

Optim

Drop-In ID: OPDM-11.03.00.07-004

Products: IBM® InfoSphere® Optim™ Runtime Services or WebSphere Application Server – Community Edition

Release: 11.3.0.7

Problem ID: WI72936

Date: December 18, 2018

Description: This iFix corrects the following problem on Solaris only:

- On a Solaris machine, if you attempt to use IBM Installation Manager to find fix packs or iFixes for Optim Runtime Services or WebSphere Application Server – Community Edition, Installation Manager will report that no updates exist. This problem does not manifest itself if you manually download a fix pack or iFix from

<http://public.dhe.ibm.com/software/rationalsdp/v75/nex/zips/>

and add the expanded repository directory location to Installation Manager.

- After applying this iFix to one of the above components installed on a Solaris machine, Installation Manager will use a Solaris specific repository to search for updates for that component. If you have both of the specified components installed on a Solaris machine, you must apply the appropriate iFix to each component.

Prerequisites: One of the following components:

- IBM® InfoSphere® Optim™ Runtime Services 11.3.0.7.20181106_1133
- WebSphere Application Server – Community Edition 11.3.0.7.20181027_1611

Co-requisites: None

Supersedes: None

Special Notes: This fix is only valid for a Solaris OS. **This fix must not be applied to any non-Solaris OS.**

OS Platforms: Solaris

Corrective Actions:

Section I

If more than one iFix is found by Installation Manager, then all of them will be selected by default. Review each iFix and unselect any that you do not wish to install.

Ensure that all Optim components are not running before applying this iFix.

Continue through the Installation Manager Update wizard to apply this iFix.

How to uninstall the test fix:

Ensure that all Optim components are not running before uninstalling any iFix.

Start IBM Installation Manager

Select the Uninstall option from the main Installation Manager window or menu.

Select the iFix you wish to uninstall.

Continue through the Installation Manager Uninstall wizard to remove this iFix.

This iFix will automatically be uninstalled if you upgrade to a new version.

Section II

If you have any questions about or problems with these procedures, contact IBM Optim Support.
