

Optim

Drop-In ID: OPDM-11.03.00.07-013

Product: IBM® InfoSphere® Optim™ Web Applications

Release: 11.3.0.7

Problem ID: IP4206

Date: September 30, 2019

Description: This iFix corrects the following issue in Optim Manager:

- After applying iFix OPDM-11.03.00.07-011 or OPDM-11.03.00.07-012 to Optim Web Applications (and deploying the war file to WebSphere Application Server), when you attempt to sign into Optim Designer, the following error may appear:

OCM is not running.
- After applying this iFix, this error should no longer occur.

Prerequisites: IBM® InfoSphere® Optim™ Web Applications 11.3.0.7.20181027_1625

Co-requisites: IBM® InfoSphere® Optim™ Designer 11.3.0.7.20181027_1629
OPDM-11.03.00.07-007

Supersedes: IBM® InfoSphere® Optim™ Web Applications 11.3.0.7.20181027_1625, OPDM-11.03.00.07-007, OPDM-11.03.00.07-011, OPDM-11.03.00.07-012

Special Notes: Web Application iFixes are always cumulative. You must only install the latest one available. After installing this iFix, you must manually undeploy the currently deployed Unified Optim war file, and deploy this war file in WebSphere Application Server. This problem does **not** occur when using WAS-CE.

OS Platforms: All supported platforms: AIX, RedHat, Solaris, and Windows

Section I

If more than one iFix is found by Installation Manager, then all of them will be selected by default. Review each iFix and unselect any that you do not wish to install. For Web Applications, only select the most recent iFix, since a Web Application iFix is always cumulative.

Ensure that all Optim components are not running before applying this iFix.

Continue through the Installation Manager Update wizard to apply this iFix.

- **Important,** This iFix is delivered as a complete Unified Optim war file. After installing this iFix, the resulting war file will be located in the following directory:
`(installation root)\Optim\shared\web\app`
you must then manually undeploy the currently deployed Unified Optim war file, and deploy this war file in WebSphere Application Server.

How to uninstall the fix:

Ensure that all Optim components are not running before uninstalling any iFix.

Start IBM Installation Manager

Select the Uninstall option from the main Installation Manager window or menu.

Select the iFix you wish to uninstall.

Continue through the Installation Manager Uninstall wizard to remove this iFix.

This iFix will automatically be uninstalled if you upgrade to a new version.

- **Important**, When you use Installation Manager to uninstall this iFix, it does not remove it from your Application Web Server. You must manually remove this war file from your Application Web Server.
