

Optim

Drop-In ID: OPDM-11.03.00.08-009

Product: IBM® InfoSphere® Optim™ Designer

Release: 11.3.0.8

Problem ID: IP24285

Date: October 20, 2020

Description: This iFix corrects the following problem with Optim Designer.

- If an attempt is made to create an Optim relationship with a table in an Oracle DB Alias. The relationship may fail to be created with a Number Format Exception. The Designer log will contain the following error:
- !MESSAGE Unhandled event loop exception
!STACK 0
java.lang.NumberFormatException: For input string: "18c".
- After applying this iFix, this error should no longer occur.

Prerequisites: IBM® InfoSphere® Optim™ Designer 11.3.0.8.20191101_0906 with:

- OPDM-11.03.00.08-003
- OPDM-11.03.00.08-005
- IBM® Installation Manager 1.8.2 or later

Co-requisites: IBM® InfoSphere® Optim™ Web Applications 11.3.0.8.201911010942 with OPDM-11.03.00.08-007

Supersedes: OPDM-11.03.00.08-004, OPDM-11.03.00.08-006, OPDM-11.03.00.08-007

Special Notes: This iFix requires OPDM-11.03.00.08-003, and OPDM-11.03.00.08-005. This iFix together with previously mentioned iFixes, contain all of the plugins provided with OPDM-11.03.00.08-001, OPDM-11.03.00.08-002, OPDM-11.03.00.08-004, OPDM-11.03.00.08-006 and and OPDM-11.03.00.08-007. Do not install any prior Optim Designer iFix once this iFix is installed.

IBM Installation Manager 1.8.2 or later is required to install this iFix.

Every Designer 11.3.0.8 iFix recreates the base 11.3.0.8 eclipse.ini file. When you apply iFix OPDM-11.03.00.08-005, it creates the file **eclipse.OPDM-11.03.00.08-005.ini** in the designer directory. Before starting Optim Designer, you must replace the contents of the **eclipse.ini** file with the contents of the **eclipse.OPDM-11.03.00.08-005.ini** file. **You must do this each time you apply an iFix on top of OPDM-11.03.00.08-005 if you are using SSL with Optim Designer.**

OS Platforms: Windows

Corrective Actions:

Section I

If more than one iFix is found by Installation Manager, then all of them will be selected by default. Review each iFix and unselect any that you do not wish to install.

Ensure that all Optim components are not running before applying this iFix.

Continue through the Installation Manager Update wizard to apply this iFix.

How to uninstall this fix:

Ensure that all Optim components are not running before uninstalling any iFix.

Start IBM Installation Manager

Select the Uninstall option from the main Installation Manager window or menu.

Select the iFix you wish to uninstall.

Continue through the Installation Manager Uninstall wizard to remove this iFix.

This iFix will automatically be uninstalled if you upgrade to a new version.
