DataPower BP Channel Review... helping progress 3Q opps and increase 4Q pipe

Speakers

- –JR Nelson, WW WS Appliances Channel Sales Leader
- -Scott Krynock, WS Appliances WW Business Line Manager
- -Sandy Bickett, WW WS GB/Channel Sales Leader for NA
- -Steve Sayer, IBM Americas WebSphere Sales Exec, BVA Program

Agenda

- –Introduction and Welcome JR Nelson
- –Loaner Program Scott Krynock
- -Cisco Take Out and Sales Kit Update in PartnerWorld Sandy Bickett
- –BVA Discussion Steven Sayer
- –Questions (time permitting)

WebSphere Appliances Business Partner Access Programs

Scott Krynock

WebSphere Appliances Worldwide Network Access

Business Partners across the globe can remotely access a WebSphere DataPower Appliance for nonproduction enablement, development, test and presales activities

Benefits

- No-charge worldwide remote access
- Rich and secure remote access infrastructure
- Develop, test and enablement activities in the same manner as a physical device in your own office
- Save and restore capabilities for future engagements
- Multiple access id's available for team usage

Goals

- Grow WS Appliance skills within your practice
- Develop, test and demonstrate your applications
- Validate your solution as 'Ready-For' WebSphere DataPower or WebSphere CloudBurst
- Use for functional PoC to close sales opportunities

Appliances Supported

- WebSphere DataPower Appliance models
 - ✓ XI50, XI50B, XB60, XC10
- WebSphere CloudBurst Appliance

Take Action

- Become an authorized WebSphere Appliance reseller
 OR
- Participate in WebSphere Appliance 'Ready-For' initiative
- Contact Scott Krynock (<u>skrynock@us.ibm.com</u>) to apply

Ready-For WebSphere DataPower & WebSphere CloudBurst Initiative

Your clients will benefit from you validating your applications and solutions with either WebSphere DataPower or WebSphere CloudBurst Appliances

- Initiative designed to design, test and validate your existing or new application / solution as 'Ready-For' WebSphere DataPower or WebSphere CloudBurst Appliances:
 - ✓ Market your application or solution with proven performance: validation proves appliances
 work together with your applications and environments.
 - ✓ Reduce cost through efficiency: increase ROI through simplification and streamlining of systems and applications, reducing evaluation/purchase cycle.
 - ✓ **Drive customer satisfaction through integration**: gain skills through design, test and validation efforts for your application integration.
- Number of partner benefits available for exposure of your 'Ready-For' application
- WebSphere Appliance Technical consultants available for assistance
- No cost for partners to participate.

To get started, or if you have additional questions, please contact Scott Krynock (skrynock@us.ibm.com) to apply.

WebSphere Appliances Physical Loaner Program I

Limited number of WebSphere Appliances available to help close BP engaged opportunities

Use

- Prioritized to close BP engaged opportunities
- Primary activity for BP to deliver POCs to clients
- Also used for Demos, POTs, Application Development and Test
- Not For Resale or Try and Buy
- Not the business partner's property
- Time duration & revenue generation objectives established within loaner agreement

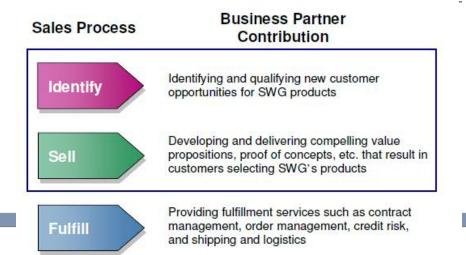

Requirements

- Authorized WebSphere Appliance reseller
- Utilizing SVI opportunity with current approved OI/OO entries in GPP
 - ✓ WebSphere Appliance SVI participation open in AG, LA, NE, SW, CEE, MENA, ANZ, ISA and ASEAN

WebSphere Appliances open in SVI

- Software Value Incentive (SVI) allows IBM Business Partners participating in the <u>Identify</u> and <u>Sell</u> phases of WebSphere Appliances to earn a fee payment (paid directly to the IBM Business Partner) for demonstrating a contribution in these sales phases.
- Follows the same SVI OI/OO process with GPP entries as Passport Advantage products.
- SVI Incentive fee Model:
 - Identify = 5% (+5% premium for GB end user)
 - Sell = 5% (+5% premium for GB end user)
- WebSphere Appliance SVI in AG, LA, PAN-Europe, ANZ, ISA and ASEAN.

Cisco Take Out and Sales Kit Update in PartnerWorld

Sandy Bickett

DataPower Marketing Manager, david.swanger@us.ibm.com

Migrating Your Customers From Cisco ACE XML Gateway to WebSphere DataPower

M Corporation

IBM and our DataPower Partners now have a window of opportunity to go after the Cisco ACE install base and Deliver Value to Their Customers

- We now have an opportunity to meet with companies who have acquired the Cisco ACE technology to swap for DataPower appliances. This is a Win Back opportunity.
- Cisco has stopped selling their DataPower like solutions. In fact we have an opportunity in North America where the customer came to us as the alternative to replace Cisco. Layer 7 and our competitors are going after this base hard. We ask that you do as well.
- Approach this client base and bring up the withdraw of sales and position DataPower as the replacement technology.

NOTE: Cisco has told their customers they will continue to support the XML Gateway for another 3 – 5 years.

E 204-

End-of-Sale and End-of-Life Announcement for the Cisco ACE Web Application Firewall

EOL7171

Cisco announces the end-of-sale and end-of life dates for the Cisco ACE Web Application Firewall. The last day to order the affected product(s) is January 30, 2011. Customers with active service contracts will continue to receive support from the Cisco Technical Assistance Center (TAC) as shown in Table 1 of the EoL bulletin. Table 1 describes the end-of-life milestones, definitions, and dates for the affected product(s). Table 2 lists the product part numbers affected by this announcement. For customers with active and paid service and support contracts, support will be available until the termination date of the contract, even if this date exceeds the Last Date of Support shown in Table 1.

Who wins?

- Customers win
- Lower total cost of ownership
- Reduce complexity and simplify deployment of new services
- Secure, and govern SOA, B2B, and cloud environments
- Improve performance (between 5% to 50% depending on the appliance)

Partners win

- ➤ Connectivity & Integration 11.6B in 2010
- ➤ DataPower revenue grown 800%
- Proven to reduce sales cycles
- Chance to sell other IBM products

Why IBM DataPower Appliances?

"The consumability of appliance technology, like IBM's WebSphere DataPower technology, is vital to enabling the necessary unification by increasing the speed and efficiency of how IT delivers value to the business." -- Dick LeFave, CIO, SprintNextel

- Purpose-built, finely-tuned, <u>consumable</u> hardware platform
- Multiple functions in a <u>single device</u>
 - Perimeter Security Mediation
 - Service level management
 - Dynamic routing and load distribution
 - Transaction Message Mediation and Integration
 - Message transformation and transport
- Simplified management model
 - Drop-in appliance form-factor
 - Secures and Mediates traffic in minutes.
 - Push-button flash upgrade process for maintenance
 - Integrates with existing operations
- High levels of certified <u>security</u> assurance
 - FIPS 140-2 Level 3
 - Common Criteria EAL4
- Achieves fast <u>performance</u> using specialized hardware acceleration capabilities

How do you motivate customers to move from Cisco ACE to WebSphere? Here are few steps you can take...

WebSphere Business Value Assessment Methodology and typical results for DataPower

Steven Sayer

WebSphere
Business Value
Assessment

A no-fee one- to three-day client workshop to develop a comprehensive business case and cash flow model that captures the costs and benefits of the implementation of an IBM solution

Activities

- Client and IBM SMEs identify and validate a high value business process or project which would benefit from the implementation of a WebSphere solution(s)
- Discuss and document client objectives, opportunities, and pain points
- Align solution capabilities to opportunities and pain points, define benefits of implementation
- Identify and quantify potential benefits, areas of business value including key performance indicators
- Capture fixed and variable costs over five years; identify key cost drivers
- Evaluate and compare alternative scenarios and/or solutions (the initial process serves as the basis for extrapolation)

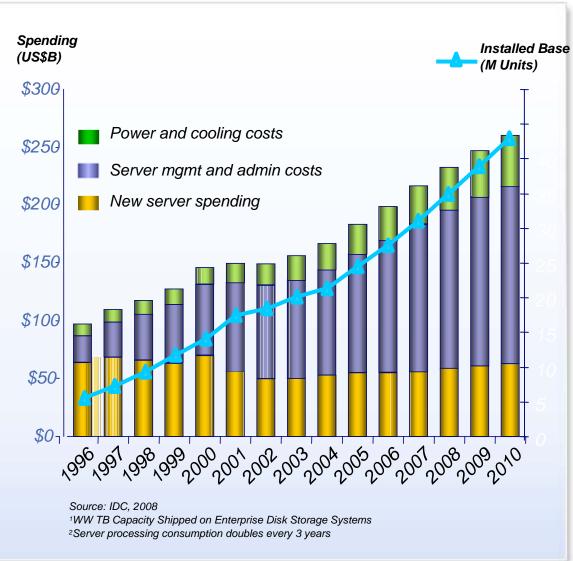

Deliverables

 Three- to five-year cash flow model and business case to support project funding and investment requirements: costs, savings, ROI, investment breakeven

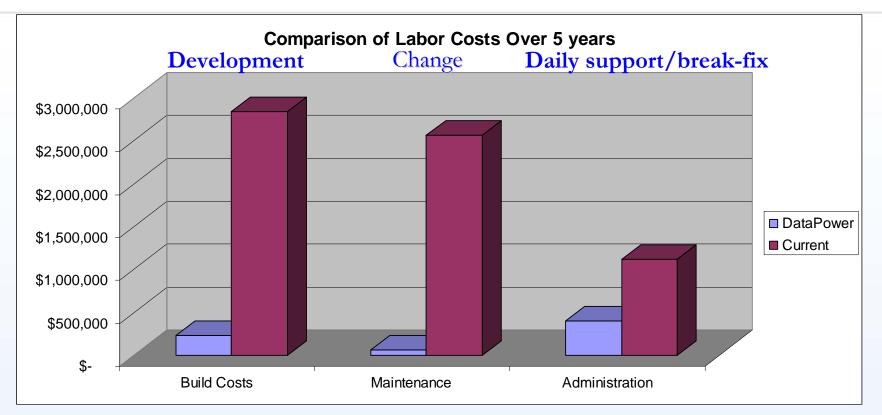

IT challenges facing businesses today

- Data Doubling every 18 months¹
- Server processing capacity doubling every 3 years²
- HW costs are declining, cost to manage systems has doubled since 2000
- Costs to power and cool systems has doubled since 2000
- Devices accessing data over networks doubling every 2.5 years
- Bandwidth consumed doubling every 1.5 years
- 83% of customer projects fail to meet schedule or expected results
- Application innovation is squeezed by IT budgets, maintenance of existing infrastructure
- Customer demand for solutions that deliver better efficiency than traditional approaches is increasing

20

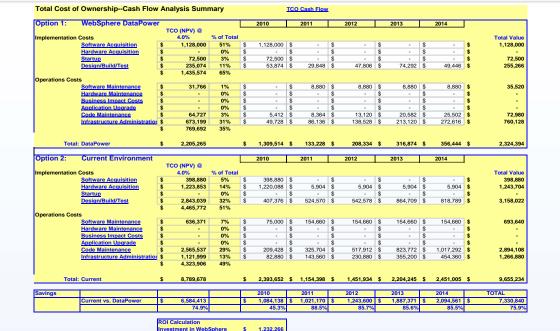

The value proposition for DataPower

DataPower delivers selectable best practices commonly used functions in a fraction of the time of traditional custom programming or commercial packages. DataPower is equally agile for changes to meet new business requirements, and for ongoing support. Our study shows a 5 year lifecycle cost of \$2,300 per artifact for DataPower vs. \$21,000+ for custom coding.

The BVA can help quantify value propositions

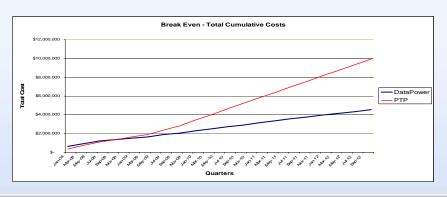

Robust 5 yr Cash Flow Summary

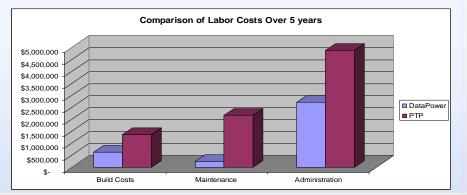

6,584,413 534%

eturn: savings vs. current sol \$

Investment breakeven

Labor cost comparison

BVA example: DataPower for a large international bank

Customer pain points:

- ➤ Two commercial and one customer built B2B applications in use to manage business partner communications
- Costs to deploy solutions is high, costs to maintain and change is prohibitively high
- > Time to add new partners is +/- 6 months; unacceptable
- > Requirement for secure access, threat protection is critical
- ➤ LOBs have lost faith in IT's ability to deliver productive solutions
- ➤ Need ESB, B2B, and security capabilities

BVA estimated development labor for Use Cases 1-5 for DataPower XB60

Use cases	Description	Current environment estimated development hours	DataPower estimated development hours	Quantity drivers
B2B Protocol Handling	Provide secure and scalable gateway through which to integrate internal and external business partners based on industry standard B2B protocols and message formats	200	20	(5) Initial B2B- enabled applications
B2B Partner Profile Manager	Provide easy way to onboard and manage new partners for B2B integration through gateway	10	5	(10) Initial B2B partners
B2B Transaction Manager	Provide B2B transaction audit and management capability for review, resend and problem resolution scenarios	10	5	(10) Initial B2B partners
Security AAA	Provide consumer identification, authentication, authorization, and auditing security capabilities	360	18	(5) One for each B2B- enabled application
Security Threat Protection	Provide non-repudiation, integrity, confidentiality and general threat protection security capabilities (i.e. everything else)	1080	51 © 2	(5) One for each B2B- enabled application

BVA estimated development labor for Use Cases 6-10 for DataPower XB60

Use cases	Description	Current estimated devel hours	DataPower est. devel hours	Quantity drivers
Routing	Provide service virtualization of identity via dynamic content and context based routing	140	20	(5) One for eachB2B-enabled application
Protocol Bridging	Provide service virtualization of protocol via bridging (e.g. HTTP to/from MQ)	140	20	(5) One for eachB2B-enabled application
Message Transformation	Provide service virtualization of interface via message transformation to/from any format including XML	120	40	(5) One for eachB2B-enabled application
Service Level Management	Provide method of monitoring traffic against thresholds based on SLAs between parties and support taking action when thresholds are crossed	280	40	(5) One for eachB2B-enabled application
Additional Code required to meet corporate standard	Represents effort required to bring existing B2B gateway solutions up to enterprise standards in lieu of DataPower	j	None	More work is required to compare standard to current ability

Multipliers for use case development estimates for 5 years

Use cases	Multiplier based on:	2010	2011	2012	2013	2014
B2B Protocol Handling	B2B-enabled applications	5	3	5	8	5

DataPower can implement required functions for \$6.8M/78% savings vs. current approach

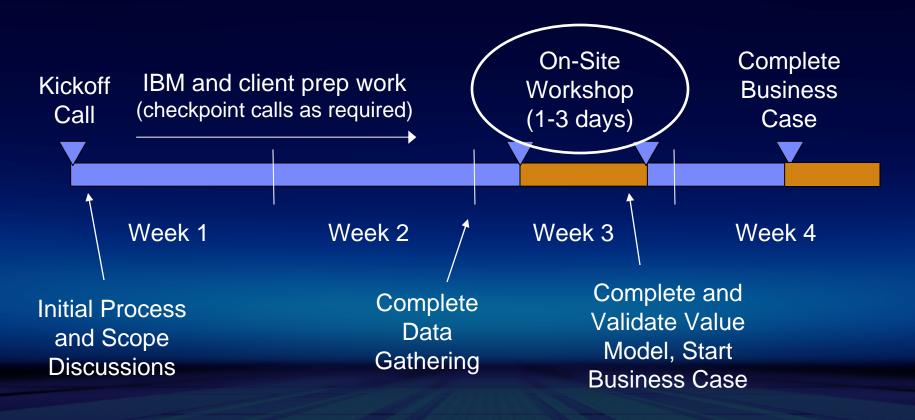

Investment breakeven

Savings of \$6.8M, 9 months to breakeven, ROI of 550%+, low risk/high return

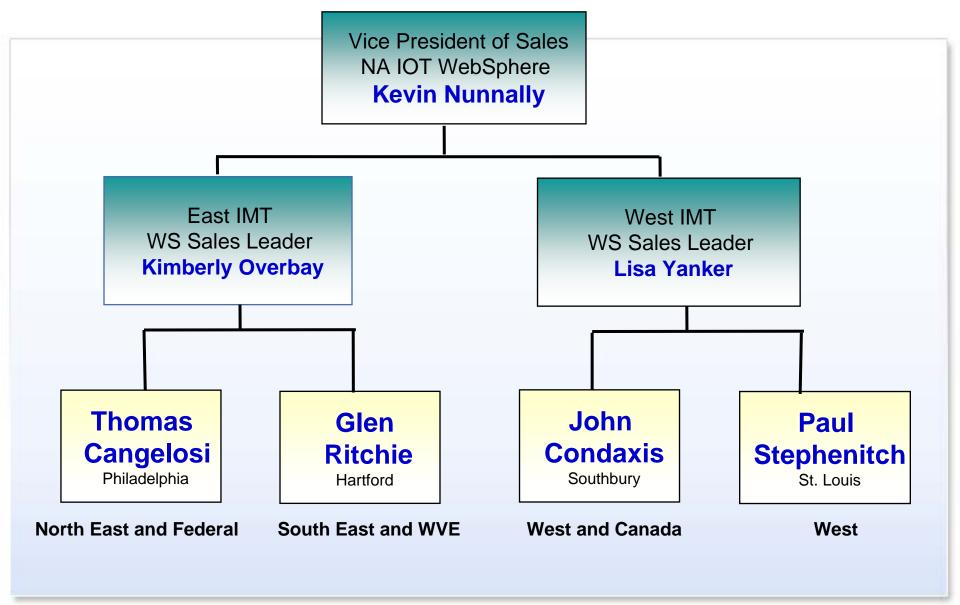

Typical BVA timeline to collect data, create model and build business case

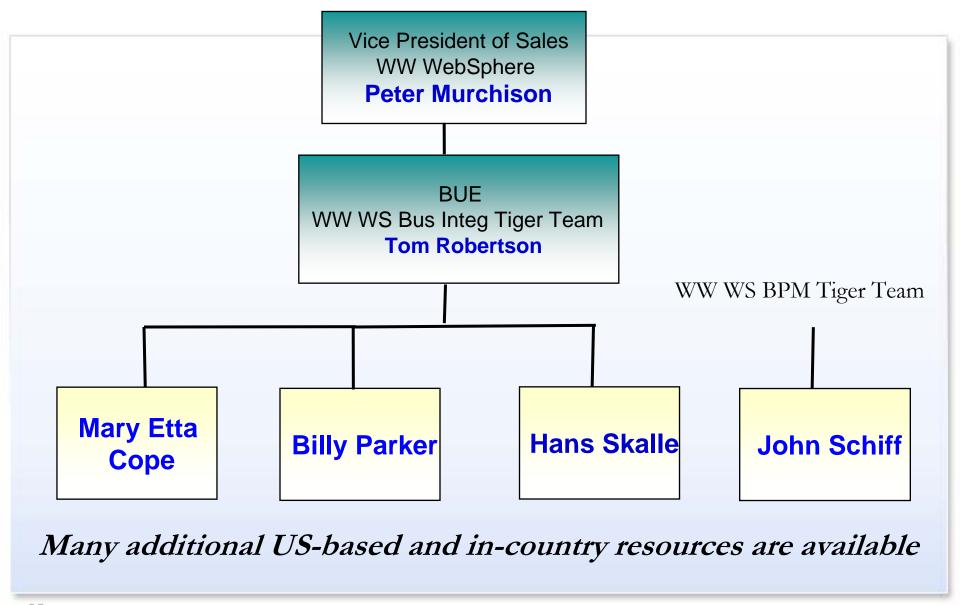

The BVA workshop is a joint client – IBM team effort
