

Chapter 3

Features

SoDA[®], Rational's **S**oftware **D**ocument **A**utomation product, helps you automate the process of documenting your software. The following sections describe SoDA's:

- Compatibility with operating system and application software
- Standard features
- Additional features that are available when using SoDA with:
 - Rational Rose[®]
- Documentation

Compatible Products

This SoDA 3.0.2 release is for:

- IBM-PC compatibles running Windows NT
- IBM-PC compatibles running Windows 95

You can use SoDA 3.0.2 on its own or with:

- Rational Rose 98

Standard Features

SoDA supports:

- *State-of-the-art electronic publishing*

SoDA uses FrameMaker+SGML as its embedded publishing tool.

FrameMaker+SGML provides conventional publishing capabilities such as word processing, page layout, and illustration, as well as the ability to define and manage document structure. See *Using FrameMaker+SGML* for more information about these features.
