Overview of this IFix:

The ZIP file contains a fix for a failure that occurs when using DMS to distribute the OrderEntry bundle to a RedHat Linux WCTME-EO 5.8.1 client. The problem is timing related, and appears more readily on Linux, but is not limited to Linux, so the fix applies to other clients as well. The fix consists of the following file:
osgiprefpage.jar - This is an update to an existing bundle.

Prerequisite products and versions:

You should have WCTME EO 5.8.1 installed before installing this IFix.

Instructions for installing this IFix into WCTME EO 5.8.1:

1. Unzip the zip file into a directory on your WCTME EO workstation

2. If WCTME EO is running, close it.

3. Copy osgiprefpage.jar to <wctme install dir>\WCTME_EO\eclipse\plugins\com.ibm.eswe.osgiagentextension_5.8.1.

4. Launch WCTME EO.
