

Optim

Drop-In ID: OPDM-11.03.00.08-013

Product: IBM® InfoSphere® Optim™ Web Applications

Release: 11.3.0.8

Problem ID: IP24327

Date: April 5, 2021

Description: This iFix includes corrections for the following problem:

- When an attempt is made to override the path to the Archive File used in a Delete Service on the Overrides tab of the Service Management tab in Optim Manager, the following error may occur:

```
IOQC01128E File path does not exist on the server computer.
```

- After applying this iFix, and its co-requisite iFix, this error will be corrected.

Prerequisites: IBM® InfoSphere® Optim™ Web Applications 11.3.0.8.2019110109 using:

- IBM® Installation Manager 1.8.2 or later

Co-requisites: IBM® InfoSphere® Optim™ Designer 11.3.0.8.20191101_0906 with OPDM-11.03.00.08-013.

Supersedes: All previous IBM® InfoSphere® Optim™ Web Applications iFixes.

Special Notes: Optim Manager iFixes are always cumulative, and are provided as a complete Optim Unified war file. After installing this iFix, you must manually undeploy the previous Optim Unified war file and manually deploy the Optim Unified war file that is supplied with this iFix. Do not install any previous Optim Manager iFixes once this iFix is installed.

If you use Optim Designer, you must also install iFix OPDM-11.03.00.08-013 for Optim Designer as the same issue can be found in the Optim Designer's Embedded Manager.

IBM Installation Manager 1.8.2 or later is required to install this iFix.

OS Platforms: Windows, Linux, AIX

Corrective Actions:

Section I

If more than one iFix is found by Installation Manager, then all of them will be selected by default. Review each iFix and unselect any that you do not wish to install.

Ensure that all Optim components are not running before applying this iFix.

Continue through the Installation Manager Update wizard to apply this iFix.

How to uninstall this fix:

Ensure that all Optim components are not running before uninstalling any iFix.

Start IBM Installation Manager

Select the Uninstall option from the main Installation Manager window or menu.

Select the iFix you wish to uninstall.

Continue through the Installation Manager Uninstall wizard to remove this iFix.

This iFix will automatically be uninstalled if you upgrade to a new version.

Section II
