

Quick Reference Card for Upgrading Rational Suite DevelopmentStudio UNIX, Version 2001A.04.00

Please review this entire document *before* installing your new software.

This document is meant to act as a supplement to the installation manuals that ship with the product. Unless otherwise specified, all references are to the *Installing Rational Suite DevelopmentStudio* manual.

What's New in Rational Products

A document describing the major new features in this release is included in this upgrade media kit.

Operating System Support

The software included in this package is for the following operating systems:

- Solaris 2.5.1, 2.6, 2.7 (Solaris 7), and 2.8 (Solaris 8)
- HP-UX 10.20, 11.00, and 11.11 (11i)

Before You Install

If you installed the beta software for version 2001A.04.00, you must uninstall the software *before* installing the final version.

In general, when you upgrade to Rational Suite DevelopmentStudio, version 2001A.04.00, you do not need to remove the existing software first.

Step	Action
1 Verify that you meet the hardware and software requirements for this release of Rational Suite DevelopmentStudio.	See the following: <ul style="list-style-type: none">▪ "UNIX Installation Requirements"▪ "Windows Installation Requirements"
2 Determine how you want to set up your server configuration based on the products you are planning to use.	See "Planning your installation."
3 Backup your data. Backing up your data prior to installing any new software should be a regular practice. This is especially important for database products such as Rational ClearQuest and Rational Requisite Pro.	For ClearQuest, see the <i>Installing Rational ClearQuest</i> manual. For Requisite Pro, see the <i>Installing Rational Requisite Pro</i> manual.
4 Do you plan to install Rational ClearCase? Do you plan to install Rational ClearCase LT?	If yes, install Rational ClearCase before you install Rational Suite DevelopmentStudio. Refer to the ClearCase product documentation for instructions on how to install. If yes, you should install Rational Suite DevelopmentStudio first and ClearCase LT second.
5 Do you plan to use Rational SoDA?	If yes, see "Installation Requirements for Rational SoDA."

Step	Action
6 Do you plan to use Rational Apex with Rational Rose or with Rational SoDA?	If yes, you may wish to install Apex before you install Rational Suite DevelopmentStudio. Make a note of the Apex installation directory as you need to provide this during the installation. Alternatively, you can go ahead and install Rational Suite DevelopmentStudio and install Apex later. See “Integrating Products that are not part of the Suite” for information about how to integrate Apex with Rose, Rose RT or SoDA after you have installed the Suite.
7 From what release are you upgrading?	If upgrading from version 2000.02.10, you may use your existing license. You can go ahead and install the software. If upgrading from a version prior to version 2000.02.10, you must return your license keys and request new ones. See “Requesting License Keys” for more information.
8 You are ready to install Rational Suite DevelopmentStudio.	See “Installing Rational Suite DevelopmentStudio.”

Installing Your New Software

Follow the instructions in *Installing Rational Suite DevelopmentStudio* to install your new software.

If you wish to use Rational ClearCase LT, follow the instructions in *Rational ClearCase LT Installation Notes*.

After You Install

Several Rational products have post-install requirements.

- To configure Rational Rose, Rational SoDA, Rational Purify, Rational PureCoverage, or Rational Quantify, please see “After You Install.”
- To configure Rational ClearQuest, Rational RequisitePro, or Rational ClearCase LT, please see the product’s own installation manual for details:
 - *Installing Rational ClearQuest*
 - *Installing Rational RequisitePro*
 - *Rational ClearCase LT Installation Notes*

Licensing Notes

- 1 Version 2001A.04.00 software will run with version 2000.02.10 license keys. If you are an existing customer and are using version 2000.02.10 of Rational Suite DevelopmentStudio, you do not need to obtain new license keys to run version 2001A.04.00 of the same product.

If you are an existing customer and are using a version of Rational Suite DevelopmentStudio prior to version 2000.02.10, you need to return your old license keys and request new ones. For more information, see “Requesting License Keys.”

- 2 All license management (obtaining and returning licenses) is now done through Rational AccountLink, a new online licensing web tool at <http://www.rational.com/accountlink>. For more information about using AccountLink, see “Requesting License Keys.” If you do not have Internet access, see “Requesting License Keys by FAX.”

- 3 Rational Suite DevelopmentStudio version 2001A.04.00 products use FLEXlm version 7.0f. It is highly recommended that you upgrade your FLEXlm license server to the newer version. For more information about upgrading the license server software, see “Installing Rational Suite DevelopmentStudio (UNIX Components).”
- 4 **Rational ClearQuest Web** and **Rational RequisiteWeb** - require a Rational Suite DevelopmentStudio (Windows components) floating license key to run.
- 5 **ClearCase LT Server** - requires a Rational Suite DevelopmentStudio license key to perform certain server administration functions. After you have installed ClearCase LT, you must run **license_setup** and point to the Rational Suite DevelopmentStudio license server. For more information, see *Rational ClearCase LT Installation Notes*.

Frequently Asked Questions

1 What happens to my existing databases, repositories and data during an uninstall?

Removing an earlier version of a product does not delete any of your databases, license files, and license server software. Directories containing files you created while using Rational products are not deleted.

2 Do I have to upgrade all of the systems and products my company uses at once?

Yes. Rational products share many components. If you choose to upgrade only a subset of the products on your workstation, the install script will upgrade all shared components and some of the other products may no longer work correctly. To prevent any such problems, either run the install script and upgrade all the products, or remove them.

3 Can I still use my old licenses keys or do I need new ones?

If you are upgrading from version 2000.02.10, the license keys that you currently have installed will continue to work with version 2001A.04.00.

Customers who are upgrading their product from a version prior to version 2000.02.10 need to return their old license keys and request new license keys. Please see “Requesting License Keys” for more information.

4 How do I set up my license server?

Rational Suite DevelopmentStudio supports three license server configurations: single server configuration, two server configuration and a redundant server configuration. The single server configuration uses a UNIX server to manage licenses for both UNIX components and Windows components. A two server configuration uses a UNIX server to manage licenses for UNIX components and a Windows server to manage licenses for Windows components. A redundant server configuration uses three UNIX servers to manage licenses. For more information, see “Planning Your Installation.”

5 I am currently using Rational SoDA. Can I use the version of FrameMaker + SGML that was provided with version 2000.02.10?

Yes. To do this, you must keep the previous version of Rational SoDA and FrameMaker + SGML 5.5 installed on your system. When you install version 2001A.04.00, enter the location for FrameMaker + SGML 5.5. For more information, see “Before You Install and Installing Rational Suite DevelopmentStudio.”

6 What is new in this version of the software?

Major new features in version 2001A.04.00 are introduced in the *What's New in Rational Suite DevelopmentStudio for UNIX* document included in this media kit. More information about Rational products may be obtained from our web site <http://www.rational.com/>.

7 What if I still have trouble installing?

Contact Rational Technical Support in either of these two ways:

- Submit a support request online at: <http://www.rational.com/support/forms/supportrequest-new.jsp>
- Send an e-mail to:

North America	support@rational.com
Europe, Middle East and Africa	support@europe.rational.com
Asia Pacific	support@apac.rational.com

8 How can I submit feedback regarding this document?

Please feel free to e-mail feedback about this document to: upgrades@rational.com.
