartCloud Services

- Secure & scalable cloud managed services platform
- Consume new & existing IT capabilities

SmartCloud Services

Application Services

Enterprise PaaS with unprecedented choice in the development, deployment and management of applications

Enterprise Enterprise +

An IBM hosted **IaaS** with enterprise-class governance, administration and management control

Multiple **IBM hosted** delivery models allow clients to optimize against economics, integration, security and control

IBM SmartCloud infrastructure services help customers align infrastructure to meet their business needs

IBM SmartCloud Enterprise

- More agile infrastructure as a service
- Faster access to enterprise cloud environments
- Suited for development, test activities and moderate-risk applications
- Self-service cloud-based object storage capabilities

IBM SmartCloud Enterprise+

- IBM managed cloud
- Helps drive business value, competitive advantage
- Helps reduce operational risk
- Runs production workloads, including SAP applications

IBM SmartCloud provides high levels of security, reliability and control

Security. IBM SmartCloud Enterprise/+ includes enhanced physical security, intrusion protection systems and vulnerability scanning.

Reliability. IBM SmartCloud Enterprise/+ based on the IBM Tivoli® management platform with around-the-clock monitoring and management of the infrastructure to help enable us to build resiliency into your cloud server environment.

Control. The web-based SmartCloud Enterprise/+ service management platform can enable authorized users to log on at any time from any place to monitor, manage and control the virtual environment.

IBM SmartCloud is changing the dynamics of managing mission critical applications like SAP

Traditional SAP environments can struggle with:

- Long installation times for new products
- Significant resources spent on re-provisioning and moving systems for weeks of work
- Proliferation of non-production SAP systems to keep up with development demand and short cycle times
- SAP landscape, with dependencies between and within, can be layered and complex

Cloud & Lifecycle as a Service for SAP provides:

- Increased savings
- Speed of implementation
- Improved quality
- Greater resiliency
- Faster system responsiveness
- Higher satisfaction from IT and business users

...soon to include similar capability with Oracle Applications

Leveraging cloud to rapidly deploy complex business critical solutions like SAP

Rethink IT

Began with a private cloud platform based on consolidation, virtualization and standardization technologies to create a dynamic infrastructure.

- Move to SCE+ and SC4SAP to leverage cost efficiencies of converged management and shared infrastructure resources

Reinvent business

- Increased market velocity for development and deployment of new services for the business and in support of partner ecosystem.
- Cloud helps enable a new business

*Ineos USA, LLC
increased
flexibility with a
multi-year
projected savings
of over 20%*

IBM SmartCloud Solutions: A suite of software capabilities available on cloud

IBM SmartCloud Solutions

- Pre-built cloud software & business process as a service applications

- Consume new business capabilities

Deliver Business Analytics

Accelerate Business Process Innovation

Connect People with Collaborative Business Networks

IBM SmartCloud for Smarter Commerce helps companies accelerate their ability to transform how they buy, market, sell and service goods and services with customers and suppliers

IBM SmartCloud for Social Business is an enterprise-grade file sharing, communities, web meetings, mail and calendar for any organization, including unlimited guest access

IBM SmartCloud for Smarter Analytics helps companies accelerate their ability to turn information into insights

IBM SmartCloud for Smarter Cities helps cities of all sizes leverage information, anticipate problems and coordinate resources to deliver exceptional service to their citizens – with cloud-based integrated operation centers, transportation and water

Intelligent Operations Center

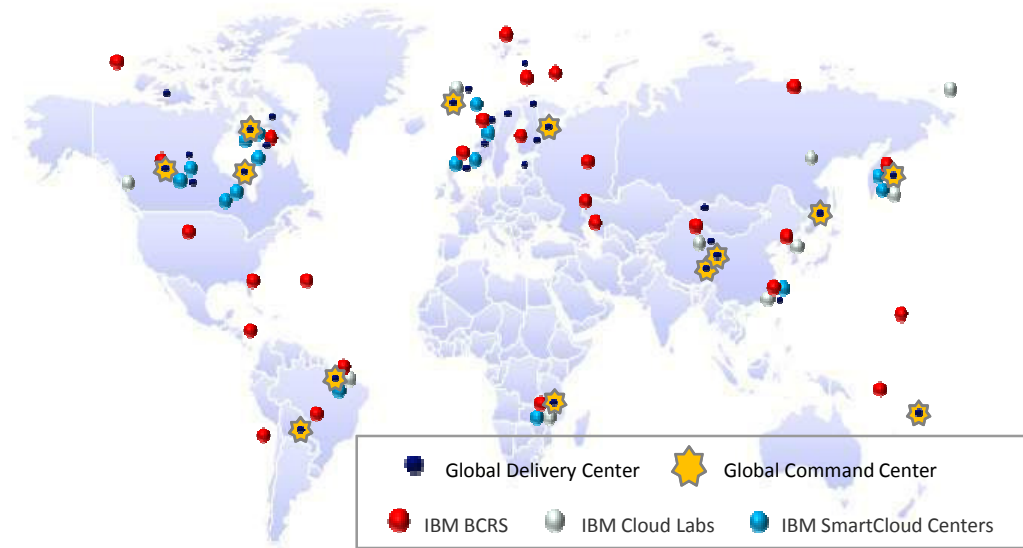

IBM offers expertise to help you leverage cloud to accelerate business performance globally...

Experience gained as one of the world's largest managers of IT infrastructure...

Thought leadership in cloud design, implementation, service delivery, management & consulting

IBMSmartCloud

Solutions

A retailer increases online revenue by 2500% thanks to cloud-based analytics

The need:

- Customers becoming overwhelmed with promotional emails
- Needed marketing segmentation strategy that would improve the value from email campaign

“By segmenting visitors based on behavior and tailoring email content accordingly, we are able to deliver highly personalized messages that generate much higher open rates, conversion rates and revenue per email. Instead of trying to second-guess our customers, we can present them with offers that we know will interest them.”

—Director of Ecommerce, L' OCCITANE

The solution:

- IBM Cloud-based Analytics solution that allowed them to send highly targeted messages through permission based emails
- Profiles are continuously built and refined as new data is collected

Benefits

- Online revenue has skyrocketed by nearly 2,500 percent and conversion to sale by almost 1,700 percent.
- Targeted messaging has led to a 65 percent higher email open rate and 6.5 times higher unique click rates.
- Improved agility to respond more quickly to changing market conditions

Using deeper insights to create a permanent connection to the brand

The need:

- Transition business from print-only to digital media company
- Optimize effectiveness of online content to drive new registrations
- Increase traffic from external pages and syndicated content to boost commerce revenue and conversions

The solution:

- IBM Core metrics Web Analytics and Digital Marketing Optimization Suite to optimize the performance of online content and downloads

Benefits

- Ecommerce revenues have grown twentyfold over 3 years
- Registrations from downloads grew 72% for Men's Health and 92% for Women's Health
- Insight into performance of external links improved site traffic: 45% growth in click-through rates, 92% increase in page views and 72% growth in user sessions

TPVISION is creating new opportunities through innovative business models

The need:

- Transform [TP Vision](#) JV from TV manufacturer to modern consumer electronics provider
- Enable the emergence of new “intelligent” consumer services

“IBM’s cloud platform allows us to place the service and application intelligence into the cloud, and reduces the complexity of managing software in the TVs for our consumers”

- Albert Mombarg, head of Philips Smart TV at TP Vision

The solution:

- Service delivery platform based on IBM SmartCloud
- Add new content, services and applications to new Internet TV platform

Benefits:

- Broadens business model from producing devices to delivering services
- Deeper customer relationships through tailored content and new value-added services
- Flexible pricing model that scales as the business grows, while maximizing profit.

Cloud in Action: UNITEC - higher education

The need:

Achieve 5 year Plan

Scalable, flexible IT platform

Develop test and Administer educational programs

The solution:

Smart Cloud scalable IT resources

Intuitive Scalable Portal

Opex Infrastructure Model

Benefits:

- Delivers cost-effective IT capabilities without the capital expense and maintenance of an on-site data center infrastructure
- Speeds development and test activities through an intuitive, scalable cloud-based portal
- Provides remote support, improving ease-of-use and expediting problem resolution

Cloud in Action: Real clients .. with real results

	TPVision	Rodale	RIO 2016
The Need	<p>Transform TP Vision JV business model</p> <p>Enable new “intelligent” consumer services directly to the consumer</p>	<p>Transition from print-only to digital media</p> <p>Drive new registrations</p> <p>Boost revenue and conversions</p>	<p>Modernize management of aging infrastructure</p> <p>Extend component life</p> <p>Address customer satisfaction</p>
The Solution	<p>Extend new service capability and platform with IBM SmartCloud</p> <p>Add new content, services and applications to new Internet TV platform</p>	<p>IBM Coremetrics Web Analytics and Digital Marketing Optimization Suite to</p> <ul style="list-style-type: none"> ▪ Optimize online content ▪ Grow audience size ▪ Increase online revenues 	<p>Integrated over 30 city agencies</p> <p>Collect and share real time information</p> <p>Use advanced analytics to predict rainfall and its impact</p>
The Benefits	<p>Deeper customer relationships</p> <p>Flexible pricing model</p> <p>Management of millions of connected devices</p>	<p>E-commerce revenues up 20X over 3 years</p> <p>Registrations from downloads grew 70%</p> <p>Page views up 92%</p>	<p>Deploy resources within hours, instead of days, saving lives</p> <p>Share information and synchronize rescue efforts</p>

Improving Fan's entertainment experience with a Smarter City cloud

The need:

- Create an exciting state-of-the-art fan experience
- Improve security and fan safety through real time crowd control

Integrate data to make real time adjustments to event management

Improve future event merchandising based on fan spending & preferences

The solution:

- IBM implemented Intelligent Operations Center for SmartCities running on IBM SmartCloud to:
 - Integrate disparate data sources from weather, traffic flow, parking, retail purchases, social media sentiment.
 - Collect and share information in real time.
 - Use advanced analytics to enable promotions, redirect traffic flow enabling staff to make adjustments based on real-time events

Enhanced fan experience

Improved security

What if your city's water system could alert you to take remedial action before an issue escalates?

City of South Bend sets the standard for cost savings, efficiency and innovation with its integrated, city-wide intelligent operations center

Rethink IT:

- A sophisticated **network of sensors** to measure and communicate the depth and flow of storm water throughout the 500-mile sewer system
- A unified view of the physical infrastructure to **monitor and predict** where sewage overflow is likely to occur.
- Optimized sewer system uncovered billions of gallons of additional capacity, to **avoid spending millions** in now-unnecessary infrastructure changes.

Reinvent government:

- Municipalities face spending billions to upgrade aging sewer systems to maintain drinking water quality and to protect public health.
- This city— **the world's first to monitor and control its combined sewer overflows using technology hosted in IBM's SmartCloud**

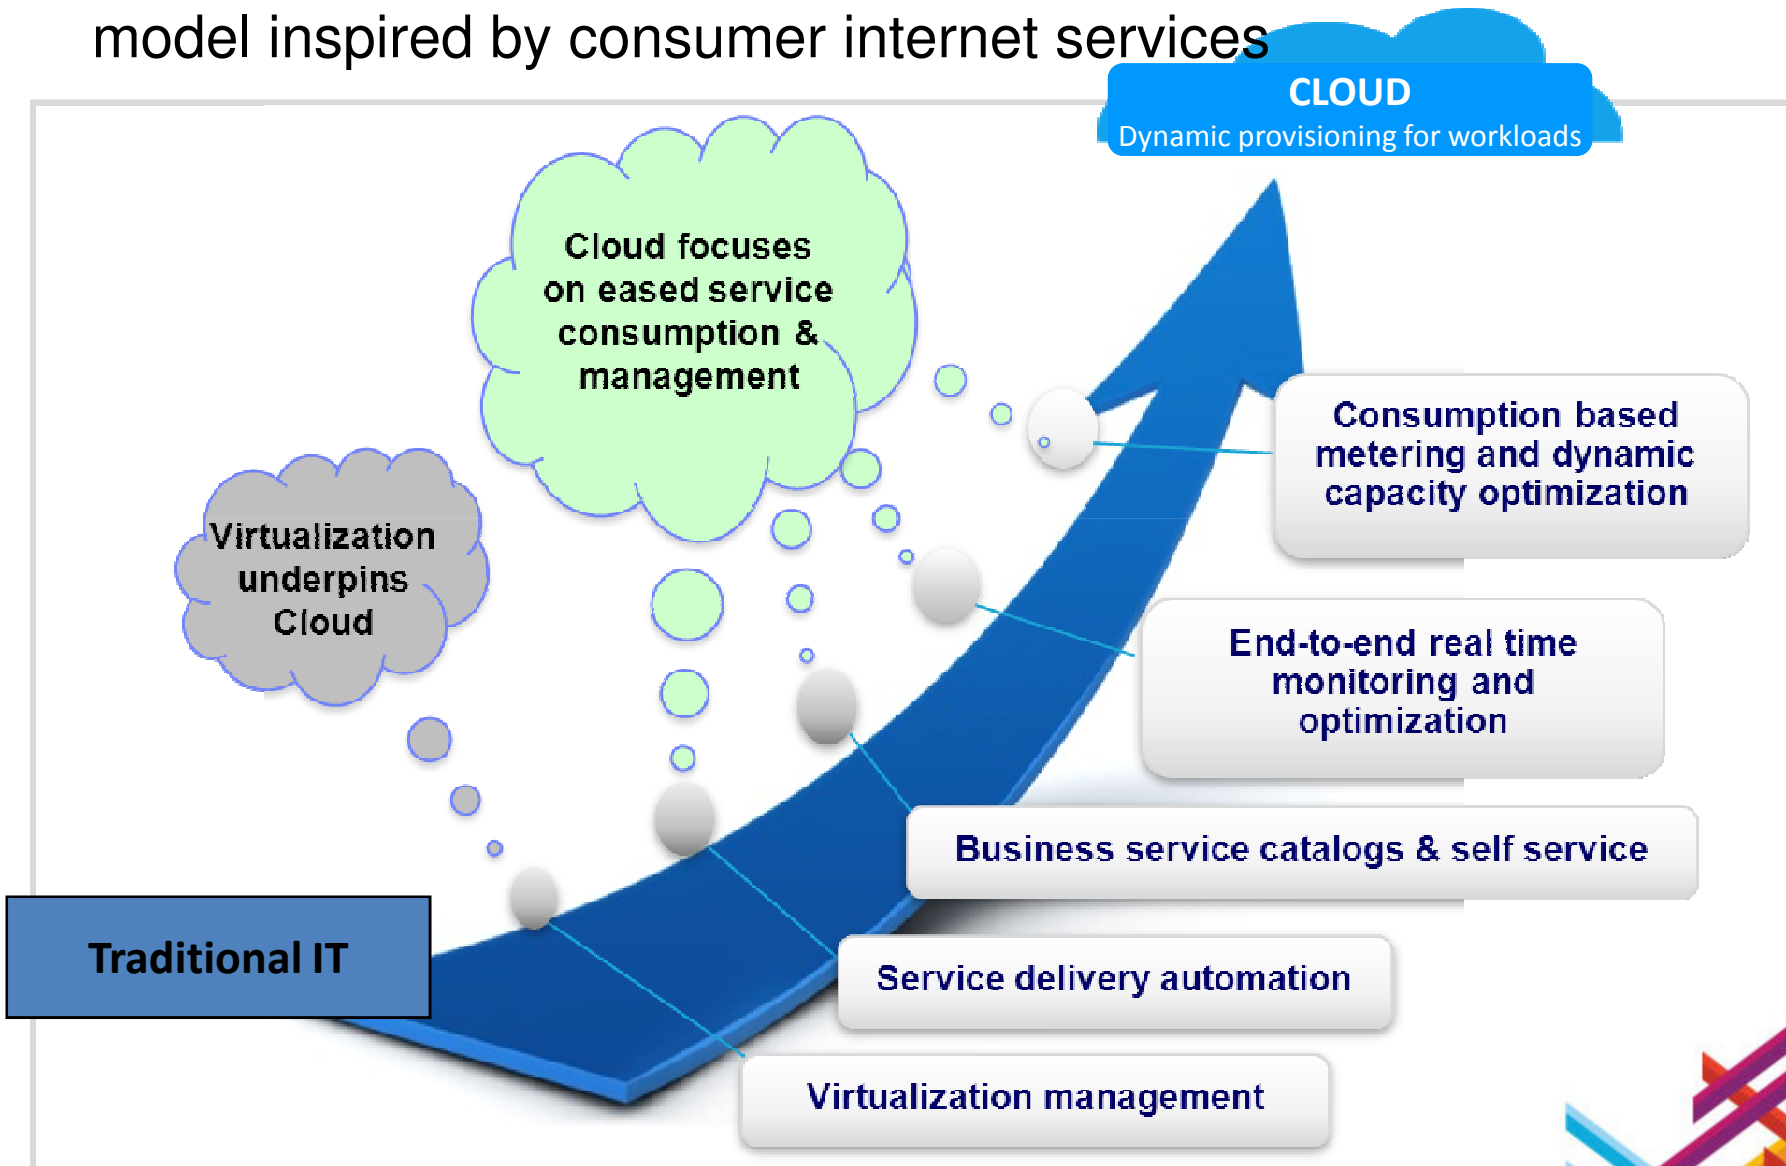

Real Business Results

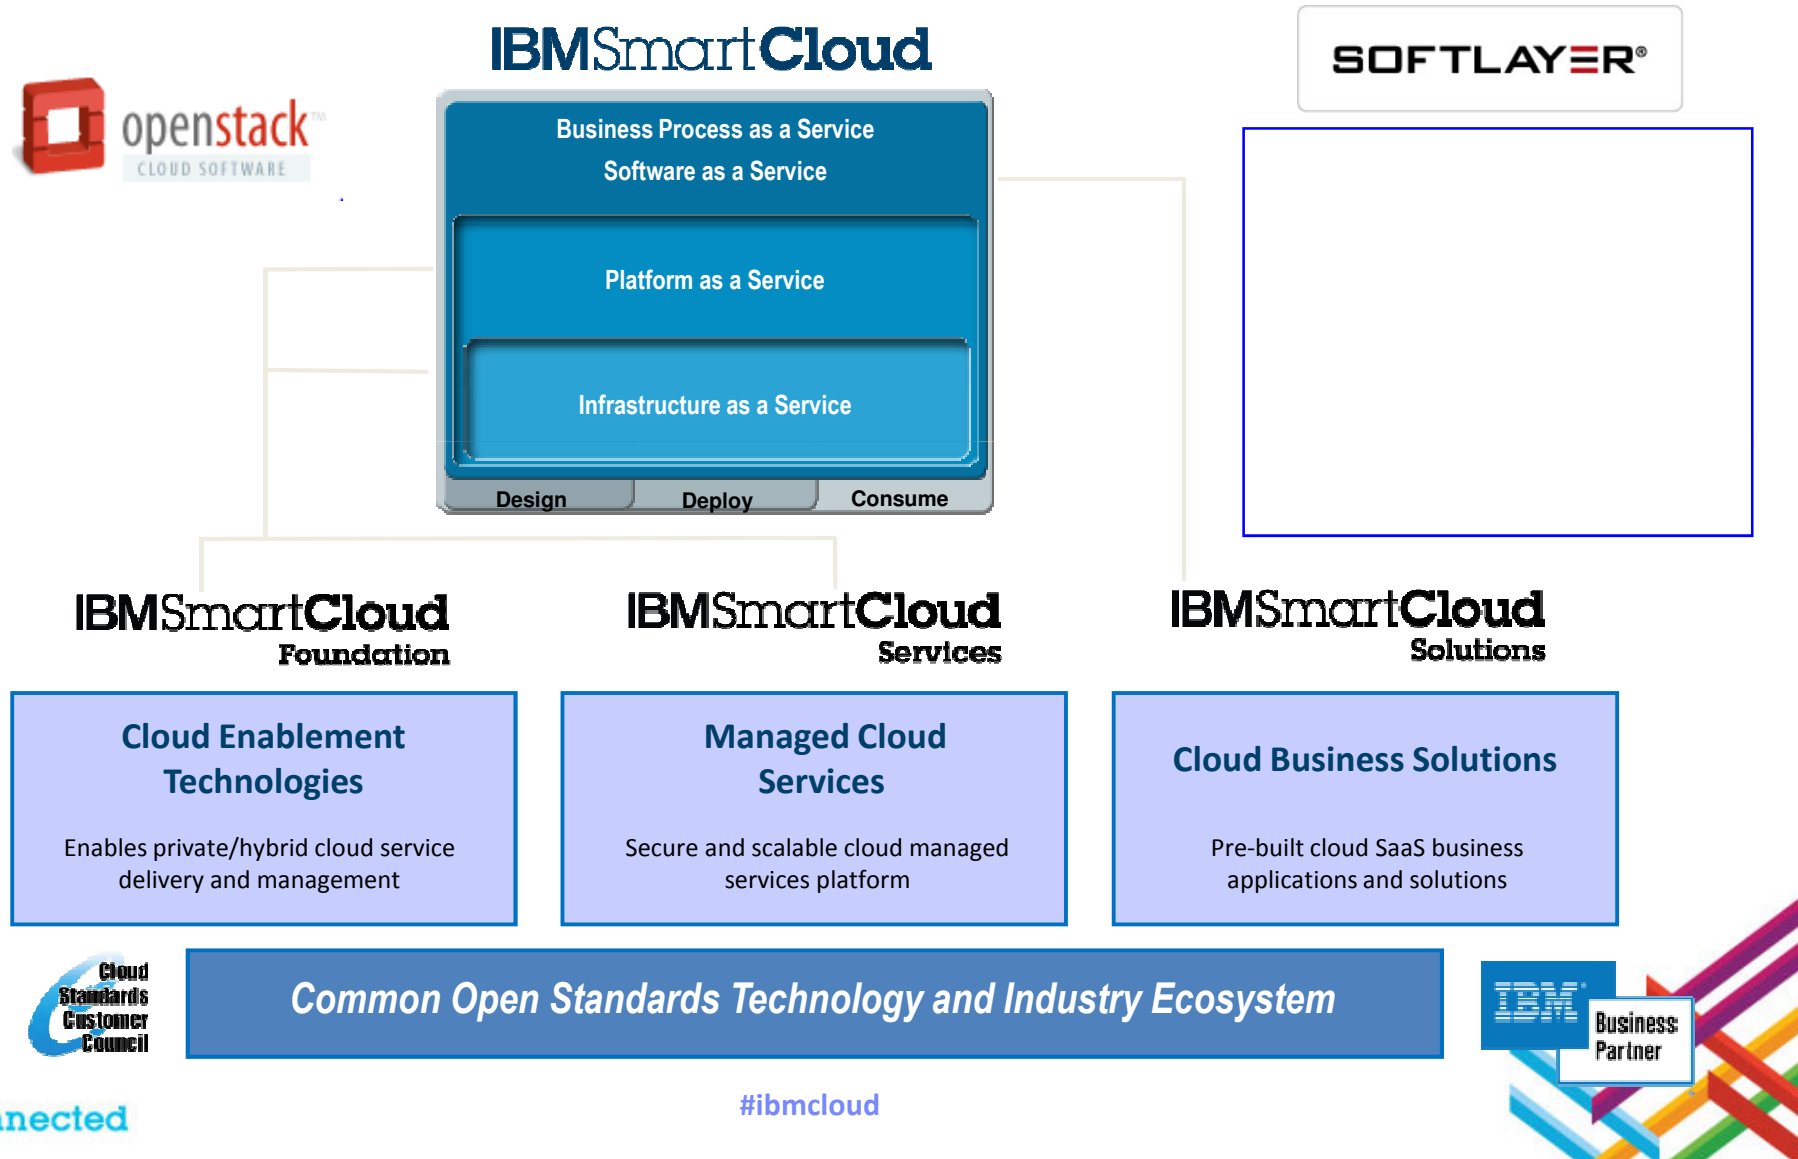

- Cuts wet weather overflows by 23 percent and dry weather overflows from 27 per year to one
- Adds 10 million gallons of capacity to the water system
- Avoids spending \$120 million in infrastructure investments, plus more than \$600,000 in potential government fines

Cloud computing is a consumption and delivery model inspired by consumer internet services

SoftLayer will further advance the IBM cloud strategy and strengthen IBM's portfolio of cloud offerings built on open standards

Delivering and accelerating enhanced cloud choice and control to forward-thinking enterprises

- IBM continues to invest heavily in innovative technologies that deliver client value
- The combination of SoftLayer and IBM SmartCloud will accelerate and advance IBM's leadership position in scaling out higher value services and solutions
- Understand your workload requirements and where can cloud optimize cost and performance
- Start today with SmartCloud Services and the confidence that IBM is the trusted partner to guide you through the transformative cloud journey
