Market Experience In Workplace Productivity

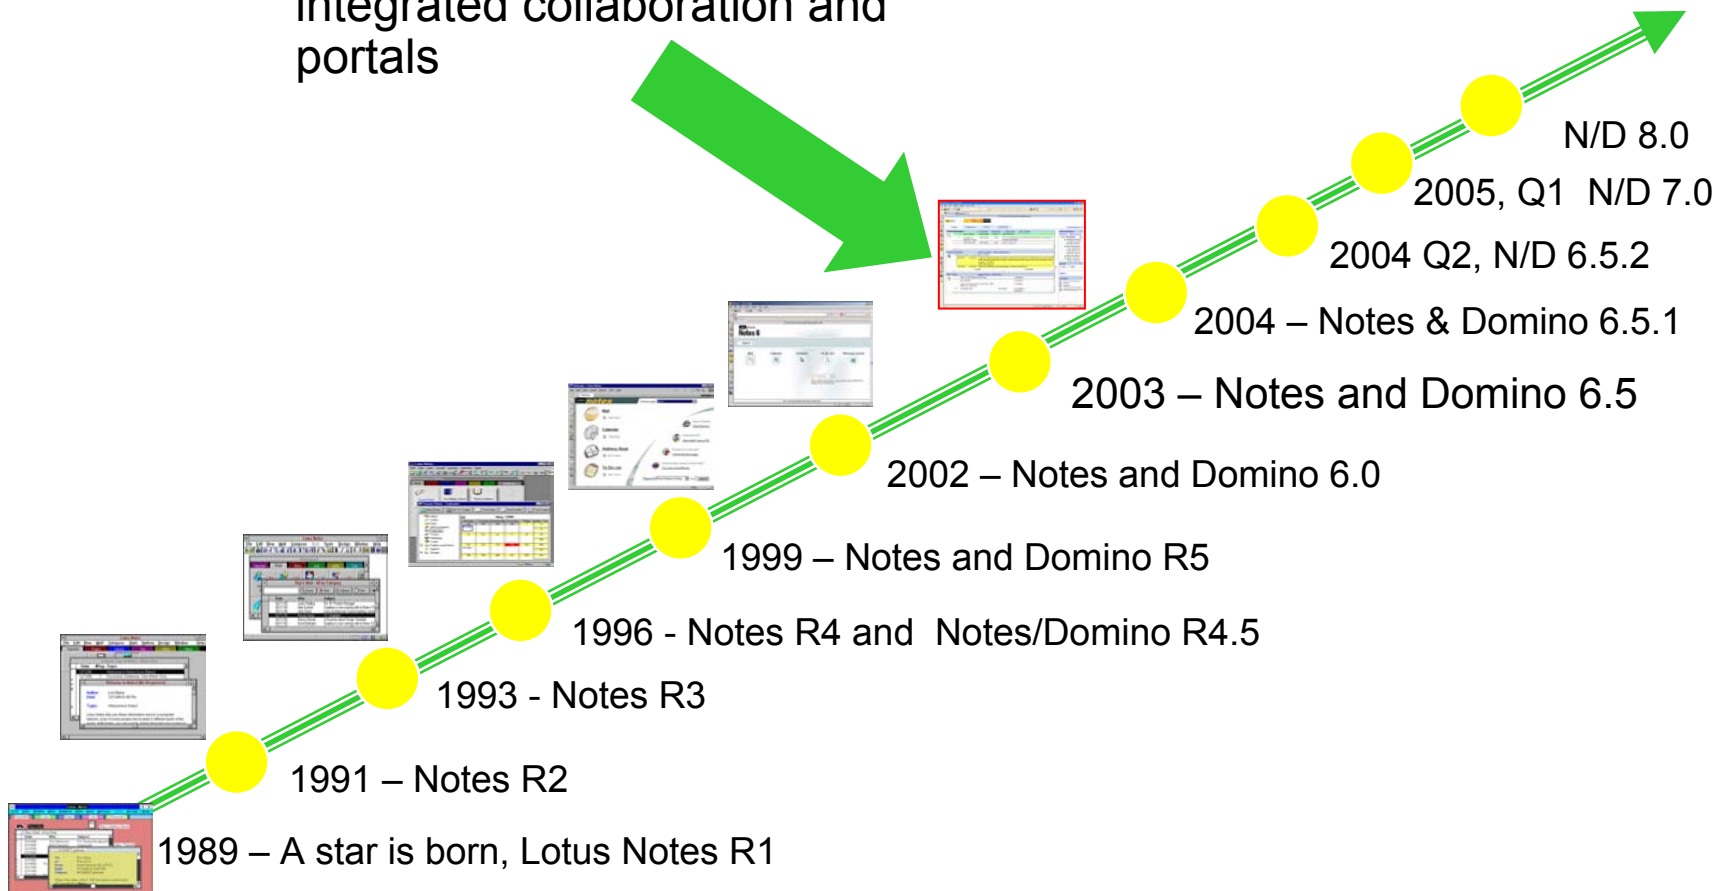

* Based on Market Data and Research

Notes/Domino continued leadership in messaging and collaboration

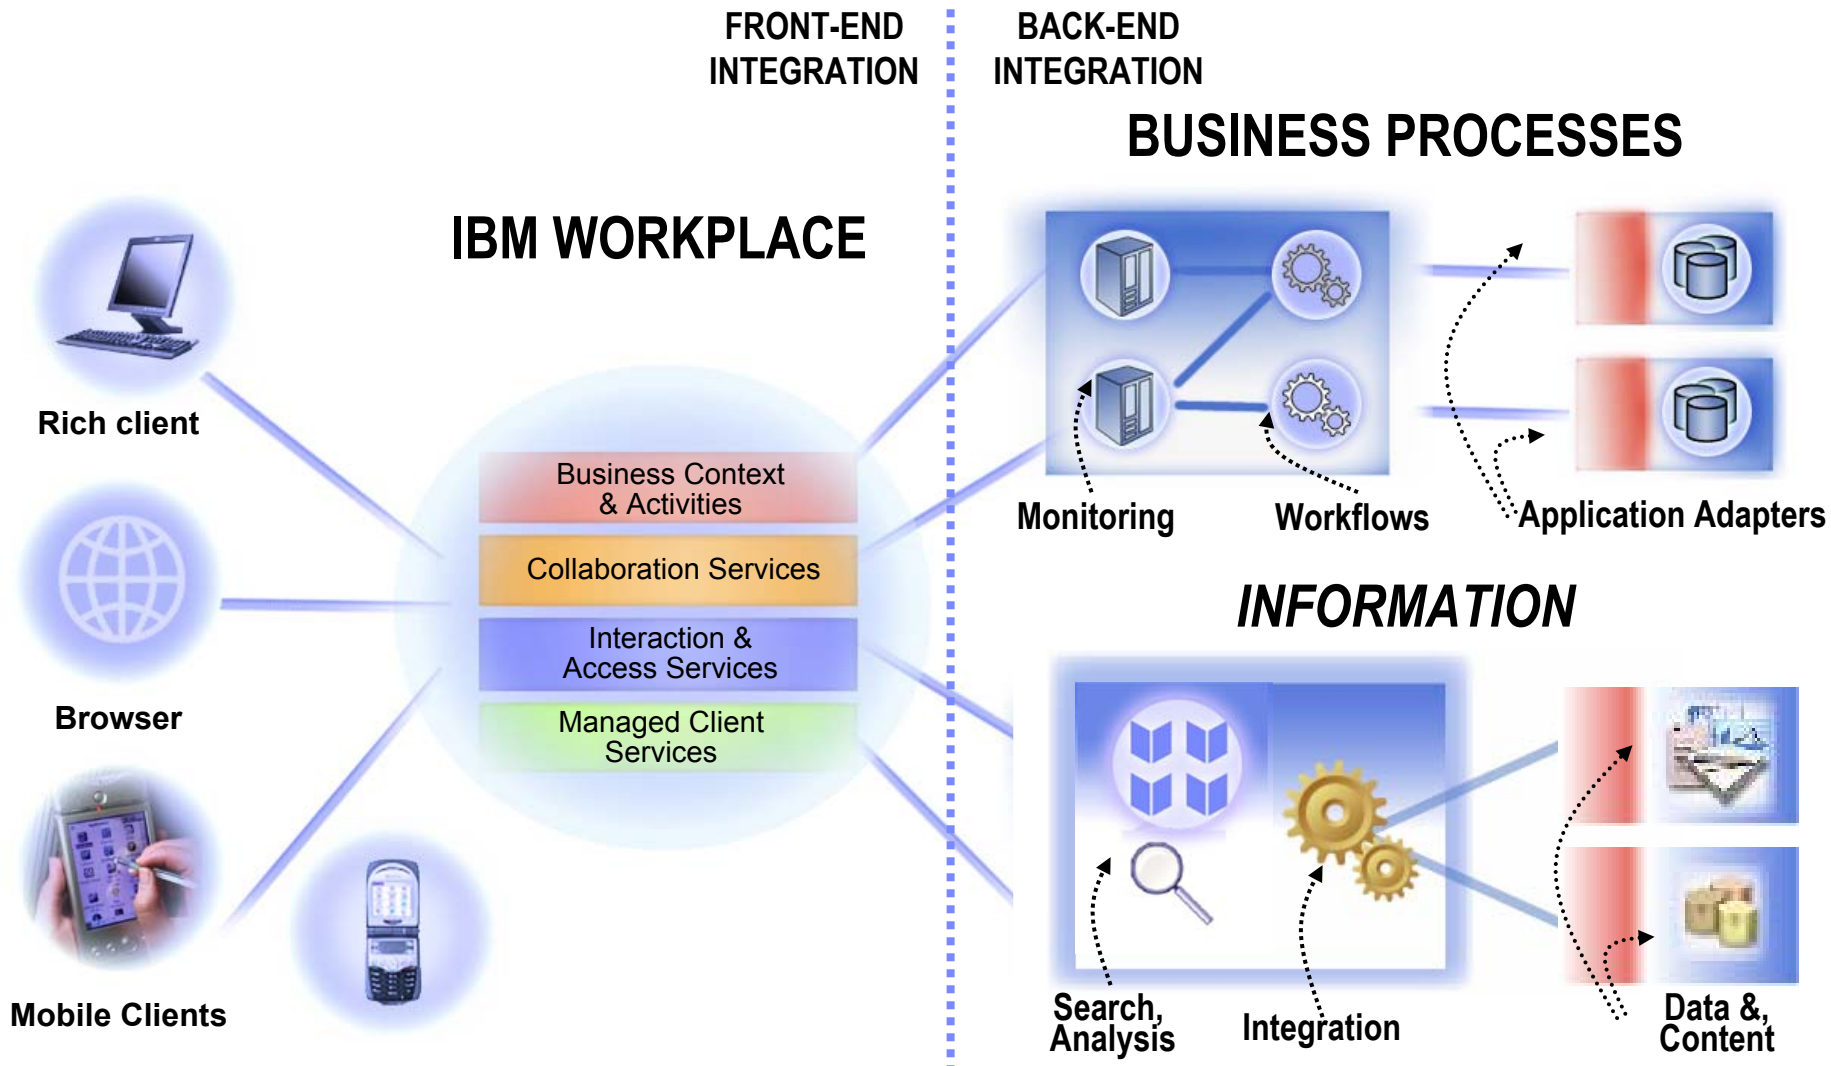

Extending Domino to
integrated collaboration and
portals

...continuing long into the future

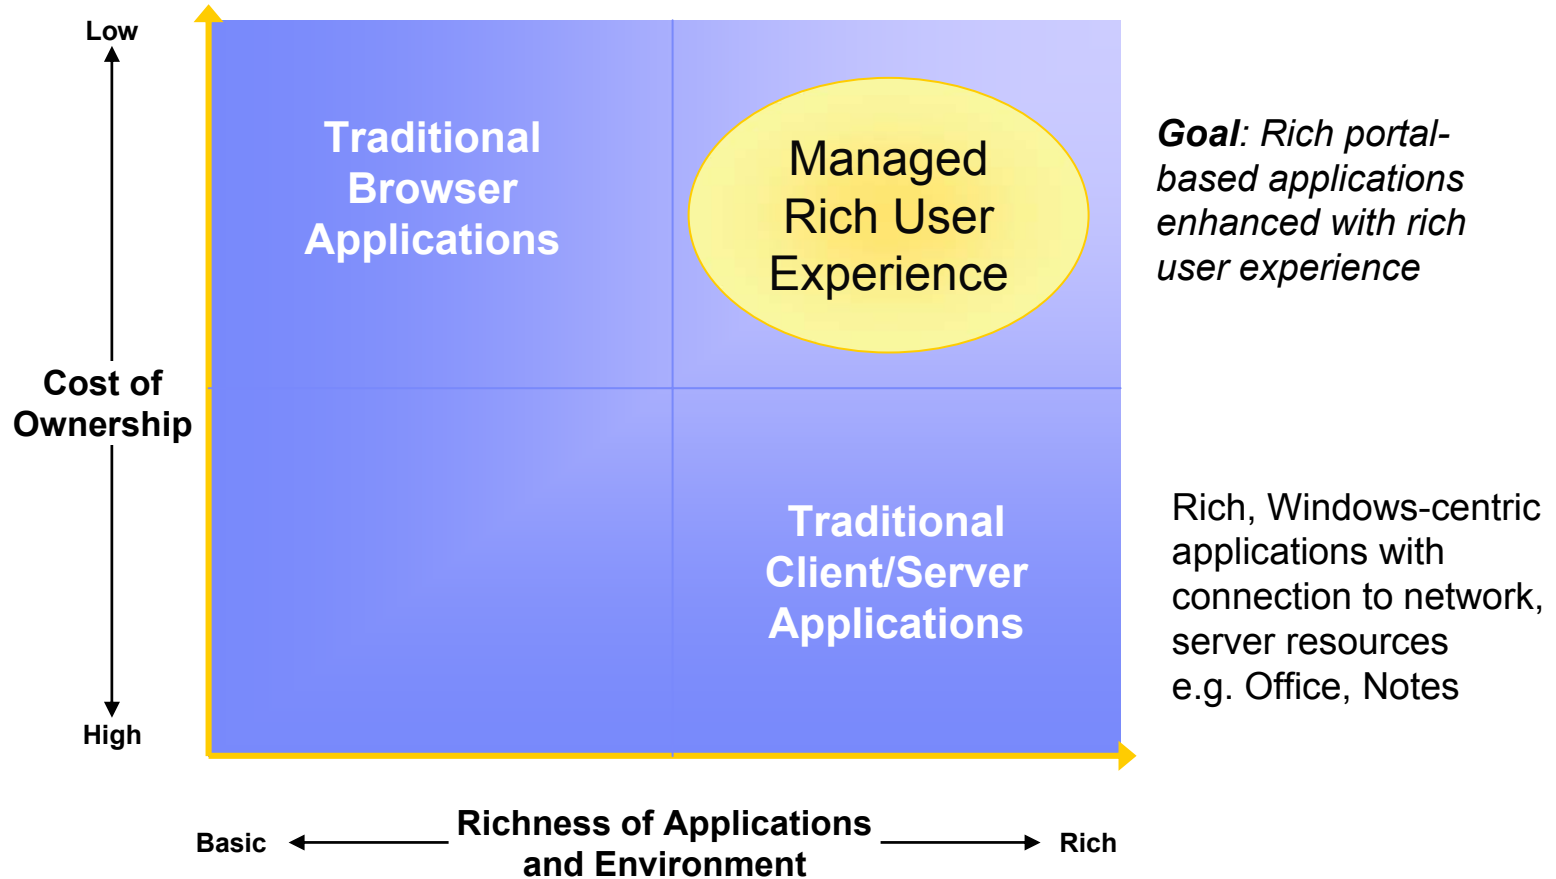

Managed Client Model

Making More People More Productive in the Context of The Business They Do Every Day

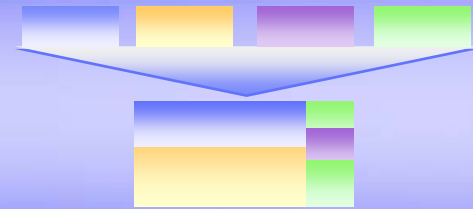

The power of one architectural model, one programming model, one consistent tool set

Challenge – To Achieve Rich Client Functionality at low TCO

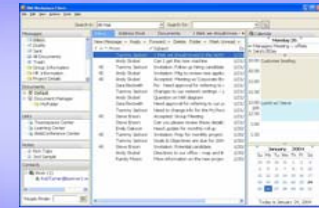

IBM Workplace Client Technology – What is it?

A dynamically provisioned client middleware built on standards with choice of operating systems

An innovative component based assembly model for building dynamic workplaces delivered on demand

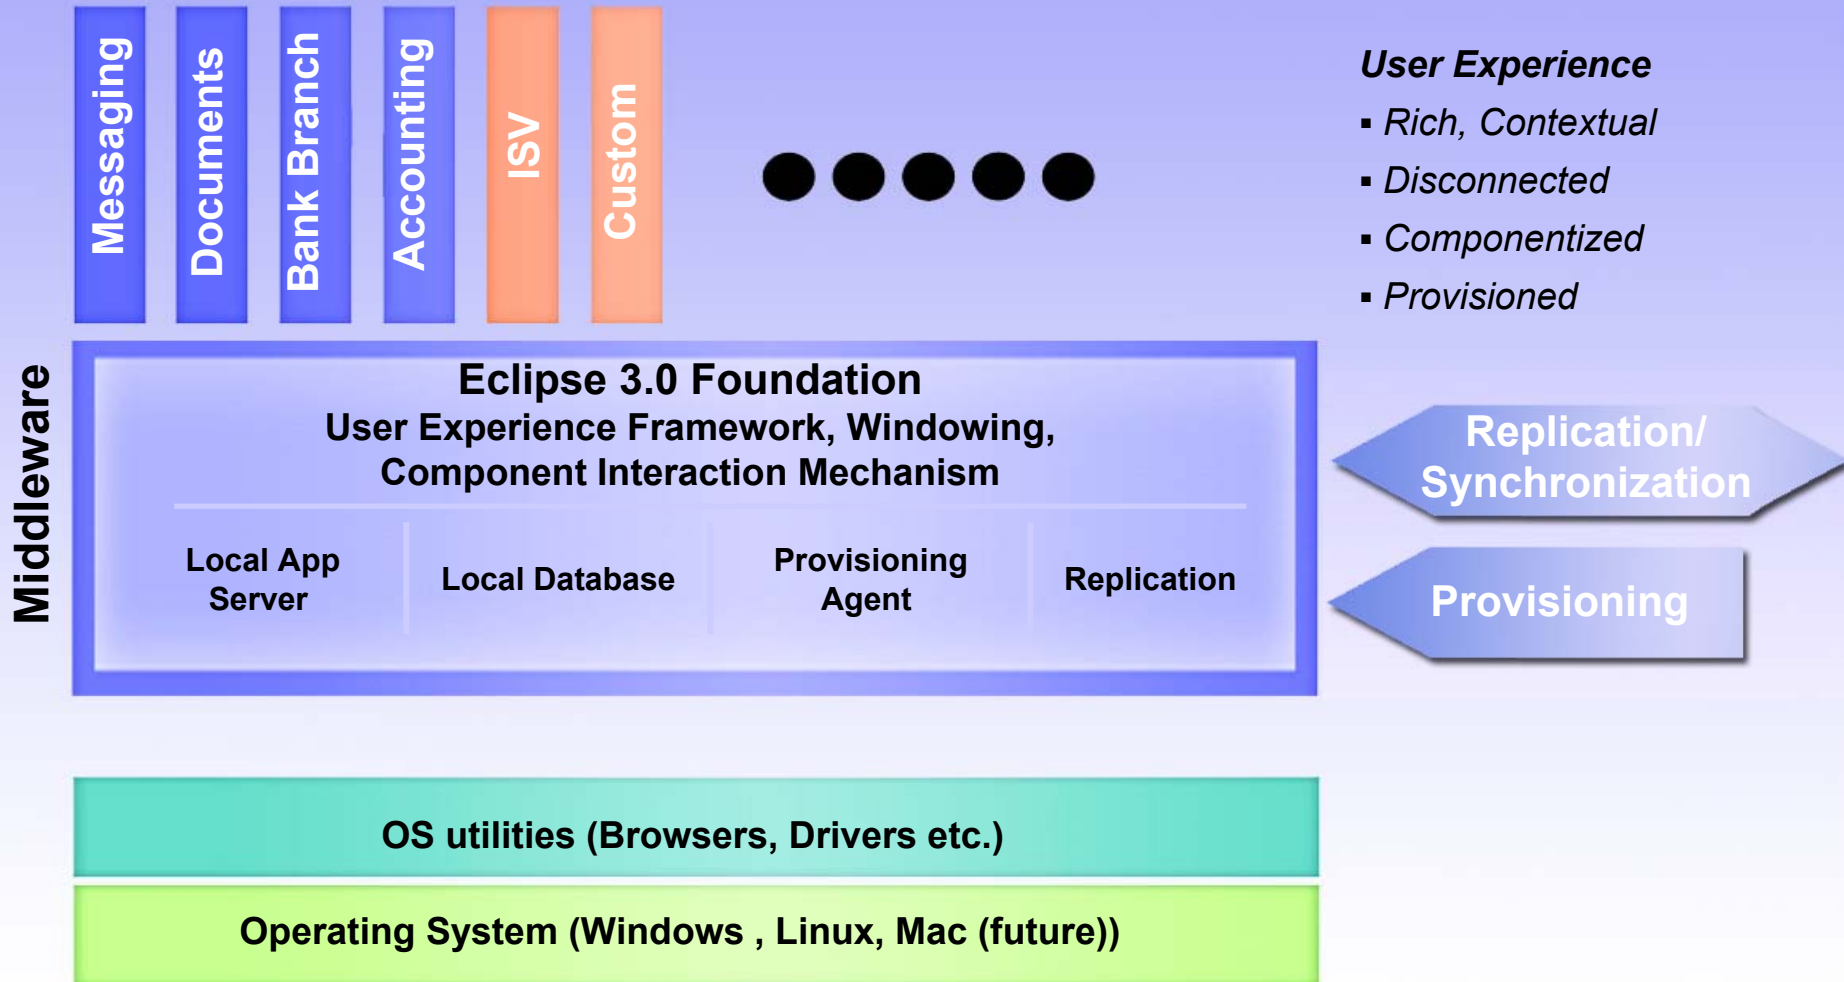

An improved security model delivered via secure, encrypted and replicated repository not accessible by rogue programs

A foundation for a new model of rich client computing for the industry...

- Lotus Workplace Messaging
- Lotus Workplace Documents
- Other IBM & Partner Applications

IBM Workplace Client Technology

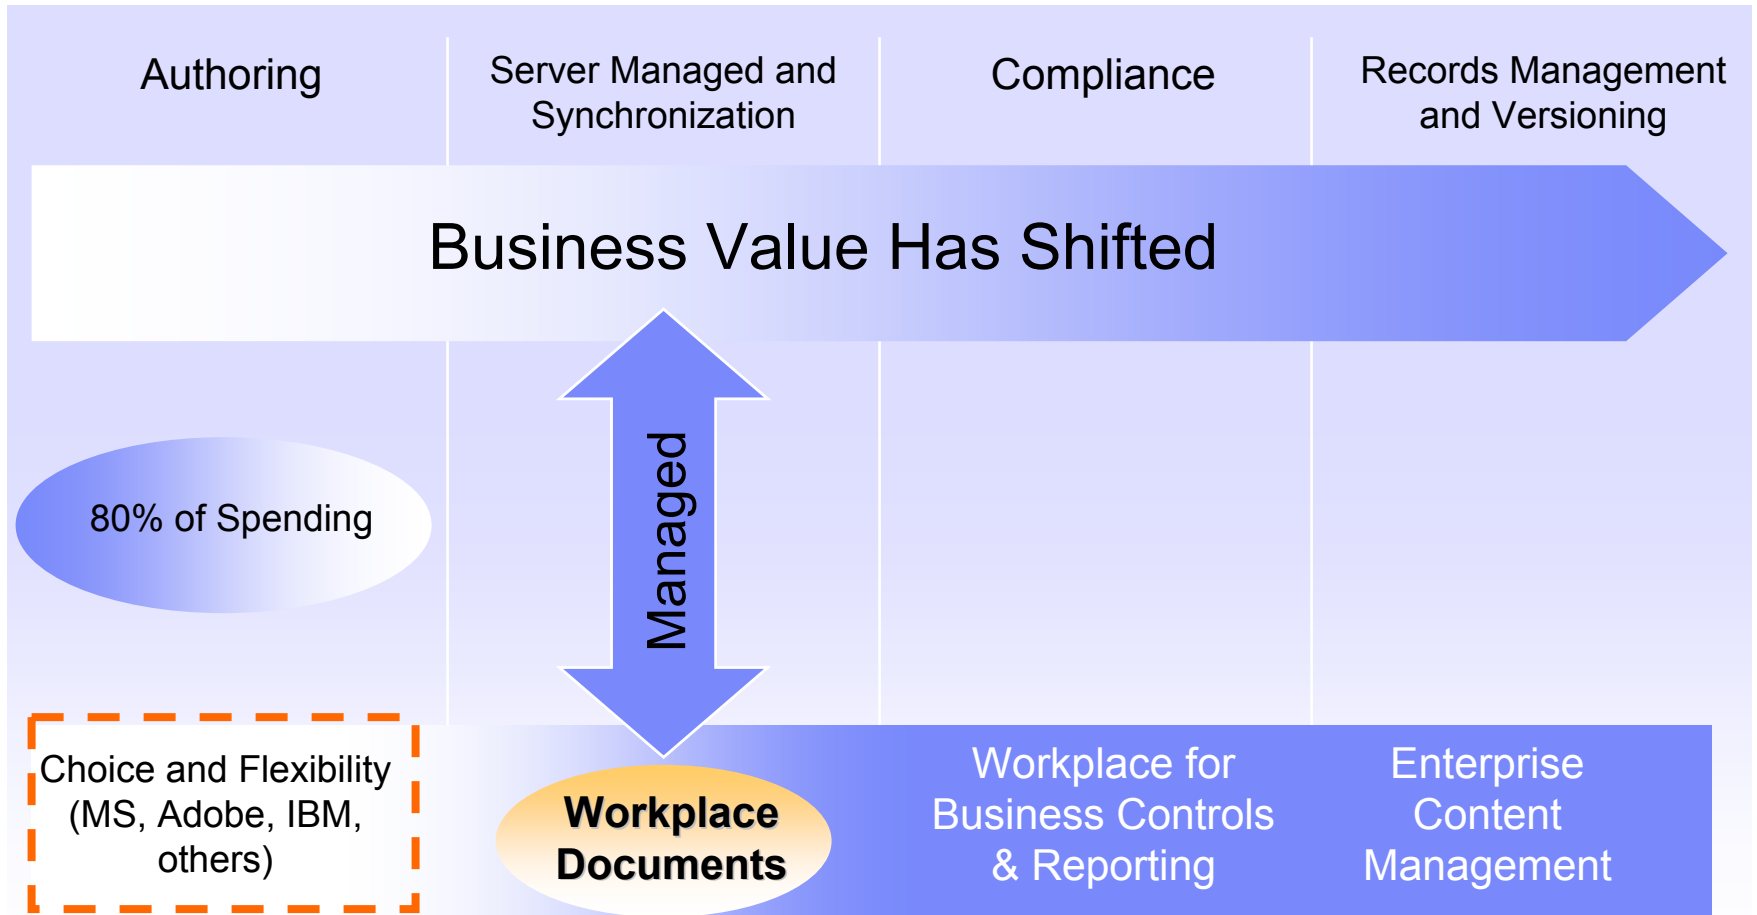

Workplace Messaging

The screenshot displays the IBM Lotus Workplace Messaging application window. The interface is divided into several panes:

- Messages:** A list of folders including Inbox (1), Drafts, Sent (1), All Documents (2), Trash, My Chats, My Address, and My Calendar.
- Documents:** A tree view showing folders like LWP, Team Project, META, templates, theme, and WEB.
- Links:** A list of links for Web Conferences, Teampaces, and Learning.
- Instant Contacts:** A list of contacts including Andy Admin and Susan Adams.
- Message View:** The main pane showing a message from IBM to Susan Adams, dated Mon, 5/3/04 2:04 PM. The message content includes a welcome message and a list of instructions:
 - Send and receive messages
 - Create folders to organize your mail
 - Store e-mail addresses and other personal information for your contacts in the Address
- Calendar:** A calendar view for Monday, May 3, 2004, showing a grid of time slots from 9:00 am to 3:00 pm.

The status bar at the bottom indicates "1 object(s) selected" and "Synchronize Now" and "Online" buttons.

Background to Equity Funding

Equity funding is very important for new ventures and for high-technology ventures in particular. Debt funding will not usually be accessible for such ventures due to their lack of a secure cash flow and credit history. There are several potential sources of equity funding. These include corporate funding, business angels and venture capital funds. These sources can operate at several stages of opportunity development, outlined in Figure 1. The terminology and boundaries of each stage can vary between equity suppliers and there is often considerable overlap between the stages at which funders will consider investment.

IBM Workplace Client Technology

No Touch Deployment – Helps Lower TCO

- Server-managed delivery of rich clients to end user communities
- Centralized administration, setup and client updates
- Provision capabilities when needed – *on demand*

Rich user experience

- Disconnected use and synchronization
- Power of client software – i.e drag-n-drop, improved responsiveness, UI control
- Componentized and Contextual
- Embedded Doc Management

Extensible client platform for

- Collaboration, including mail, calendaring and scheduling, instant messaging, team spaces...
- Document management
- Existing Web, Java, .Net and Notes Applications
- New Applications – IBM and Business Partners

Built in Data Management and Security Features

- Using local and server managed encrypted data stores
- With robust policy managed access and control

Choice and Flexibility

- Linux, Windows and MacOS (planned) desktops
- Manage office documents and Java.Net and C++ applications
- Standards-based interoperability

Annonces du 10 mai 2004 – New York

Une nouvelle technologie

IBM Workplace Client Technology, Rich Edition

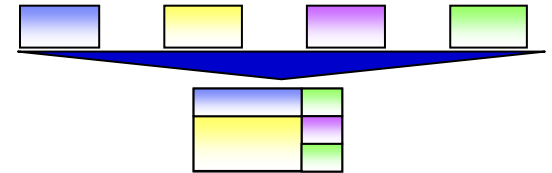

IBM Workplace Client Technology, Micro Edition

La nouvelle version d'une gamme de produits

- Release 2.0 des produits Lotus Workplace
 - IBM Lotus Workplace Messaging (Web et rich client)
 - IBM Lotus Workplace Documents (Web et rich client)
 - IBM Lotus Workplace Team Collaboration (Web)
 - IBM Lotus Workplace Web Content Management (Web)
 - IBM Lotus Workplace Collaborative Learning (Web)
 - IBM Lotus Workplace Builder (avec LW Team Collab et LW Documents)*
- IBM Lotus Workplace for Business Controls and Reporting 2.0

La technologie *IBM Workplace client* c'est :

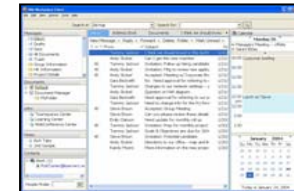

Une plate-forme technologique qui s'installe dynamiquement sur son poste client et qui permet un accès plus performant aux applications locales + serveur

La possibilité d'étendre la sécurité et la gestion des applications client-serveur directement au niveau du poste client (PC, Thinkpad, PDA, téléphone mobile,...)

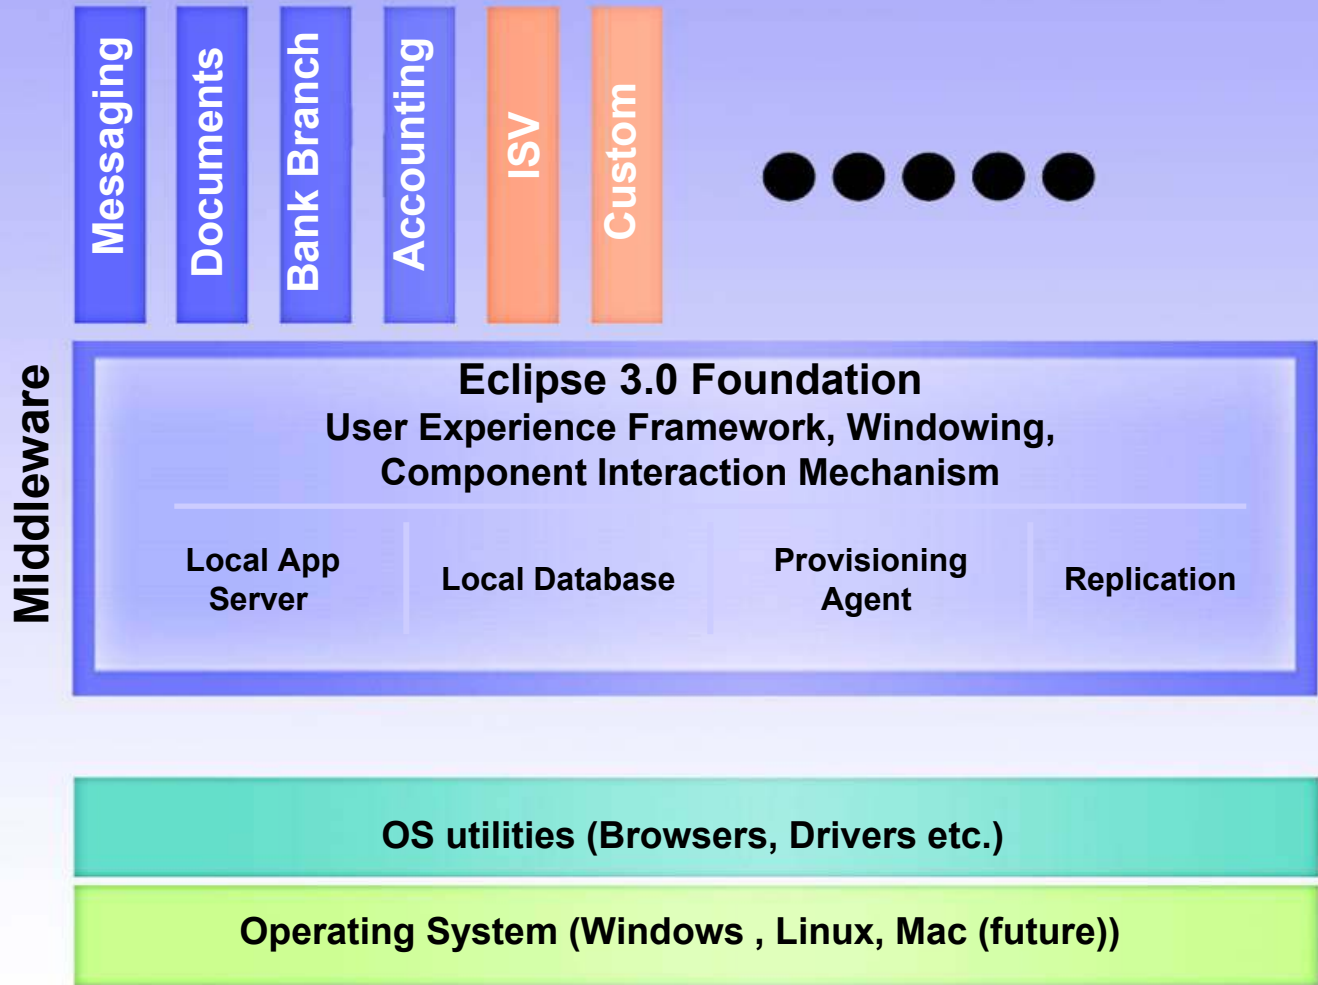

Lotus Workplace Messaging et Lotus Workplace Document Management seront les premiers logiciels IBM à utiliser la technologie *IBM Workplace Client*

La fondation technologique pour les produits Lotus Workplace utilisant un client riche ainsi que pour l'ensemble des logiciels IBM...et des solutions de partenaires éditeurs

Messagerie **Gestion de contenu Web**
Learning **Espaces collaboratifs**
Portail **Gestion des documents**
Bien plus encore....

La technologie IBM Workplace Client

User Experience

- Rich, Contextual
- Disconnected
- Componentized
- Provisioned

Replication/
Synchronization

Provisioning

Workplace Client Technology

- Componentized
- Server Managed
- Pervasive
- Secured Data

Les produits de la gamme Lotus

Les produits collaboratifs

** Utilise la technologie IBM Workplace Client*

** Inclus le nouveau "Workplace Builder"*

Lotus Workplace Messaging 2.0

Accès Web – Etendre à moindre coût l'accès à la messagerie dans toute l'entreprise

- Investissement protégé (basé sur les standards)

Conçu pour s'intégrer facilement aux composants existants (cf votre annuaire LDAPv3)

- Interface utilisateur intuitive
- Améliorations en 2.0

Agenda de groupe et planification

Outils de Productivité

Visualiseurs pièces-jointes

Recherche

Archivage/Restauration de BAL/Dossiers

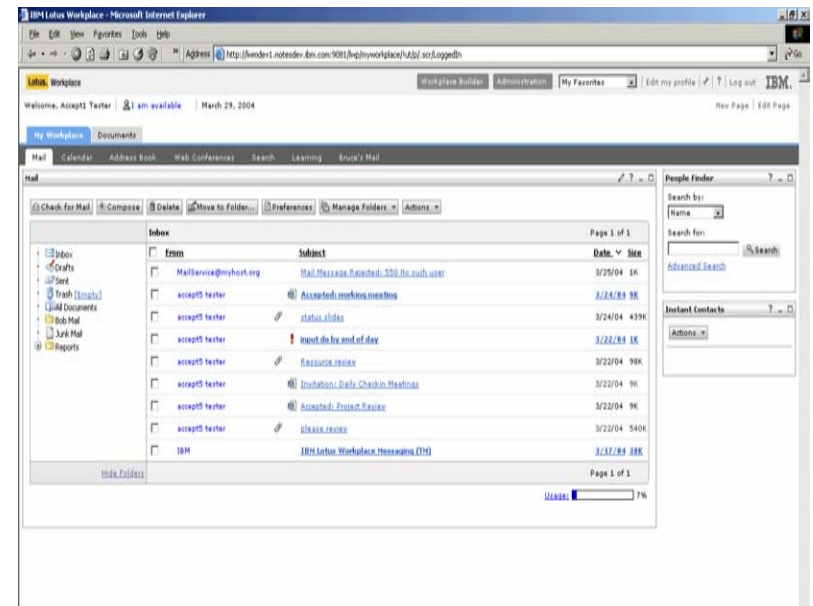

Support du SGBD Oracle

Intégration de la Gestion de Documents

Support de plateformes supplémentaires & annuaires LDAP

Filtre anti-spam

API anti virus/spam étendues

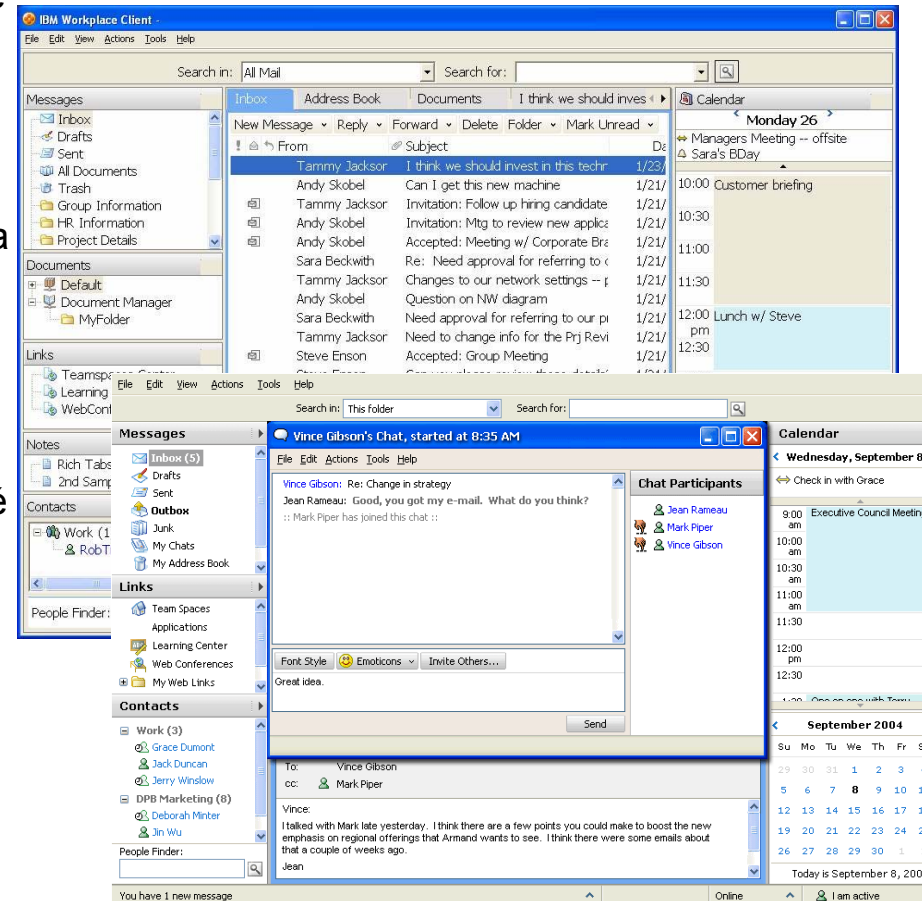

Client léger (Web)

Lotus Workplace Messaging 2.0

Le choix et la flexibilité du Workplace Client

Pour les utilisateurs ayant besoin d'outils intégrés et de capacité de travail en mode déconnecté

- Les principaux bénéfices de la technologie IBM Workplace Client
 - Mode déconnecté pour la messagerie et l'agenda
 - Gestion centralisée des déploiements clients
- Fonctions de productivité étendue
 - Interface utilisateur
 - Espace de stockage local sécurisé
 - Messagerie instantanée intégrée, avec possibilité de sauvegarde des dialogues
 - Correcteur orthographique
 - Recherche plein texte dans la messagerie locale
 - Préférences - Synchronisation, sécurité, paramètres, etc
 - Indicateurs
 - Et d'autres ...

Lotus Workplace Team Collaboration 2.0

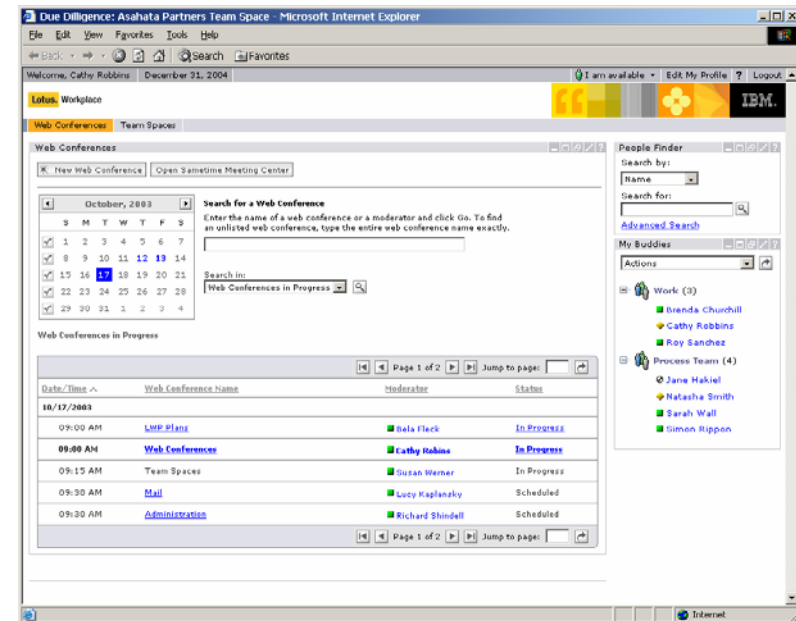

Messagerie instantanée intégrée, réunions virtuelles et espaces collaboratifs

Application collaborative intégrée, prête à l'emploi, avec les outils pour en créer de nouvelles

- Applications prêtes à l'emploi
 - Instant Messaging and Presence Awareness
 - Réunions virtuelles
 - Espaces collaboratifs
 - Workplace Builder
- Nombreuses améliorations Version 2.0
 - Partage d'applications
 - Notifications par messagerie
 - Plannification, préparation et recherche de réunions virtuelles
 - Infrastructure native SIP
 - Intégration de l'agenda
 - Etc ...

Inclus le nouveau Workplace Builder

Ex. Créer un Espace de partage pour réponse à un Appel d'Offre avec le bon contenu, les bonnes personnes et les outils pour gérer le processus.

Lotus Workplace Web Content Management 2.0

Application qui simplifie, pour tous les utilisateurs, la création, la gestion et la publication de documents Web pour tout site internet, intranet ou extranet

■ Solution complète de gestion de contenu

Créer, gérer et publier du contenu complexe dans Lotus Workplace

Développer et réutiliser le contenu dans de multiples sites Web dynamiques ainsi que dans Lotus Workplace

■ Flexible, évolutif et facile à utiliser

Des utilisateurs non techniques peuvent facilement créer des sites Web (cf. configuration de modèles de contenu sans développer)

Editions Java et Domino existantes

■ Information personnalisée

Contenu pertinent pour l'utilisateur, en fonction de son rôle, et délivré dynamiquement

■ Améliorations et nouvelles fonctions :

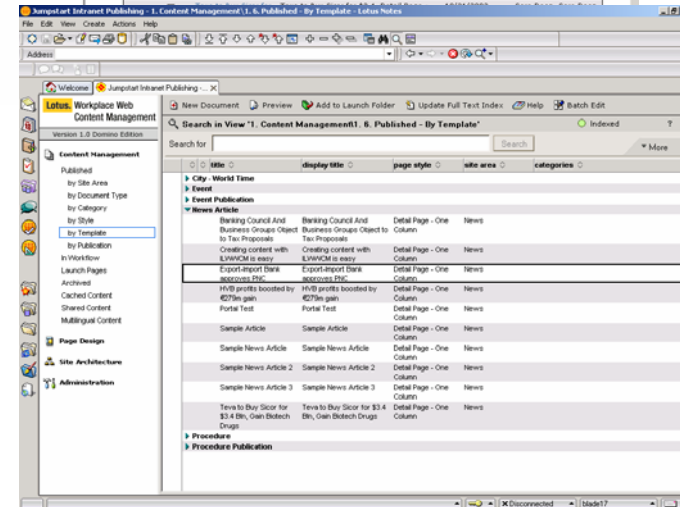

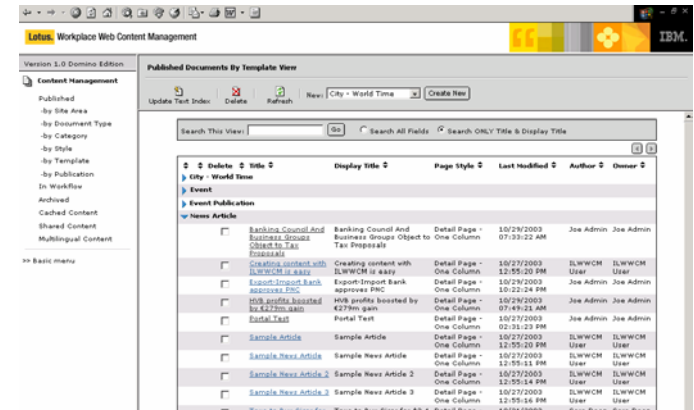

API Externes

Gestion de version et restauration

Amélioration en visualisation 400-500%

Langues Groupe 2 (bi-di à venir)

Intégration avec DB2 Content Manager

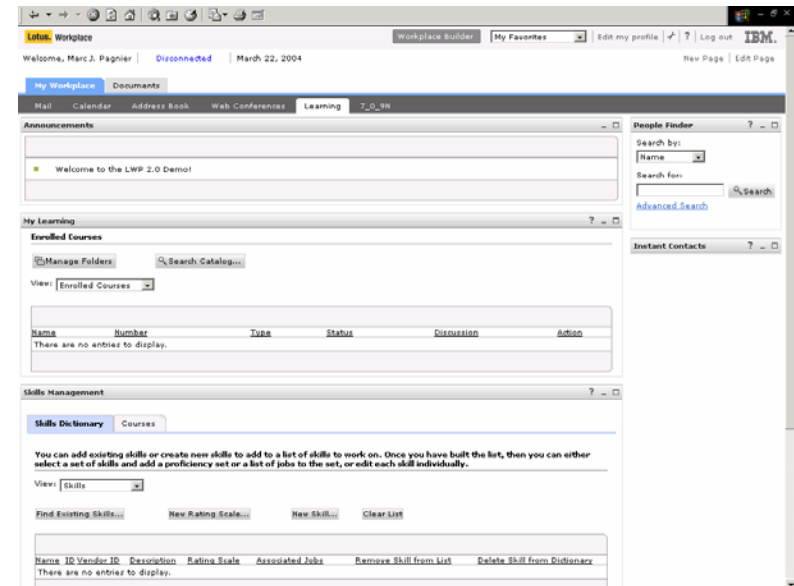

Lotus Workplace Collaborative Learning 2.0

Système des gestion des formations pour améliorer les compétences et connaissances

Application collaborative pour gérer les programmes de formation de l'entreprise, les cours et les ressources

- Outils de gestion des compétences intégré
 - Les managers peuvent identifier les méconnaissances et créer des programmes de formation individualisés
 - Correspondance compétences & métiers utilisateurs
 - Plan de développement individuel
 - Les employés peuvent être proactif /manques
- Intégration avec Lotus Workplace Messaging (Msg & agenda) et Workplace Team Collaboration
 - Utilisation de "Team spaces" pour les échanges
 - Envoi de notifications à Lotus Workplace Messaging
 - Intégration de l'agenda avec Lotus Workplace Messaging
 - Utilisation de Lotus Workplace Team Collaboration pour le présentiel/messagerie instantanée dans le contexte de cours en ligne
- Améliorations des performances et support de plateformes supplémentaires

Stratégie des outils Lotus Software

Etendre la population de “développeurs” selon leur rôle

Pour des utilisateurs avec des compétences différentes

Optimisation des outils pour chaque plate-forme

Interaction entre outils & plate-formes

Utilisateurs fonctionnels/Administrateurs

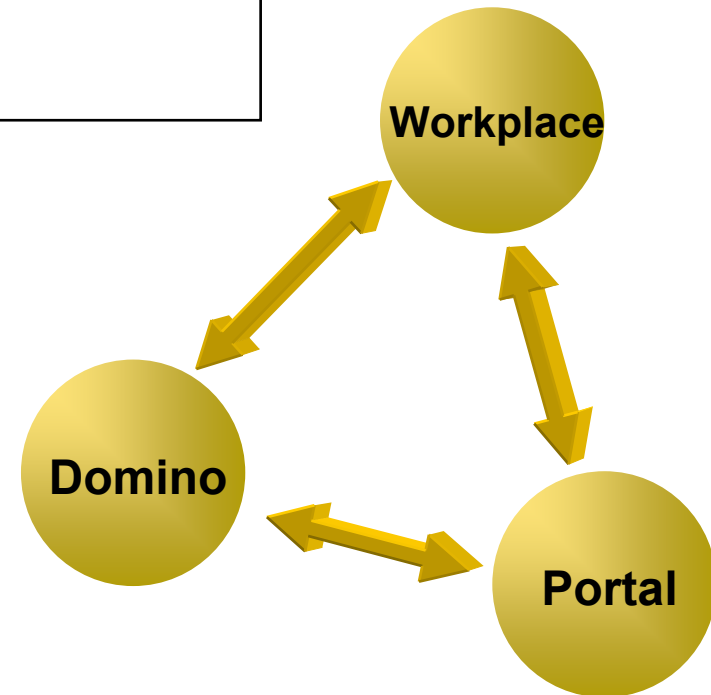

- ✓ Besoin d'outils simples à utiliser (orienté tâches)
- ✓ Workplace Builder

“Développeurs” fonctionnels

- ✓ Besoin d'outils visuels et productifs
- ✓ Domino Designer & Lotus Enterprise Integrator
- ✓ Workplace “Designer”

Développeurs J2EE

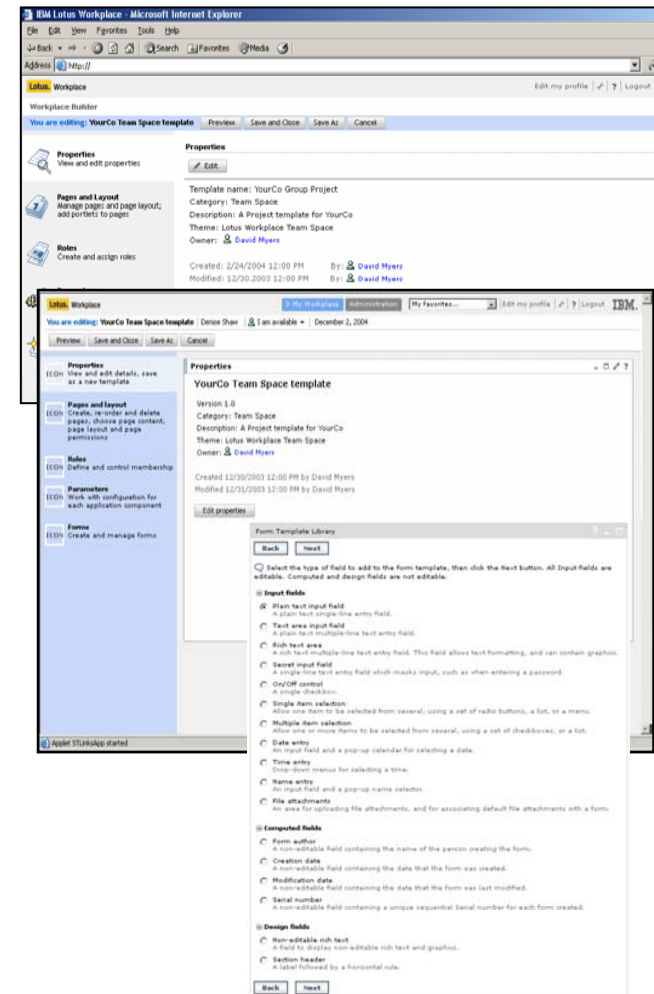

- ✓ Besoin d'outils puissants et variés
- ✓ WebSphere Studio + Toolkits

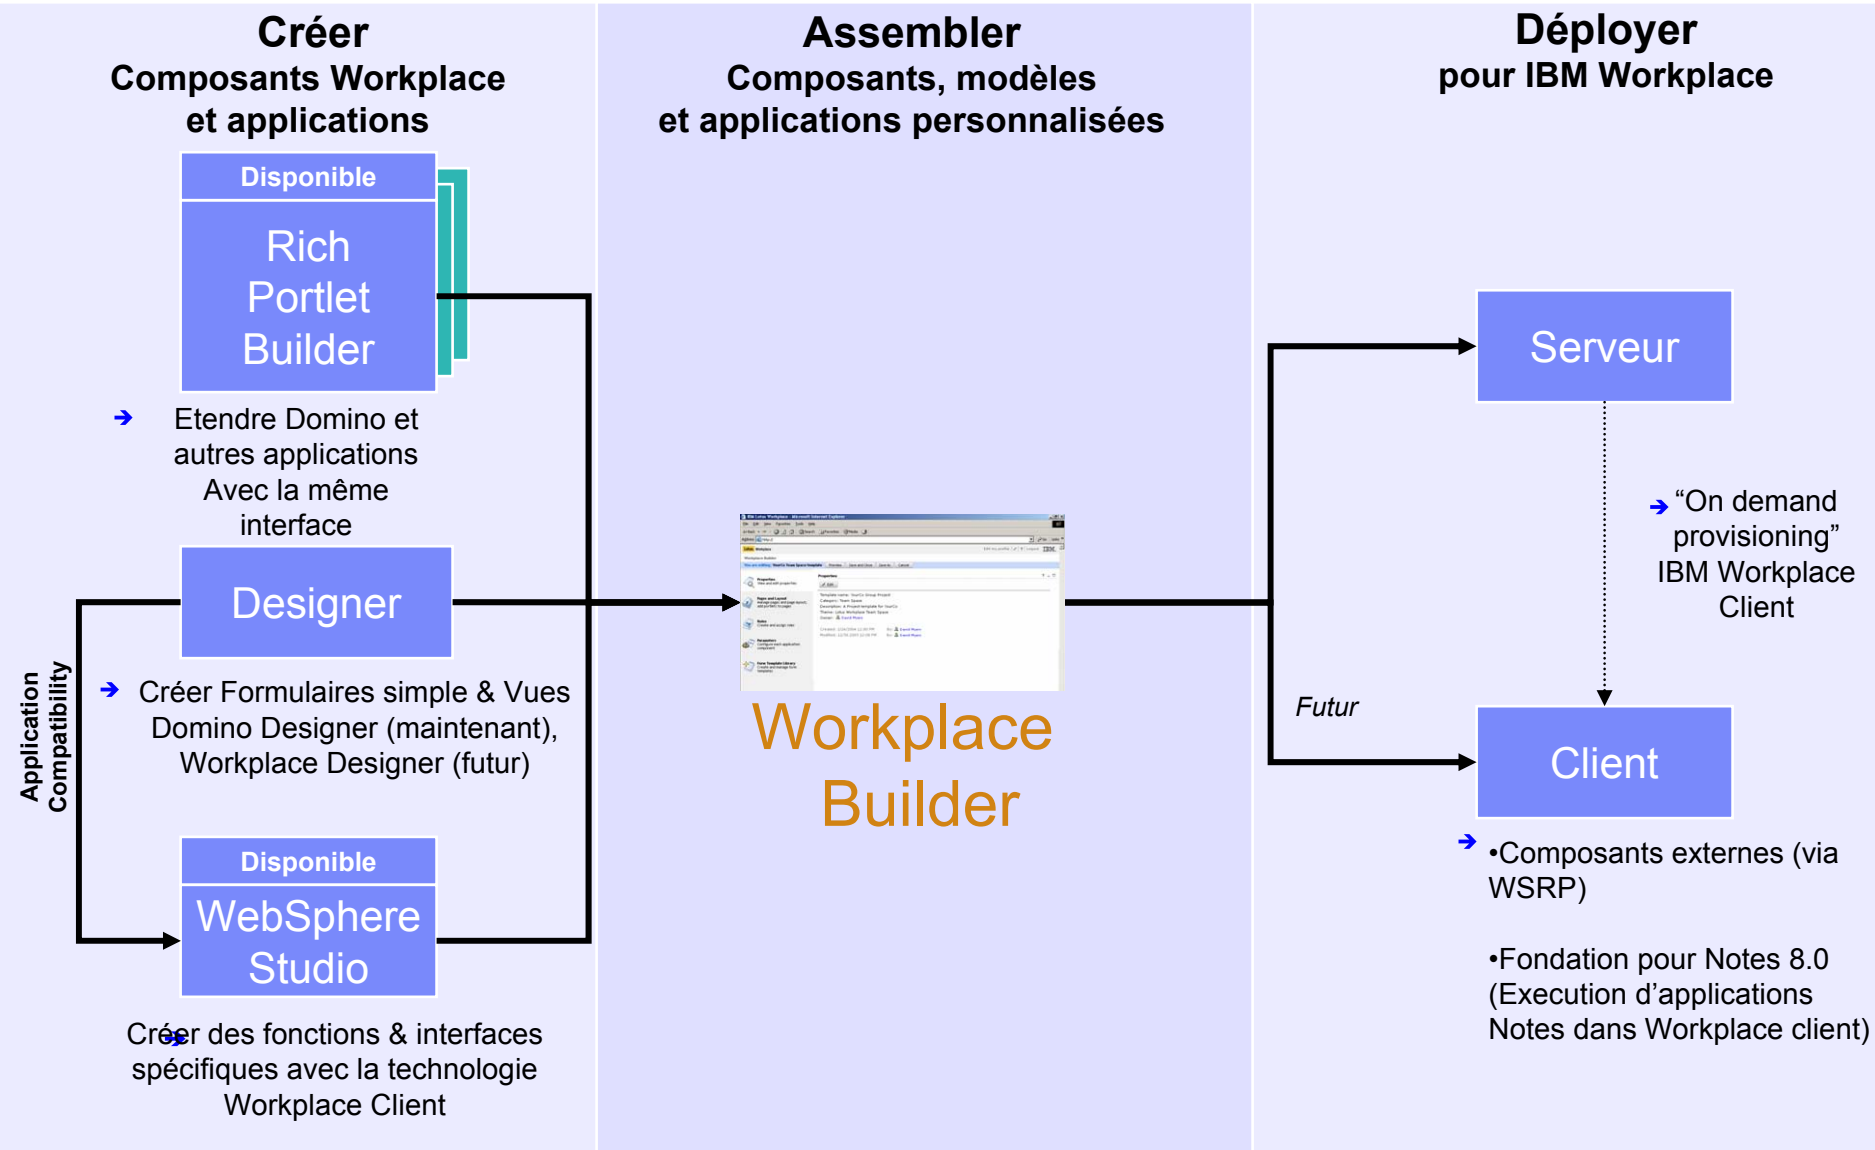

Lotus Workplace builder

Personnaliser et créer de nouveaux Workplaces, modèles ou formulaires pour des besoins métiers spécifiques

- Outil “Self-service” pour utilisateurs fonctionnels
 - Créer une application à partir d'un modèle sans développer
 - Adapter une application Workplace existante
 - Créer et modifier des modèles
 - Contrôles définis par les politiques d'administration
 - Définition des contrôles d'accès ou création de nouveaux formulaires sans assistance (informatique)
- Avantages
 - Réduire les coûts de développement d'applications collaboratives
 - Rapidité – modèles ré-utilisables et enrichissables à volonté
 - Baisser les coûts IT - administration par le “propriétaire” fonctionnel (création et accès)
 - Capitalisation de l'expertise – utilisation/partage des outils habituels du portail (interface, look & feel, etc)
 - Ré-utilisation d'applications & contenu existant – Notes/Domino, SAP, JDBC, RH, etc.
- Disponible avec Lotus Workplace Team Collaboration 2.0
- Disponible avec Lotus Workplace Documents 2.0
- Disponible pour les autres produits dans les futures releases

Current Issue

Delta Pacific Bank is having a problem with their monthly financial reporting tool. They have set the end business day for the month to the 28th on all months, but the tool resets to the calendar last day. They would like to evaluate new solutions for this problem.

Issue History

July 10, 2003 | August 22, 2003 | December 9, 2003 | January 5, 2004

Delta Pacific Bank is experiencing data corruption problems when creating

From: Arthur Fontaine/AlleCorp **To:** Alan Lepofsky/AlleCorp
Subject: Domino Express is a great solution for the SMB Market **Cc:**

<http://lotus.com/products/product4.nsf/wdocs/dominoexpress>

IBM Lotus Domino Express

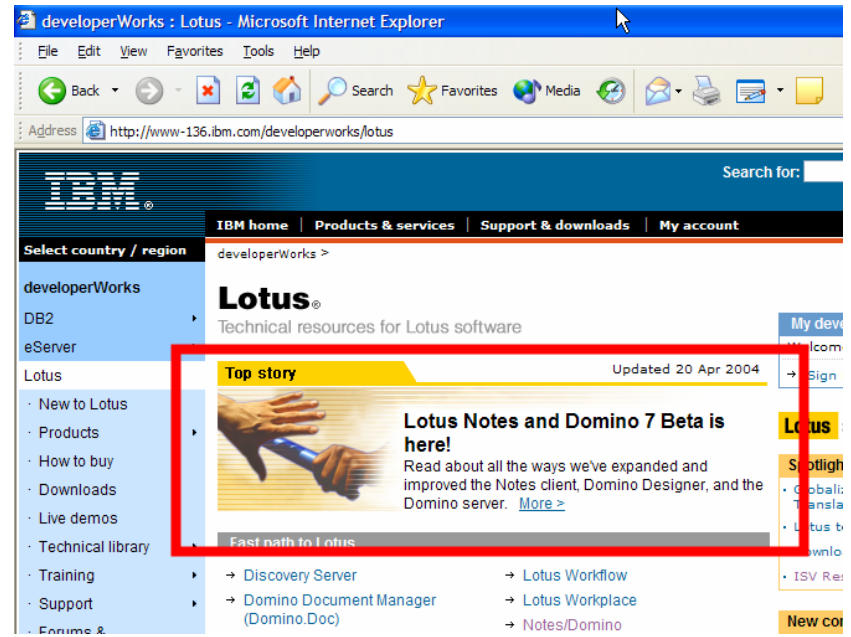

- Offerings designed to make it easy for small and medium business (SMB) organizations to acquire, deploy, and use the same rock-solid messaging, scheduling and solutions leveraged by large organizations.
- Pricing, packaging, and promotion are optimized for small and mid-sized organizations.
- Available only for companies that have 1000 employees or less.

Domino Collaboration Express (purchased per user, 1-1000)

- \$119 per user (SRP US dollars) / \$89.25 per user for competitive trade up (SRP US dollars)
- Allows customers to use both the messaging and collaborative capabilities of Domino.
- Customers can choose to access Domino via any of the Lotus Notes client solutions

Notes Futures – Plans for Release 7

- Productivity enhancements
 - Increased presence awareness (C&S, To Do, Discussion, and TeamRoom)
 - Add e-meeting capability to an existing meeting
 - Asynchronous (non-blocking) on database open
 - Auto processing accept – double book conflicts
- Usability enhancements
 - Archive/Cleanup Utility for Calendar Entries
 - Sort by subject
- Microsoft integration
 - Updated viewers / filters for Office 2003
- Interoperability with Workplace Instant Messaging

MS Office SmartTag support

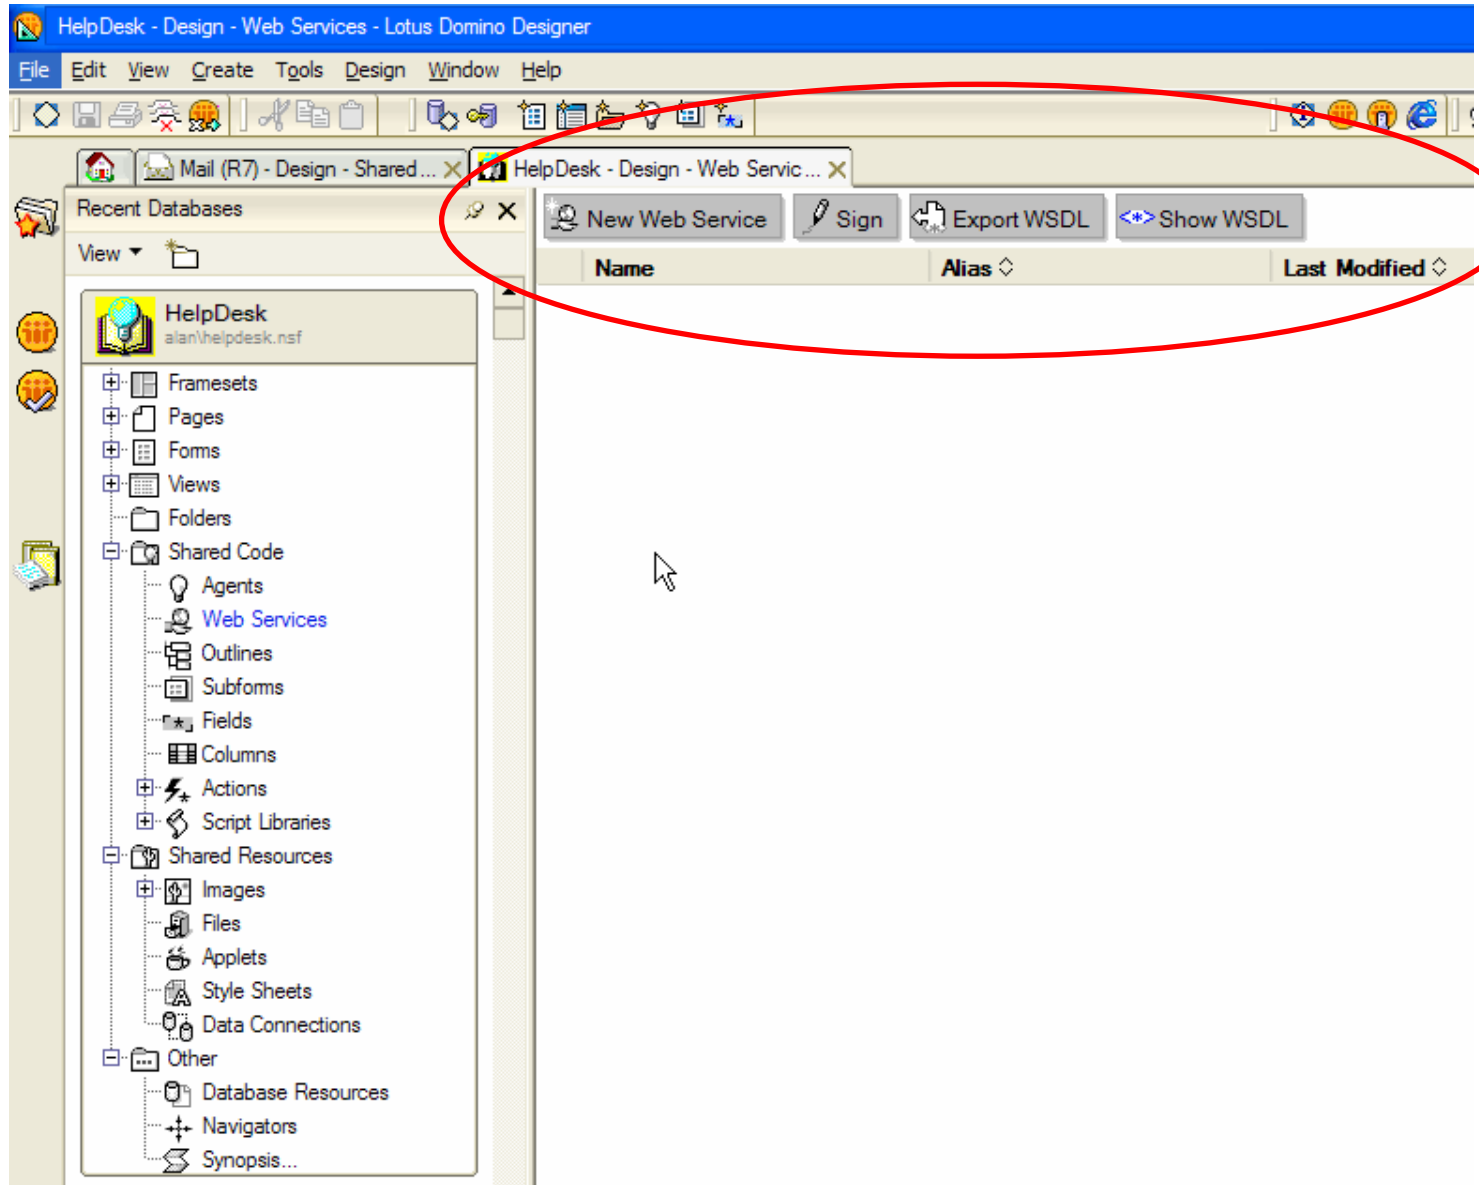

Additional SPAM handling rules

Any information about future releases may change before time of shipping

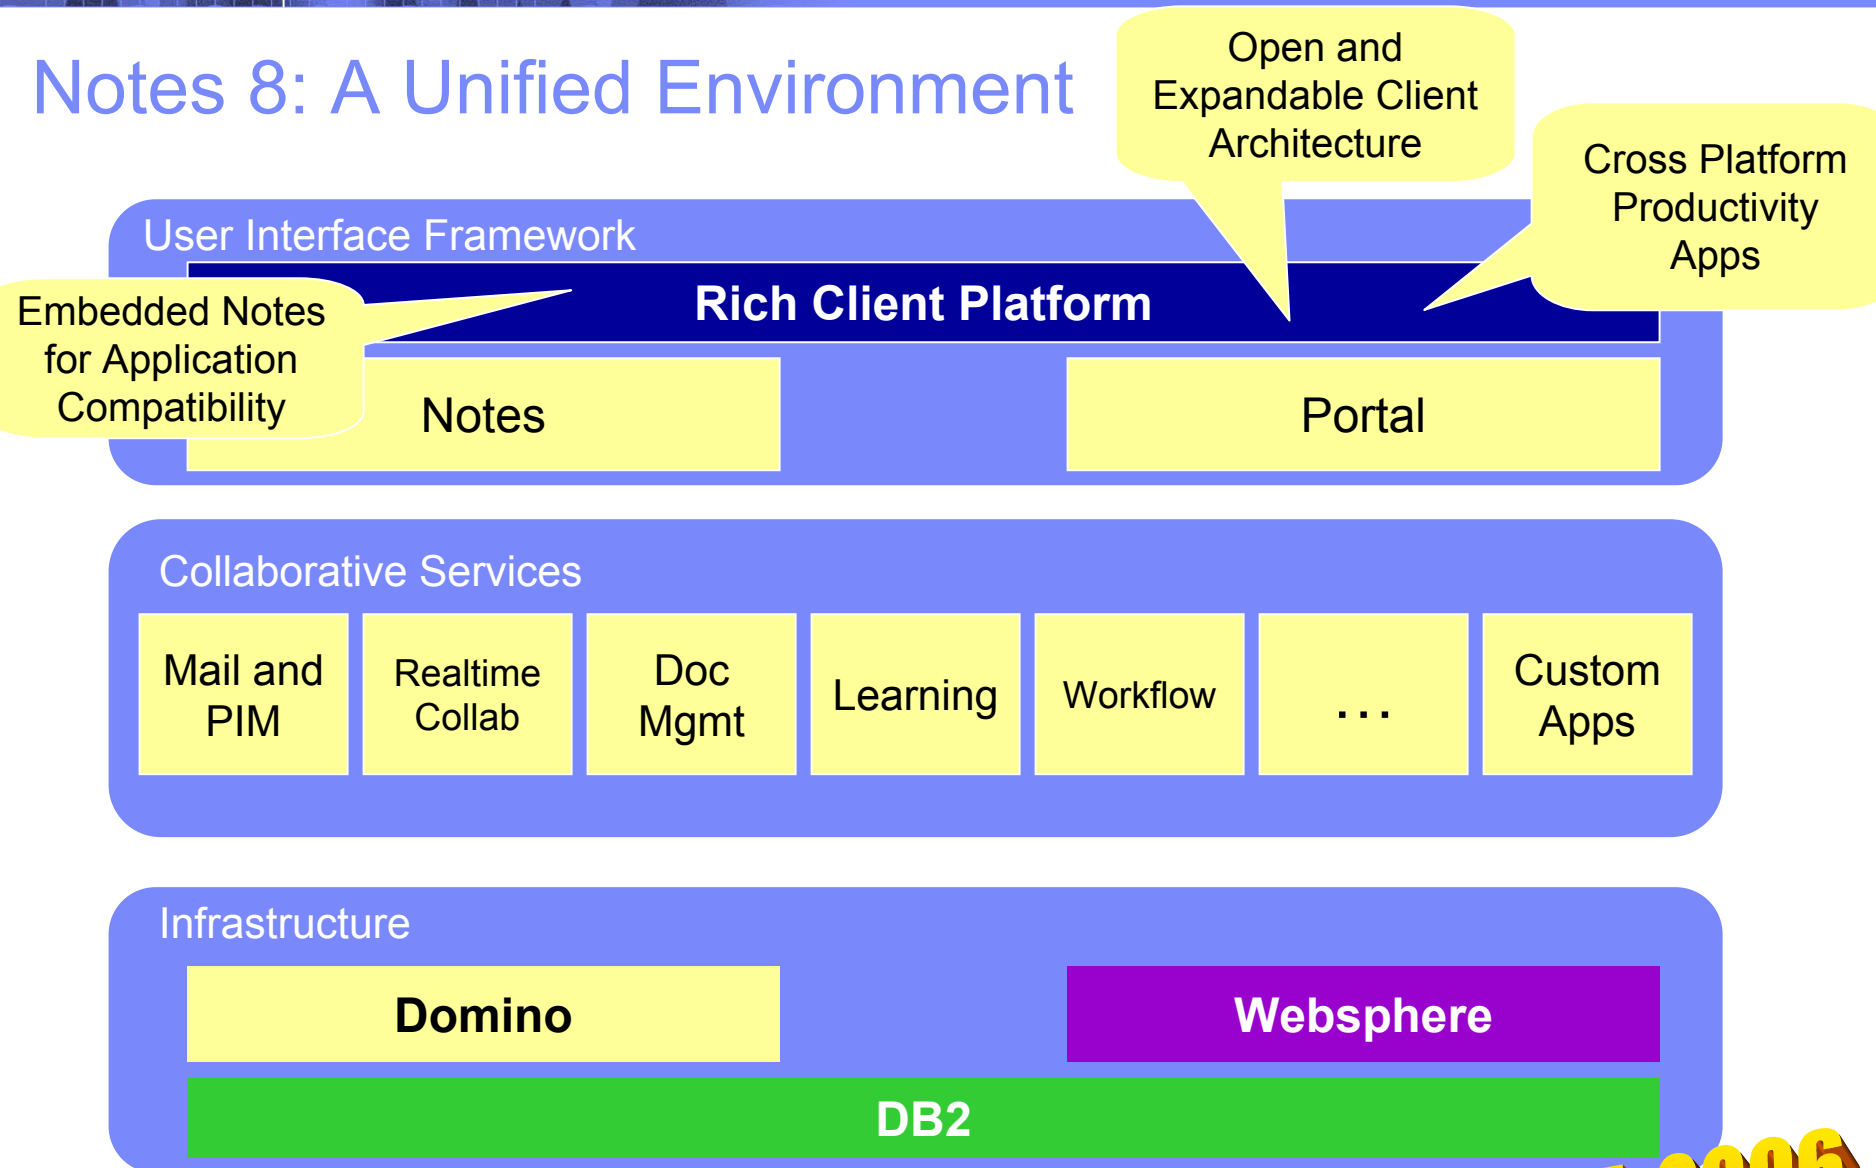

Domino Futures – Plans for Release 7

- Performance Improvements
 - Tuning taking place across code base
 - Goal is to increase capacity by 25-50% on same hardware as D6.5
 - 25% overall CPU utilization reduction
- DB2 available as alternative data store on a per db basis
- Domino Domain Monitoring (DDM) a.k.a “one stop admin”
- Web Admin port to Mozilla
- Smart Upgrade enhancements
- Client policy Administration
- Disclaimers for outbound internet messages
- Improved MIME->CD conversion fidelity
- S/MIME for DWA

Any information about future releases may change before time of shipping

In Conclusion

- The experts agree, IBM delivers the best messaging and collaboration products in the industry.
- 6.5.1 represents a great shift in TCO focused releases
- Lotus is focused on enabling collaboration throughout your organization.
- Start enabling awareness into your Domino applications today!
- Make sure to test ND7 Milestone1

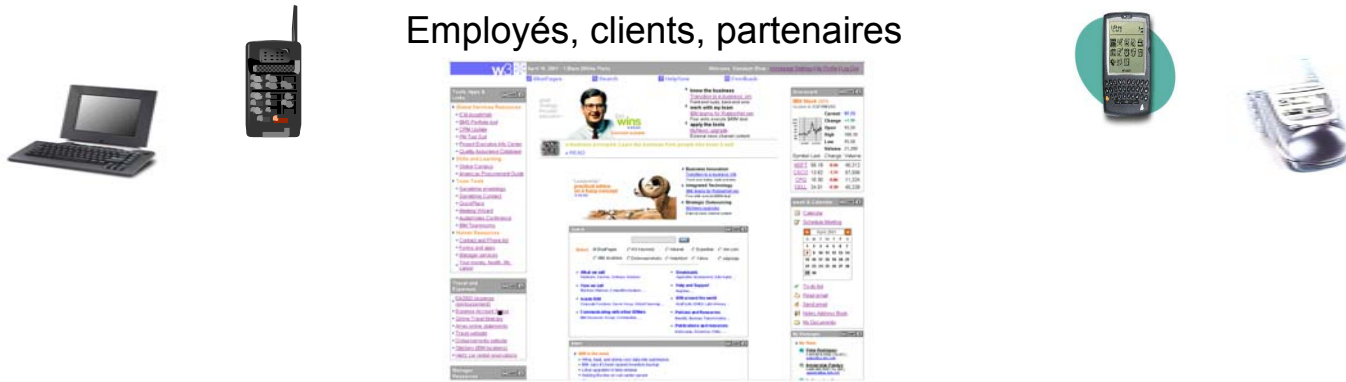

Agenda

Lotus Notes & Domino 6.5.1 et roadmap

 **Portail : enjeux et solution IBM Websphere Portal**

Valoriser son environnement Domino avec IBM WebSphere Portal

Le portail est un point unique d'accès personnalisé et sécurisé aux applications, processus, personnes et contenu

Employés, clients, partenaires

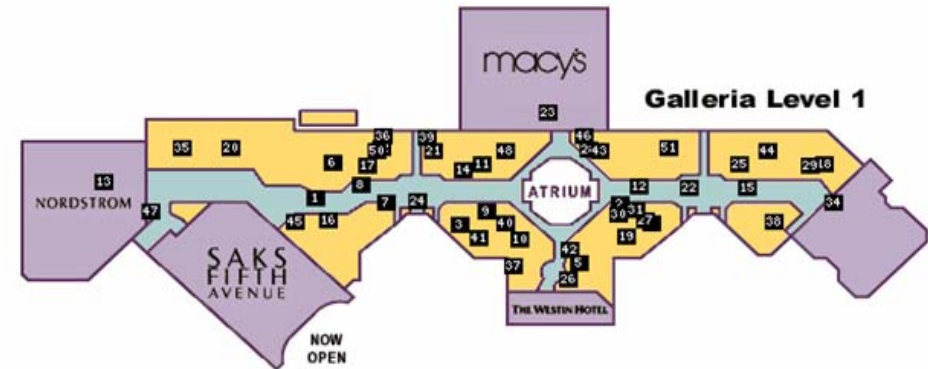

Pourquoi un portail ?

Direction du groupe = IT et fonctionnels

- Comment démarrer ?
- Quel rayon déployer en premier ?
- Quelle organisation du magasin ?
- Phase 2
- Phase 3

Client = Utilisateur final

- Chaque client à des attentes différentes
- Besoin de services communs (ex : facilité d'accès au parking)

Direction du magasin = Business Unit

- Accroître le trafic pour améliorer les ventes
- Mise en oeuvre du Self-service à moindre coûts
- Fournir des services communs : parking, sécurité, caisse...

Interface utilisateur

Navigation simple & intuitive à partir d'onglets / pages

Chaque page est partagée en zones visuelles, appelées **Portlets**, pour séparer les composants fonctionnels

Des fonctions accessibles en permanence

The screenshot shows the IBM On Demand Workplace interface in Microsoft Internet Explorer. The browser window title is "On Demand Workplace Home - Microsoft Internet Explorer". The address bar shows the URL: "https://w3.ibm.com/portal/myportal/cmd/cs/ce/155/s/209/_s_1...".

The interface is divided into several portlets:

- Navigation Bar:** Home, Work, Career and life
- Essential links:**
 - About IBM
 - About w3
 - Aerospace & Defense Industry
 - Collaboration Central
 - Customer Reference Materials
 - Energy & Utilities Industry
 - Expense Accounts - Worldwide
 - Globalization Central
 - IBM Global Campus
 - IBM On Demand Community
 - IBM SiteServ
 - IBM Standard Software Installer
 - IBM Travel
 - Industrial Products
 - IT Tools
 - Learning Navigator
 - Our Values at Work
 - Presentation Central
 - Sam's w3 pages
 - Software Group Intranet
 - Speak Up Program
 - Telecommunications Industry
- News:**
 - Performance & Pay**: Performance metrics for first quarter 2004
 - Making a world of difference**: More than 13,000 employees from over 55 countries are registered with On Demand Community. Find out what your colleagues are doing, and how you can get involved.
 - Anatomy of an on demand business**: No single component can establish an on demand business. Today, IBM introduces new software and services to help companies develop and deploy Service Oriented Architectures. [Software Group]
 - Alert: Protect IBM from mass mail worms**: Run LiveUpdate and scan your workstation [Transforming IBM]
 - Boeing flies high with IBM**: Rational development tools lets Boeing improve the quality of its applications while keeping costs down. [Software Group]
 - Talk with Steve**: How does SWG secure funding for acquisitions? [Software Group]
- Search:**
 - BluePages**:
 - Name only (smith, jo*)
 - Entire profile ("grid computing")
 - Other searches**:
 - w3 intranet
 - ibm.com Internet
 - IBM news articles
 - IBM discussion forums
- Market report:**

Quoted at 4:05 PM, EDT on 22 Apr.

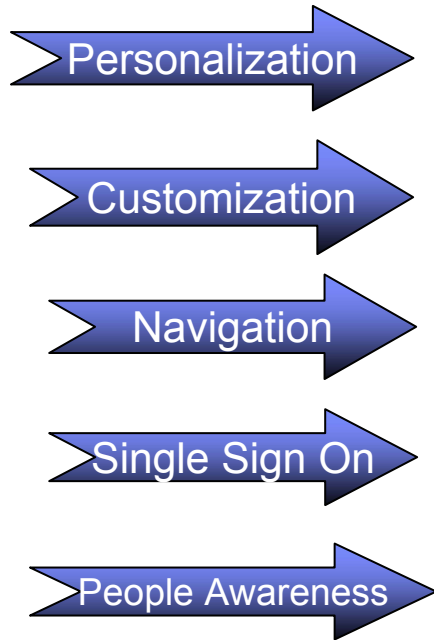

Symbol	Current	+/-
IBM	90.74	-0.52

Indices

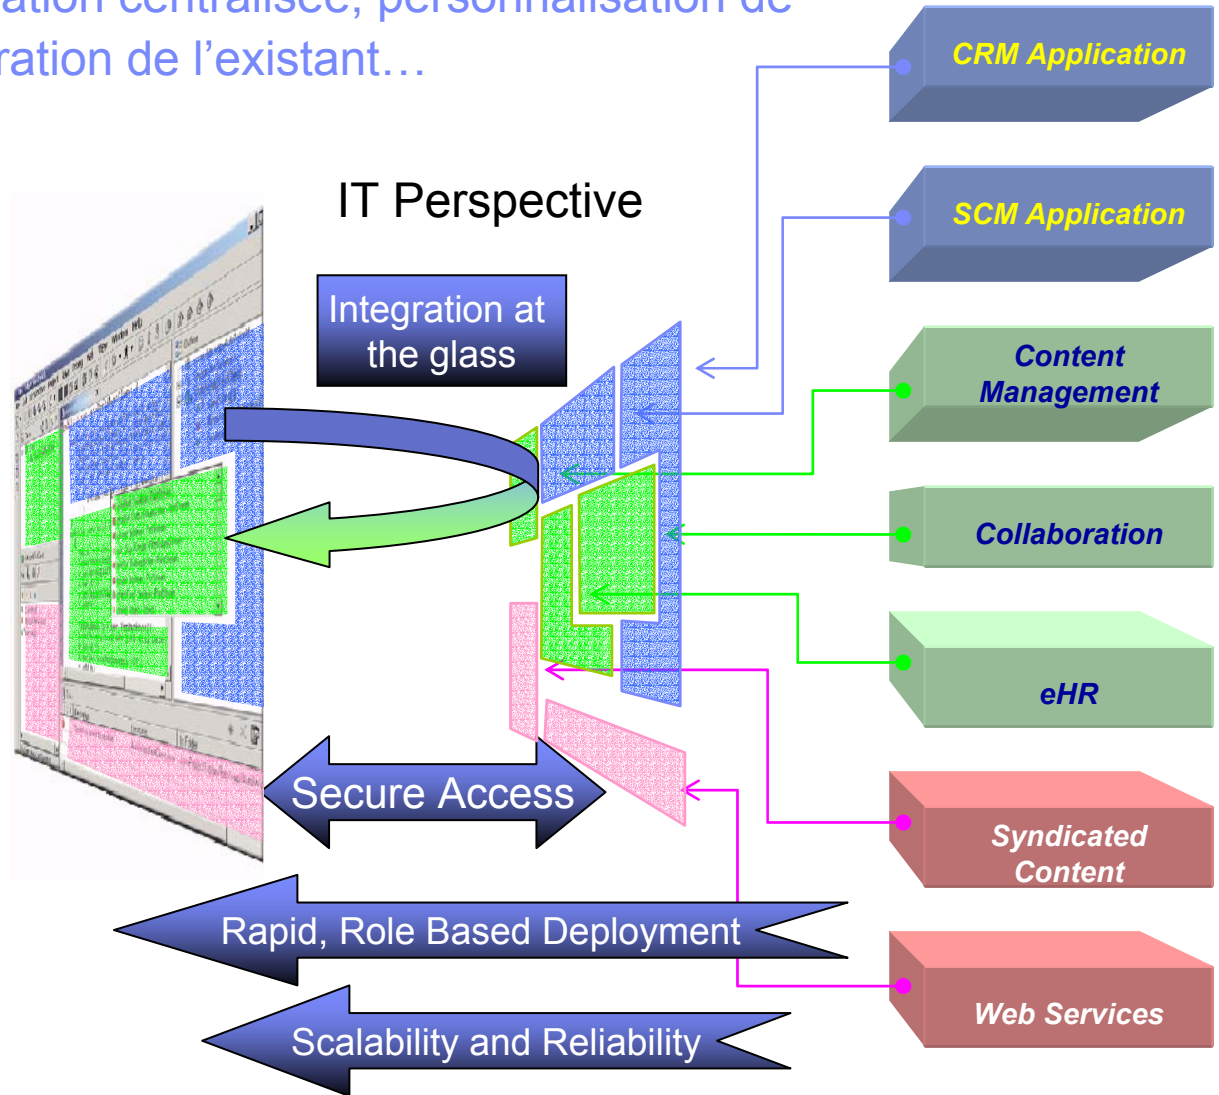

Index	Last
DOWJONES	10,461.20

Agenda

Lotus Notes & Domino 6.5.1 et roadmap

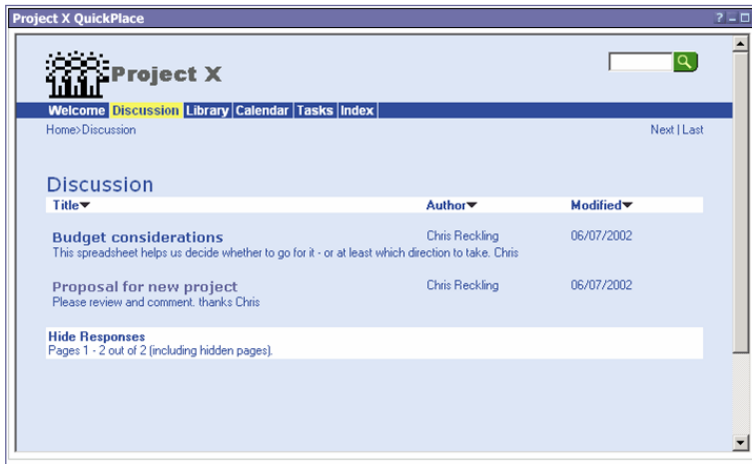

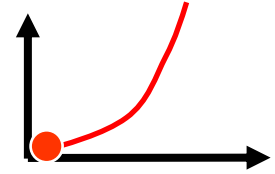

Portail : enjeux et solution IBM Websphere Portal

 **Valoriser son environnement Domino avec IBM WebSphere Portal**

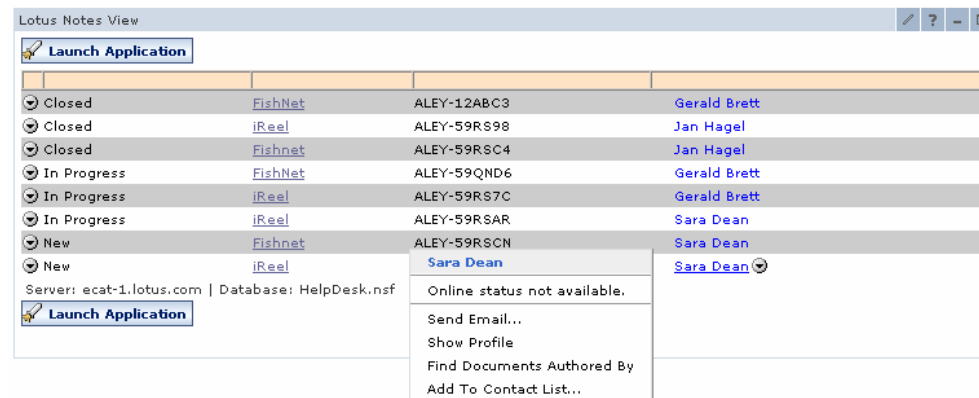

Il existe trois niveaux d'intégration avec le portail

1. Utilisation de portlets

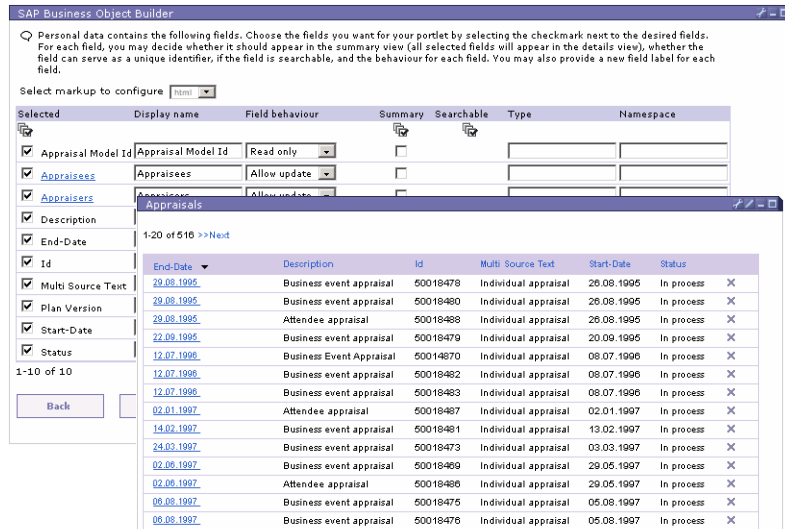

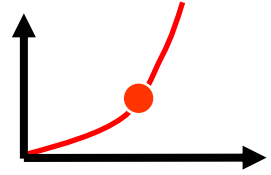

- Fundamental building blocks for WebSphere Portal and Lotus Workplace
- Provide a window into application content and actions
- Dynamically deployed to the server
- Support multiple viewing modes and markup

Portlet pour l'accès à une application Domino de Helpesk

2. Intégrateur d'applications WebSphere Portal (WPAI)

Création simplifiée de portlets (sans développement)

“Boîtes à outils” de création de portlets

PeopleSoft 8.0 & 7.5 Builder

Siebel Builder, SAP Builder, SAP iView
Builder, JDBC Builder, Domino Builder

WPCP Builder, Oracle Builder

...

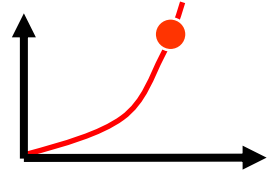

Création automatique de l'interface & du contrôleur à partir du framework

Interface utilisateur cohérente

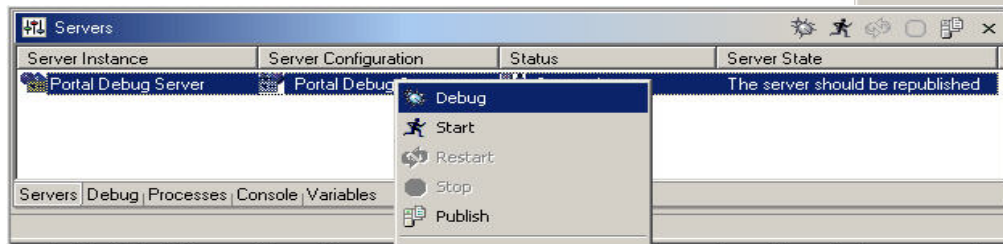

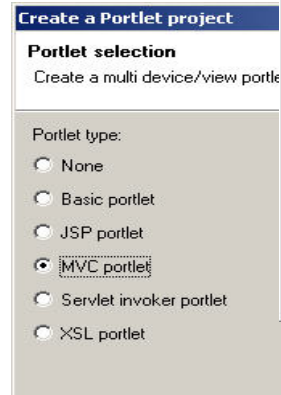

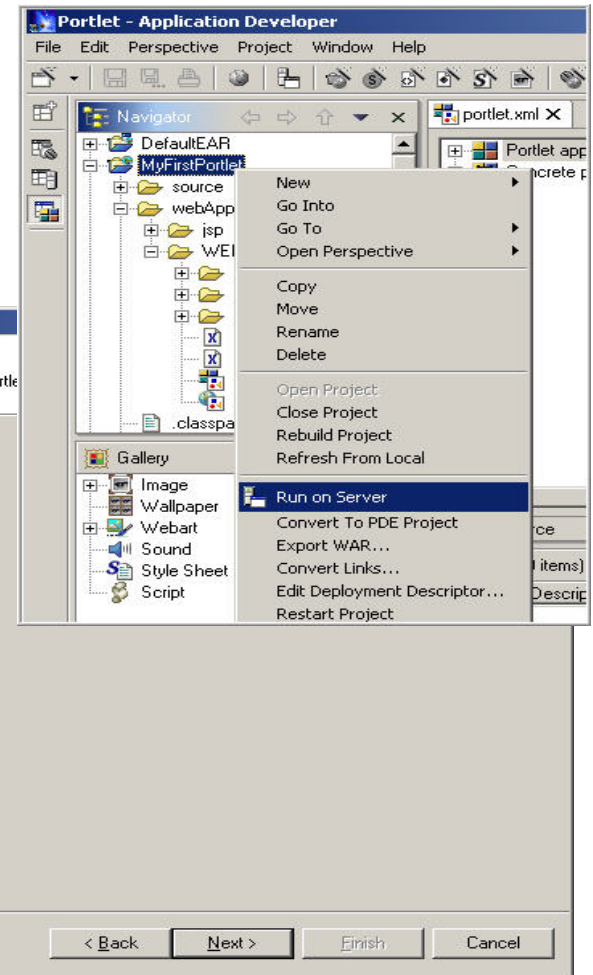

Activation automatique des fonctions
“Action sur clic”, présence en ligne,
accessibilité, ...

2. Développement spécifique avec WebSphere Studio & Portal Toolkit

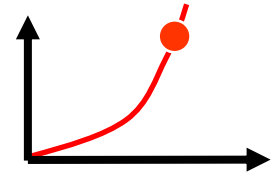

- Environnement de développement Java complet
- Assistants d'aide à la création de nouveaux portlets
- Wizards de productivité
- Test/Debug en ligne, local ou distant

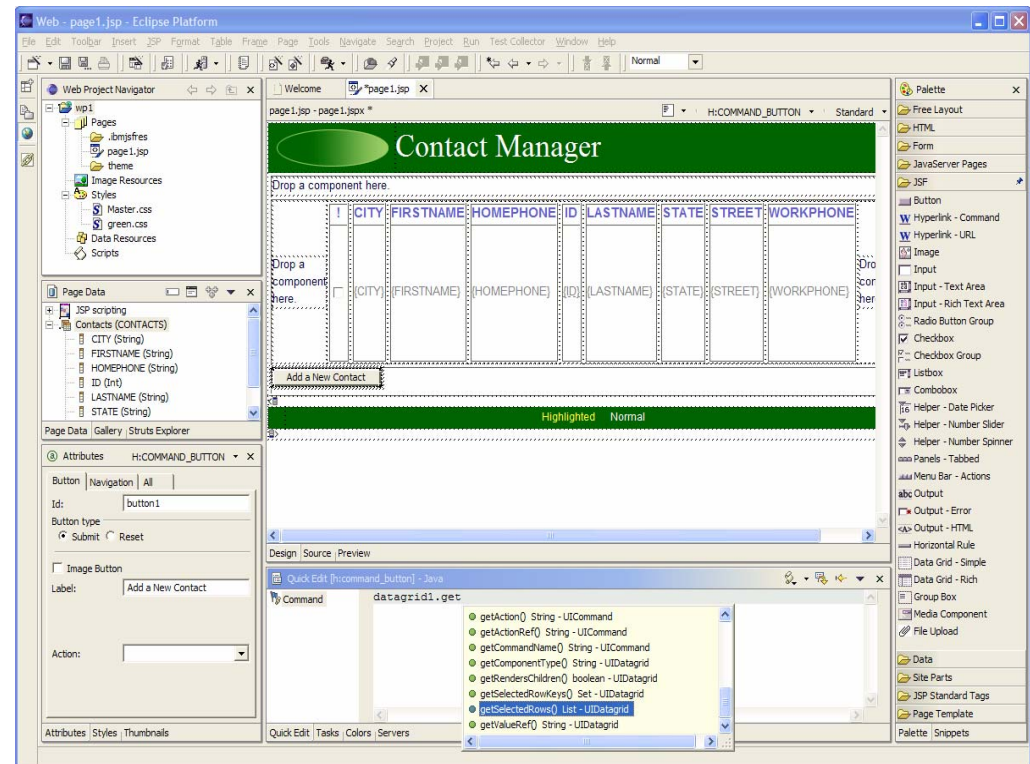

WebSphere Studio - Web Page RAD (a.k.a. Seoul)

(December 2003 – “JSF Beta”; Q1 – GA)

- Brings RAD to Java
- Simplified interface, combined with the power of WebSphere Studio
- Toolkits for Domino, Portlets, Bowstreet
- Future: Add Service Data Object for Domino

Différents moyens de connexion aux applications Domino

- Business User {
 - Out of box Notes/Domino Portlets
 - Portlet Builder for Domino
 - Domino Web Application Portlet

- Domino Skills {
 - XML access to Domino View data
 - Domino JSP Tags and Toolkit

- Java Skills {
 - Domino Java API's
 - WebSphere Data Object for Domino
 - Partner Products

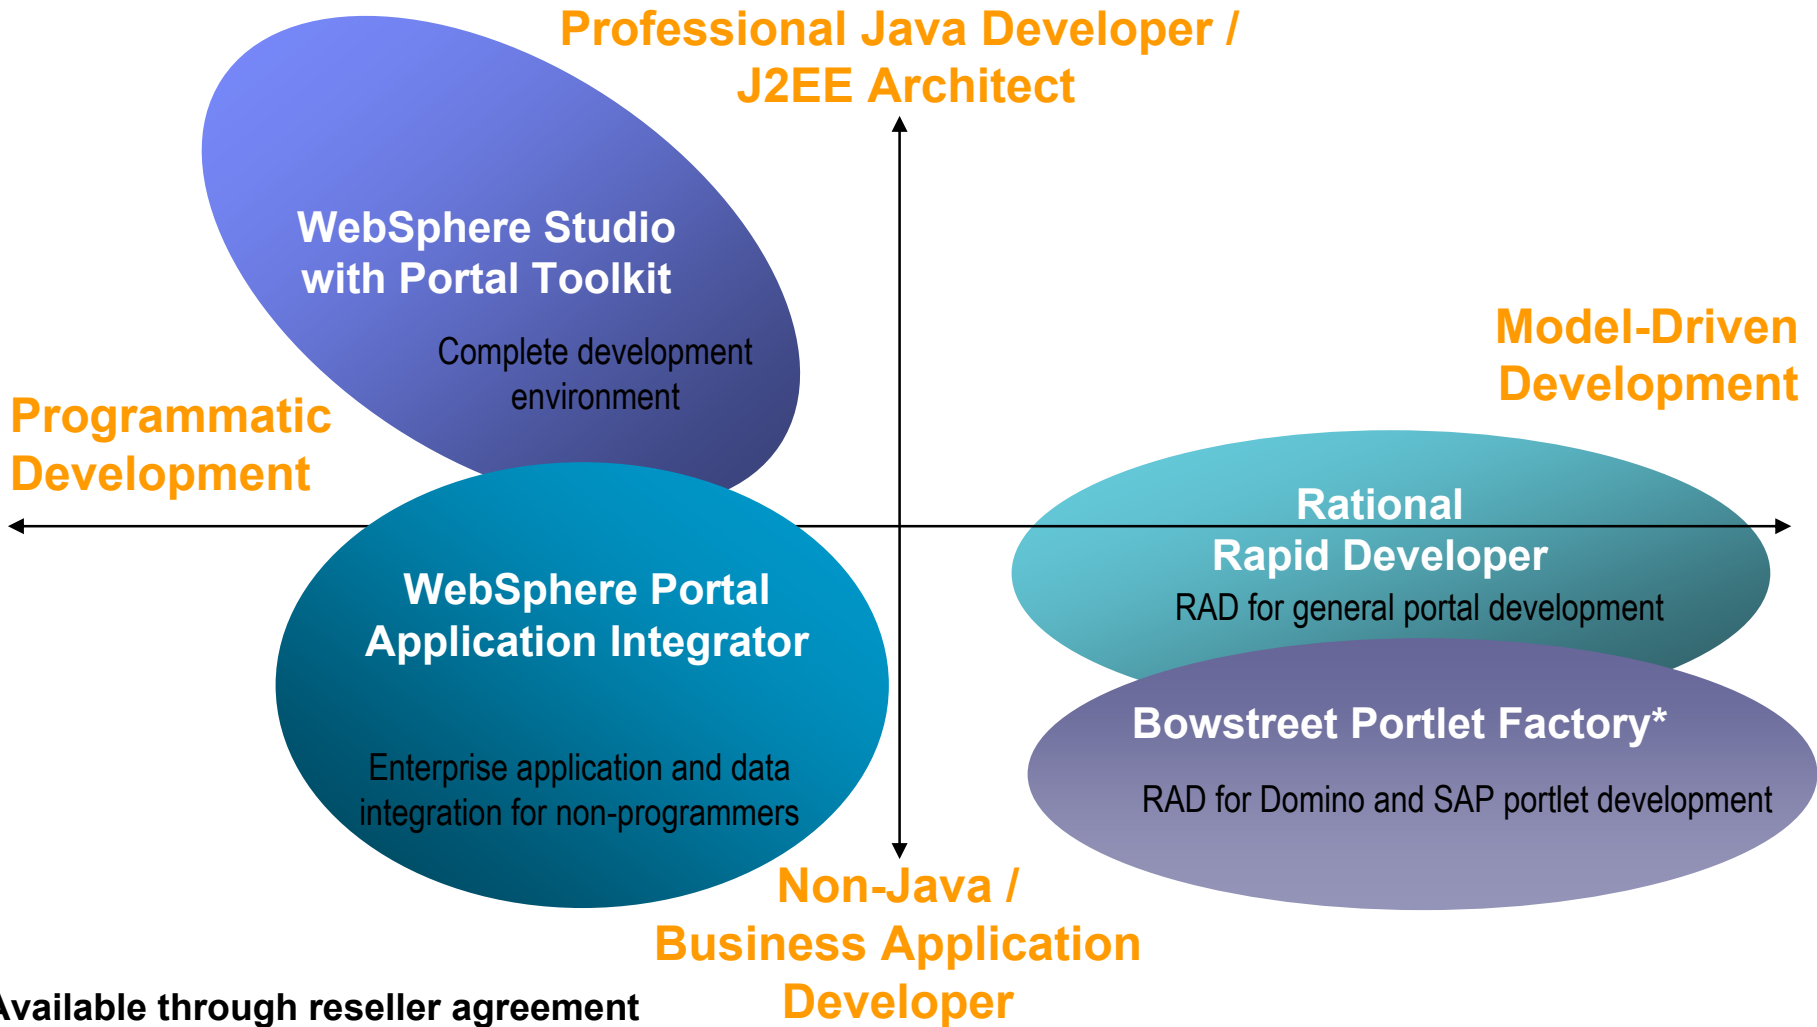

Bowstreet Portlet Factory

Lotus Collaborative Components

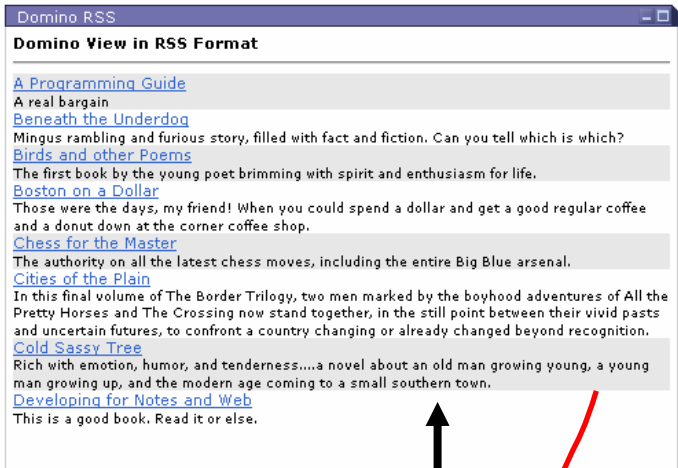

Portlet using LCC to access the Domino application.

Lotus Sametime Connect

Domino Web Application Portlet

Disponibile avec Domino 6.5.1

- Designed to allow Domino web apps to be surfaced in a LWP/Portal environment.
- Reverse Proxy – portlet uses a set of rules to map Domino generated URLs to Workplace/Portal such that all requests are channeled through Portal server.
- SSO – supports SSO between Workplace/Portal and Domino
- SSL – support secure transfer of data between Workplace/Portal and Domino
- Delivered as iframe first, web clipper in later releases.

Portlet Builder for Domino

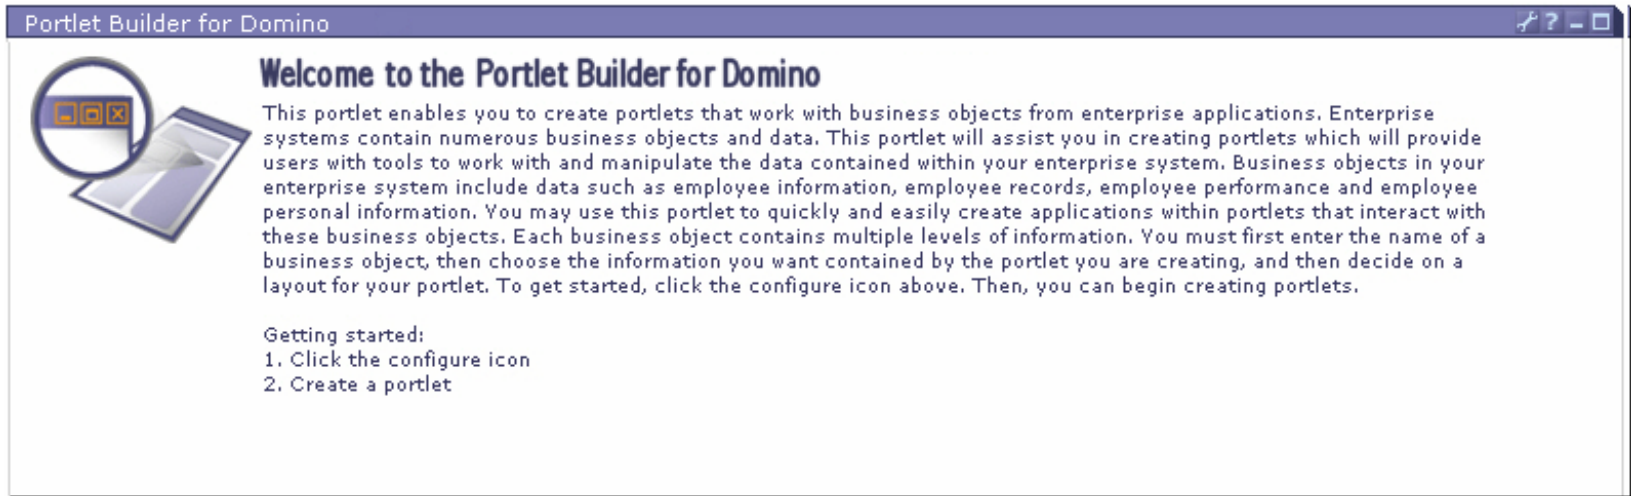

- A portlet to build Domino portlets

Simple Web interface to create portlets that access / manipulate data in Domino

No programming required

Views and documents

Basic create, edit, delete operations

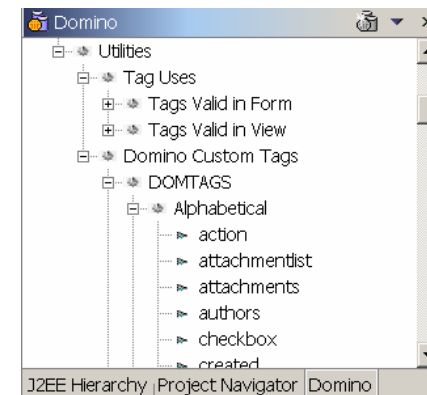

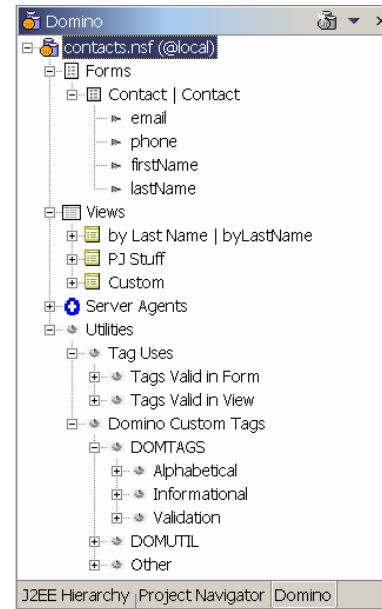

Domino Toolkit 1.1 for WebSphere Studio

- Designed to assist developers in using Lotus Domino 6 custom JSP tags.
- Version 1.0 of the toolkit shipped with Domino Designer 6.0.2
- Version 1.1 ships with Domino Designer 6.5
- New features

Support for WebSphere Studio 5.01 and 5.1

Categorization and drag-and-drop-enablement of all Domino Custom Tags in the Utilities menu.

Support for Domino Custom Tags within WebSphere Portal deployments

En synthèse...

- There are 3 primary platforms in the Lotus portfolio:
 - Lotus Domino
 - WebSphere Portal
 - Lotus Workplace
- There are a range of skills and needs that are met:
 - Business users
 - Developers
- Flexible tools optimized for platforms and role
 - Lotus Domino → Domino Designer
 - WebSphere Portal → WebSphere Studio
 - Lotus Workplace → Workplace Builder
 - Integration → Portlets

The screenshot shows a WebSphere Portal interface with several portlets. The 'Orders for October' portlet contains a table with the following data:

Order_ID	Customer_ID	Status
102001000001	3542877	ON_TIME
102001000002	3045388	COMPLETE
102001000003	8266472	COMPLETE
102001000004	2867377	ON_TIME
102001000005	2867377	DELAYED

Orange annotations highlight data flow:

- The **Order_ID** '102001000001' is circled in orange and has an arrow pointing to the 'Enter order id:' field in the 'Order Details' portlet.
- The **Customer_ID** '3542877' is circled in orange and has an arrow pointing to the 'Customer ID' field in the 'Customer Details' portlet.
- The **Order_ID** '102001000001' is also circled in orange and has an arrow pointing to the 'Enter order id:' field in the 'Account Detail' portlet.

The 'Order Details' portlet shows a table with columns: Order_ID, SKU, Quantity, Status, Tracking_ID. The first row contains: 102001000001, BB_128933, 7000, ON_TIME, 52787953. Below the table is an 'Enter order id:' field and a 'Submit' button.

The 'Customer Details' portlet shows fields for Customer_ID (3542877), Name (John Segal), Address (MoreProfit Widgets Corp., 101, Mayfield Av, Atlanta, GA), and Contact (j_segal@moreprofit.com). Below is an 'Enter customer id:' field and a 'Submit' button.

The 'Account Detail' portlet shows a table with columns: Order_ID, Total Value, Outstanding Balance. The first row contains: 102001000001, \$922,005, \$700,000. Below is an 'Enter order id:' field and a 'Submit' button.

The 'Tracking Details' portlet shows an 'Enter tracking id to display details:' field and a 'Submit' button.
