

# Updating to IBM Spectrum Copy Data Management appliance 2.2.18

---

Use this procedure to update IBM Spectrum Copy Data Management appliance version 2.2.16 or 2.2.17 to 2.2.18.

## Before you begin

To update the IBM Spectrum Copy Data Management appliance to version 2.2.18 make sure that the current IBM Spectrum Copy Data Management appliance version is either 2.2.16 or 2.2.17. If not update the IBM Spectrum Copy Data Management appliance previous version to 2.2.16, refer to [Updating IBM Spectrum Copy Data Management appliance from previous version to 2.2.16](#).

## Procedure

Run a script manually to update IBM Spectrum Copy Data Management appliance version 2.2.16 or 2.2.17 to 2.2.18:

1. Take a vmware snapshot of your IBM Spectrum Copy Data Management virtual appliance.
2. Login to the IBM Spectrum Copy Data Management virtual appliance as the root user and download the 2.2.18 ISO.
3. Download the 2.2.18 ISO to the required folder for example: /tmp.
4. Run a script that follows:

```
mkdir -p /mnt/SCDMiso
```

```
mount -o loop /tmp/<scdm ISO> /mnt/SCDMiso
```

```
cd /mnt/SCDMiso
```

```
./upgradeSCDM.sh
```

**Note:** After updating to 2.2.18 using the script, you must reboot the appliance.
