## **Owners of Rose XDE Developer for Java Who Use Rose Pro J**

**(This guidance also pertains to former owners of Rose XDE Developer for Java whose entitlements have already been converted to Rose Developer for Java)**

Summary: if you use Rose Pro J your replacement product will be Rational Systems Developer. (Optionally, you could pay to trade up to Rational Software Architect) Rational Systems Developer is already available to you via Anticipatory Access and you may begin to adopt it at any time. You do not have to worry about migrating any of your Rose XDE Developer for Java or Rose Developer for Java entitlements because over time, the entitlement issues will resolve themselves as part of the maintenance renewals process.

Timeframe	Option 1	Option 2 ( <b>preferred</b> )	Option 3
<ul style="list-style-type: none"> <li>Until market withdrawal of Rose Developer for Java (see <a href="#">Rose Expected Lifetime</a> below)</li> </ul>	<ul style="list-style-type: none"> <li>Accept default migration (renewal) to Rose Developer for Java</li> <li>Continue to use Rose Pro J</li> <li>Begin planning for adoption of Rational Systems Developer</li> </ul>	<ul style="list-style-type: none"> <li>Accept default migration (renewal) to Rose Developer for Java</li> <li>Adopt Rational Systems Developer ASAP, based on Anticipatory Access</li> </ul>	<ul style="list-style-type: none"> <li>Request migration of entitlement to Rational Systems Developer</li> <li>Begin adoption of Rational Systems Developer</li> </ul>
<ul style="list-style-type: none"> <li>After market withdrawal of Rose Developer for Java (all maintenance renewals will begin to quote Rational Systems Developer)</li> </ul>	<ul style="list-style-type: none"> <li>Accept default migration (renewal) to Rational Systems Developer</li> <li>Adopt Rational Systems Developer prior to Rose End of Service (see <a href="#">Rose Expected Lifetime</a> below)</li> </ul>	<ul style="list-style-type: none"> <li>Accept default migration (renewal) to Rational Systems Developer</li> <li>Continue to use Rational Systems Developer</li> </ul>
