

# ClearCase Technical Bulletin

**To:** All Sites Using the ClearCase Integration with JBuilder  
**From:** Customer Support  
**Date:** 08/12/02  
**Subject:** Technical Bulletin #49

## ClearCase Patch Contains Corrupt .jar File

An update to the ClearCase integration with Borland JBuilder, introduced in two recent patches:

- clearcase\_p2002.05.00.NT-9
- clearcase\_p2002.05.00-10

contains a corrupt **ccjbaddin.jar** file which causes the integration to fail. Rational is developing a new patch that will fix this defect, which is logged as defect CMBU00064786. Until the patch is available, we recommend that all sites that use the ClearCase integration with JBuilder contact Rational Customer Support for an updated copy of **ccjbaddin.jar**.

## Any Questions?

If you have any questions regarding the situations discussed in this Technical Bulletin, please contact Rational Customer Support via telephone, fax, or electronic mail as described below. For information regarding support hours, languages spoken, or other support information, click the **Technical Support** link on the Rational Web site at [www.rational.com](http://www.rational.com).
